100% Pass 2026 Microsoft PL-200: Microsoft Power Platform Functional Consultant Perfect Paper

There are a number of distinctions of our PL-200 Exam Questions that make it superior to those offered in the market. Firstly, you

will find that there are three different versions of our PL-200 learning guide: the PDF, Software and APP online. Though the content is the same, but the displays are all different. And you can study in all kind of conditions if you have three of them. Secondly, the prices of every version are favourable. And you can buy the Value Pack with discounted price.

Microsoft Power Platform Functional Consultant Sample Questions (Q185-Q190):

NEW QUESTION # 185

You are creating a canvas app.

A user will click a button on each screen of a Power Apps app to proceed to the next screen.

You need to implement an action that selects the next screen that the user sees.

Which event should you handle?

- A. OnCheck
- **B. OnSelect**
- C. ScreenTransition
- D. OnLoad

Answer: B

Explanation:

Add navigation

1. With the Source screen selected, open the Insert tab, select Icons, and then select Next arrow.
2. With the arrow still selected, select the Action tab, and then select Navigate.
3. The OnSelect property for the arrow is automatically set to a Navigate function.

4. When a user selects the arrow, the Target screen fades in.
5. On the Target screen, add a Back arrow, and set its OnSelect property to this formula:
6. `Navigate(Source, ScreenTransition.Fade)`
7. While holding down the Alt key, toggle between screens by selecting the arrow on each screen.

NEW QUESTION # 186

You plan to create classic workflows for process automation on the Account table. The process automation has the following requirements:

- * If the Account Name column changes, a custom column named Previous Name must be updated with the original value.
- * If the Credit Limit column changes, an email must be sent to the record owner with the new value.
- * Asynchronous processes must be used whenever possible.

You need to implement the process automation.

What is the minimum number of workflows you should use? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Answer Area

Workflow type	Number of workflows

Edit values in calculated fields.	<input type="checkbox"/> Yes <input type="checkbox"/> No
Edit the Address composite field.	<input type="checkbox"/> Yes <input type="checkbox"/> No
Use the editable grid on mobile phones.	<input type="checkbox"/> Yes <input type="checkbox"/> No

NEW QUESTION # 189

You need to coordinate updates and deployment for managed solutions containing completed work without disrupting the system. What should you do? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Deployment option for changes to an unrelated table

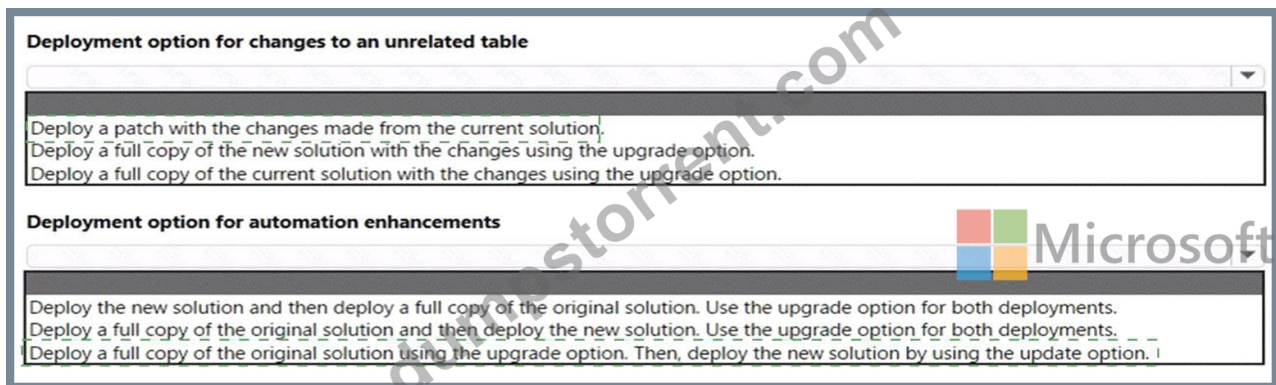

☐ Deploy a patch with the changes made from the current solution.
☐ Deploy a full copy of the new solution with the changes using the upgrade option.
☐ Deploy a full copy of the current solution with the changes using the upgrade option.

Deployment option for automation enhancements

☐ Deploy the new solution and then deploy a full copy of the original solution. Use the upgrade option for both deployments.
☐ Deploy a full copy of the original solution and then deploy the new solution. Use the upgrade option for both deployments.
☐ Deploy a full copy of the original solution using the upgrade option. Then, deploy the new solution by using the update option.

Answer:

Explanation:

Explanation

Box 1: Deploy a patch with the changes made from the current solution.

Scenario:

The Onsite Visit managed solution has a table that is not in the Verification Process Automation managed solution. This table must be upgraded prior to the go-live date without the other shared components.

Box 2: Deploy a full copy of the original solution using the upgrade option. Then, deploy the new solution by using the update option.

Scenario: All components required for the verification process must be included in a new solution.

Corporate security requires that deployments to non-development environments must be automated using service accounts.

Managed solutions are used to move customizations from the development environment to other higher-level environments. These solutions are created and maintained by the power users and provided to internal IT for deployment when they are ready.

Note:

Upgrade This is the default option and upgrades your solution to the latest version and rolls up all previous patches in one step. Any components associated to the previous solution version that are not in the newer solution version will be deleted. This is the recommended option as it will ensure that your resulting configuration state is consistent with the importing solution including removal of components that are no longer part of the solution.

Update This option replaces your solution with this version. Components that are not in the newer solution won't be deleted and will remain in the system. This option is not recommended as your destination environment will differ in configuration from your source environment and could cause issues that are difficult to reproduce and diagnose.
