

ANS-C01 Study Dumps, Valid Brindumps ANS-C01 Ebook

P.S. Free & New ANS-C01 dumps are available on Google Drive shared by ValidBrindumps: <https://drive.google.com/open?id=1t98MH8OHntVPmrO6zII0nWHjSJ2RqD>

Many people want to be the competent people which can excel in the job in some area and be skillful in applying the knowledge to the practical working in some industry. But the thing is not so easy for them they need many efforts to achieve their goals. Passing the ANS-C01 test certification can make them become that kind of people and if you are one of them buying our ANS-C01 study materials will help you pass the ANS-C01 test smoothly with few efforts needed.

Amazon ANS-C01 (AWS Certified Advanced Networking Specialty) exam is specifically designed for professionals who have a deep understanding of networking concepts and are looking to validate their knowledge and skills in the AWS environment. AWS Certified Advanced Networking Specialty Exam certification is intended for individuals who have already passed the AWS Certified Solutions Architect – Associate or AWS Certified Developer – Associate exams and are looking to further their knowledge in networking in the AWS cloud.

The Amazon ANS-C01 exam comprises of a total of 65 multiple-choice and multiple-answer questions, and candidates are given a total of 170 minutes to complete the exam. ANS-C01 Exam is available in multiple languages, including English, Japanese, and Simplified Chinese. It is recommended that candidates have a minimum of five years of experience in networking before attempting the exam.

The ANS-C01 exam covers a wide range of topics related to AWS networking, including designing and implementing hybrid IT network architectures, automating AWS tasks using AWS services, optimizing network performance, and troubleshooting complex networks. Candidates must have prior experience with AWS networking and be familiar with various AWS services, including Amazon VPC, AWS Direct Connect, Amazon Route 53, and Amazon CloudFront.

Newest Amazon ANS-C01 Study Dumps Are Leading Materials & Complete Valid Brindumps ANS-C01 Ebook

The name of these formats are Amazon ANS-C01 PDF dumps file, desktop practice test software, and web-based practice test software. All these three Amazon Cloud ANS-C01 practice test formats are easy to use and perfectly work with all devices, operating systems, and web browsers. The ANS-C01 Pdf Dumps file is a simple collection of Real and Updated AWS Certified Advanced Networking Specialty Exam (ANS-C01) exam questions in PDF format and it is easy to install and use.

Amazon AWS Certified Advanced Networking Specialty Exam Sample Questions (Q135-Q140):

NEW QUESTION # 135

A multinational organization has applications deployed in three different AWS regions. These applications must securely communicate with each other by VPN.

According to the organization's security team, the VPN must meet the following requirements:

- AES 128-bit encryption
- SHA-1 hashing
- User access via SSL VPN
- PFS using DH Group 2
- Ability to maintain/rotate keys and passwords
- Certificate-based authentication

Which solution should you recommend so that the organization meets the requirements?

Response:

- A. AWS hardware VPN between the virtual private gateways in each region
- B. A private MPLS solution from an international carrier
- C. AWS hardware VPN between the virtual private gateway and customer gateway
- **D. A third-party VPN solution deployed from AWS Marketplace**

Answer: D

NEW QUESTION # 136

A network engineer has configured a private hosted zone using Amazon Route 53. The engineer needs to configure health checks for record sets within the zone that are associated with instances.

How can the engineer meet the requirements?

Response:

- A. Configure a Route 53 health check pointing to an Amazon SNS topic that notifies an Amazon CloudWatch alarm when the Amazon EC2 StatusCheckFailed metric fails.
- B. Configure a Route 53 health check to a private IP associated with the instances inside the VPC to be checked
- C. Create a CloudWatch alarm for the StatusCheckFailed metric and choose Recover this instance, selecting a threshold value of 1
- **D. Create a CloudWatch metric that checks the status of the EC2 StatusCheckFailed metric, add an alarm to the metric, and then create a health check that is based on the state of the alarm**

Answer: D

NEW QUESTION # 137

A company hosts an application on Amazon EC2 instances behind an Application Load Balancer (ALB). The company recently experienced a network security breach. A network engineer must collect and analyze logs that include the client IP address, target IP address, target port, and user agent of each user that accesses the application.

What is the MOST operationally efficient solution that meets these requirements?

- A. Configure Amazon Kinesis Data Streams to stream data from the ALB to Amazon OpenSearch Service (Amazon Elasticsearch Service). Use search operations in Amazon OpenSearch Service (Amazon Elasticsearch Service) to analyze the data.
- **B. Configure the ALB to store logs in an Amazon S3 bucket. Use Amazon Athena to analyze the logs in Amazon S3.**
- C. Configure the ALB to store logs in an Amazon S3 bucket. Download the files from Amazon S3, and use a spreadsheet application to analyze the logs.
- D. Configure the ALB to push logs to Amazon Kinesis Data Streams. Use Amazon Kinesis Data Analytics to analyze the logs.

Answer: B

Explanation:

<https://docs.aws.amazon.com/elasticloadbalancing/latest/application/load-balancer-access-logs.html>

<https://repost.aws/knowledge-center/athena-analyze-access-logs>

NEW QUESTION # 138

Which type of firewall dynamically allows return traffic?

Response:

- **A. Security Group**
- B. Stateless Firewall
- C. Network ACL

Answer: A

NEW QUESTION # 139

You have configured a new Amazon S3 endpoint in your VPC. You have created a public Amazon S3 bucket so that you can test connectivity. You can download objects from your laptop but not from instances in the VPC. Which of the following could NOT be a problem?

Response:

- **A. There are not enough free IP addresses in your subnet, so you must choose a larger subnet or remove unused interfaces and IP addresses.**
- B. The route to the Amazon S3 prefix list is not in the routing table for the instance's subnet
- C. The VPC endpoint security policy is blocking access to specified S3 bucket.
- D. Domain Name System (DNS) was not enabled for the VPC, so you must enable DNS.

Answer: A

NEW QUESTION # 140
