

# 2026 C\_BCSBS\_2502–100% Free Test Registration | Pass-Sure Valid Braindumps SAP Certified Associate - Positioning SAP Business Suite Files

โครงการทดสอบศักยภาพนักเรียนระดับชั้น ป.4, ป.5 และ ป.6

## Samsen PRE-TEST 2026 HYBRID

ENHANCING EXPERIENCE BY SAMSEN PRE-TEST

รับสมัครทาง ONLINE วันเสาร์ที่ 25 ตุลาคม - วันอาทิตย์ที่ 23 พฤศจิกายน 2568

### รูปแบบ ON-SITE

#### วันสอบ

**ห้องเรียนพิเศษ (SMTE,MSEP,EP)**

**รอบที่ 1** วันเสาร์ที่ 13 ธันวาคม 2568 เวลาสอบ 9.00-12.00 น.

**รอบที่ 2** วันอาทิตย์ที่ 14 ธันวาคม 2568 เวลาสอบ 9.00-12.00 น.

**วิชาที่สอบ 3 วิชา :** คณิตศาสตร์ วิทยาศาสตร์ ภาษาอังกฤษ

**ห้องเรียนปกติ**

**รอบที่ 1** วันเสาร์ที่ 13 ธันวาคม 2568 เวลาสอบ 14.00-17.00 น.

**รอบที่ 2** วันอาทิตย์ที่ 14 ธันวาคม 2568 เวลาสอบ 14.00-17.00 น.

**วิชาที่สอบ 5 วิชา :** คณิตศาสตร์, วิทยาศาสตร์, ภาษาอังกฤษ, ภาษาไทย, สังคมศึกษา

จำนวนรับสมัคร 1,500 คน/รอบ  
ค่าสมัคร รูปแบบ ON-SITE 600 บาท

**รางวัลทุนการศึกษา**  
(เฉพาะผู้ได้สอบรูปแบบ ON-SITE เท่านั้น)

- รางวัลสำหรับผู้ที่ได้คะแนนรวมทุกวิชาสูงสุด 3 อันดับแรก (แยกประเภทห้องเรียนพิเศษและห้องเรียนปกติ)
- อันดับที่ 1 ในประเภทห้องเรียนพิเศษ พร้อมทุนการศึกษา 10,000 บาท
- อันดับที่ 2 ในประเภทห้องเรียนพิเศษ พร้อมทุนการศึกษา 7,000 บาท
- อันดับที่ 3 ในประเภทห้องเรียนพิเศษ พร้อมทุนการศึกษา 5,000 บาท
- รางวัลสำหรับผู้ที่ได้คะแนนรวมทุกวิชาสูงสุดของแต่ละวิชา (แยกประเภทห้องเรียนพิเศษ และ ห้องเรียนปกติ)
- รับใบประกาศเกียรติคุณ พร้อมทุนการศึกษา วิชาละ 1,500 บาท

### รูปแบบ ONLINE

#### วันสอบ

**วันอาทิตย์ที่ 14 ธันวาคม 2568**

**ห้องเรียนพิเศษ (SMTE,MSEP,EP)**

เวลาสอบ 9.00-12.00 น.

**วิชาที่สอบ 3 วิชา :** คณิตศาสตร์, วิทยาศาสตร์, ภาษาอังกฤษ

**ห้องเรียนปกติ**

เวลาสอบ 14.00-17.00 น.

**วิชาที่สอบ 5 วิชา :** คณิตศาสตร์, วิทยาศาสตร์, ภาษาอังกฤษ, ภาษาไทย, สังคมศึกษา

**จัดทดลองระบบ**

**เพื่อเรียนรู้ขั้นตอนการสอบ ONLINE**

**วันที่ 30 พฤศจิกายน 2568**

โดยไม่คิดค่าบริการ

รับสมัครไม่จำกัดจำนวน  
ค่าสมัคร รูปแบบ ONLINE 300 บาท

**ประกาศผลสอบ : วันที่ 21 ธันวาคม 2568**

**รายละเอียดเพิ่มเติม**

- นักเรียนสมัครได้ทั้งห้องเรียนพิเศษและห้องเรียนปกติ โดยเลือกรูปแบบการสอบเป็น ON-SITE หรือ ONLINE ได้เพียง 1 รูปแบบต่อ 1 ประเภทห้องเรียน
- นักเรียนที่สอบและได้คะแนนเข้ารอบ ON-SITE หรือ ONLINE ภายในวันที่ 23 พฤศจิกายน 2568 เวลา 23.59 น.
- สามารถตรวจสอบรายชื่อผู้เข้าสอบทุกรูปแบบ ในวันที่ 26-29 พฤศจิกายน 2568
- ผู้ที่ได้สอบรูปแบบ ON-SITE สามารถพิมพ์ใบตอบรับเข้าสอบ ในวันที่ 1 ธันวาคม 2568
- รูปแบบ ONLINE ต้องลงทะเบียน Username และ Password เพื่อใช้ในการทดลองระบบและดูผลการสอบ ในวันที่ 1 ธันวาคม 2568
- งดสอบข้อใดข้อหนึ่งในวันดังกล่าว

**ช่องทางการสมัครและติดต่อสอบถาม หรือ SCAN QR CODE**

2025 Latest DumpsActual C\_BCSBS\_2502 PDF Dumps and C\_BCSBS\_2502 Exam Engine Free Share:  
<https://drive.google.com/open?id=1QY4NKPj-vgg2OeafnJsAGrKVbdc5XRYy>

Provided you get the certificate this time with our C\_BCSBS\_2502 training guide, you may have striving and excellent friends and promising colleagues just like you. It is also as obvious magnifications of your major ability of profession, so C\_BCSBS\_2502 Learning Materials may bring underlying influences with positive effects. The promotion or acceptance of our C\_BCSBS\_2502 exam questions will be easy. So it is quite rewarding investment.

## SAP C\_BCSBS\_2502 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none"> <li>Discovering SAP Business AI: This section of the exam measures the skills of Digital Transformation Specialists and focuses on exploring how SAP Business AI enables smarter decision-making. It includes identifying AI-driven features embedded within SAP solutions and how they contribute to automation, predictions, and enhanced business outcomes. Professionals are expected to understand how to promote AI adoption in business processes using SAP's intelligent technologies.</li> </ul>

Topic 2	<ul style="list-style-type: none"> <li>Positioning SAP Business Data Cloud: This section of the exam measures the skills of Enterprise Architects and covers the positioning and strategic use of SAP Business Data Cloud. It involves understanding how data from various sources is managed, governed, and accessed to support intelligent business operations. The section aims to equip professionals with the ability to explain data unification and connectivity through SAP's cloud-based data platform.</li> </ul>
Topic 3	<ul style="list-style-type: none"> <li>Positioning SAP Business Suite: This section of the exam measures the skills of Solution Consultants and covers how to effectively position the SAP Business Suite within various business scenarios. It includes understanding the core value, capabilities, and strategic advantages of SAP's integrated business applications. The focus is on enabling consultants to align SAP Business Suite offerings with customer needs to support end-to-end processes.</li> </ul>

### >> Test C\_BCSBS\_2502 Registration <<

## Useful Test C\_BCSBS\_2502 Registration Provide Prefect Assistance in C\_BCSBS\_2502 Preparation

The pass rate is 98.75% for C\_BCSBS\_2502 learning materials, and we will help you pass the exam just one time if you choose us. In order to build up your confidence for C\_BCSBS\_2502 training materials, we are pass guarantee and money back guarantee, if you fail to pass the exam, we will give you full refund. In addition, you can receive the download link and password within ten minutes for C\_BCSBS\_2502 Training Materials, if you don't receive, you can contact with us, and we will solve this problem for you immediately. We offer you free update for 365 days for you, and the update version for C\_BCSBS\_2502 exam materials will be sent to your email automatically.

## SAP Certified Associate - Positioning SAP Business Suite Sample Questions (Q13-Q18):

### NEW QUESTION # 13

Which SAP solutions enhance supplier management and procurement? There are 3 correct answers to this question.

- A. SAP Predictive Analytics
- B. SAP Business Network
- C. SAP SCM
- D. SAP Transportation Management
- E. SAP Ariba

**Answer: B,C,E**

### NEW QUESTION # 14

Which transformation journey is the right one for new SAP ERP customers?

- A. ACTIVATE with SAP journey
- B. ACCELERATE with SAP journey
- C. GROW with SAP journey
- D. RISE with SAP journey

**Answer: C**

Explanation:

The question asks which transformation journey is appropriate for new SAP ERP customers, meaning organizations that are adopting SAP ERP for the first time or have minimal prior SAP experience. According to official SAP documentation and the provided search results, GROW with SAP is the transformation journey specifically designed for new SAP ERP customers, particularly midmarket businesses or those seeking a rapid, standardized implementation of SAP S/4HANA Cloud, public edition. This makes Option C the correct answer.

Explanation of Correct answer:

Option C: GROW with SAP journey

This is correct because GROW with SAP is tailored for new SAP ERP customers, offering a streamlined, cloud-based journey to adopt SAP Business Suite, specifically SAP S/4HANA Cloud, public edition. It provides preconfigured best practices, a prescriptive methodology, and partner expertise to accelerate implementation, making it ideal for organizations starting fresh with SAP or those with simpler ERP needs. The Showcasing the Path for Customers to Adopt SAP Business Suite lesson on [learning.sap.com](https://learning.sap.com) states: "GROW with SAP supports new ERP customers in starting with SAP Business Suite, driving SAP's future growth alongside theirs. New customers always start with the public cloud. This journey provides an ever-green SAP Business Suite, always on the latest version and innovations." [learning.sap.com](https://learning.sap.com) The GROW with SAP journey is designed to help midmarket businesses or new SAP adopters modernize their ERP landscape quickly, leveraging SAP Cloud ERP and SAP Business Technology Platform (BTP) for scalability and efficiency. The How to Get Started With GROW with SAP Journey article from [datalark.com](https://datalark.com) further elaborates: "GROW with SAP is a digital transformation journey tailored to help mid-market businesses that aspire to enhance operational efficiency. ... Customers purchase one of the new SAP Business Suite packages (e.g., SAP Finance Base), then expand by adding further lines of business. ... GROW with SAP allows mid-market businesses to streamline their ERP journey to SAP Business Suite implementation." [datalark.com](https://datalark.com) Key features of GROW with SAP include standardized workflows, prebuilt content, and the SAP Activate methodology, which ensure a fast time-to-value without the complexities of legacy system migrations. This journey is particularly suited for greenfield implementations, where customers can start with a clean core and adopt cloud-native innovations like SAP Business AI from the outset.

Explanation of Incorrect Answers:

Option A: RISE with SAP journey

This is incorrect because RISE with SAP is designed for existing SAP ERP customers, particularly those with complex, on-premise landscapes (e.g., SAP ECC or SAP S/4HANA on-premise) looking to transition to the cloud, either via SAP S/4HANA Cloud, private edition or public edition. It is not tailored for new SAP customers who lack an existing SAP ERP footprint. The RISE with SAP page on [www.sap.com](https://www.sap.com) states:

"RISE with SAP is a guided transformation journey designed for SAP ERP customers to quickly realize the full potential of Business Suite, supported by proven methodologies, advanced tools, and expert guidance.

RISE with SAP is tailored for existing SAP ERP customers, enabling them to transition seamlessly from on-premises ERP to Business Suite while modernizing their processes and infrastructure at their own pace." [sap.com](https://www.sap.com)

The focus on legacy system modernization and complex transformations makes RISE with SAP unsuitable for new customers starting with a clean slate.

Option B: ACTIVATE with SAP journey

This is incorrect because SAP Activate is not a transformation journey but a methodology used within transformation journeys like RISE with SAP and GROW with SAP. It provides a structured framework, templates, and best practices for implementing SAP solutions, but it is not a standalone customer-facing journey. The GROW with SAP article from [datalark.com](https://datalark.com) notes:

"Speed up deployment with SAP Activate. This methodology includes templates, project timelines, and best practices to ensure a smooth implementation." [datalark.com](https://datalark.com) Since SAP Activate is a toolset rather than a journey, it cannot be the correct choice for new SAP ERP customers.

Option D: ACCELERATE with SAP journey

This is incorrect because there is no transformation journey called ACCELERATE with SAP in SAP's official offerings. The term "accelerate" may be used in marketing materials to describe the speed of transformation (e.g., in RISE with SAP or GROW with SAP methodologies), but it is not a distinct journey. The provided search results and SAP documentation, including Positioning SAP Business Suite on [learning.sap.com](https://learning.sap.com), do not reference an ACCELERATE with SAP journey, confirming that this is a fictitious option.

Summary:

The appropriate transformation journey for new SAP ERP customers is the GROW with SAP journey, as stated in Option C. This journey is designed for greenfield implementations, particularly for midmarket businesses or those new to SAP, providing a fast, standardized path to SAP S/4HANA Cloud, public edition within SAP Business Suite. Option A (RISE with SAP) is for existing SAP customers with legacy systems, Option B (ACTIVATE with SAP) is a methodology, not a journey, and Option D (ACCELERATE with SAP) does not exist. This aligns with SAP's strategy to support new customers with a cloud-native, scalable ERP solution, as validated by the provided search results and official documentation.

## NEW QUESTION # 15

How does integrating SAP Databricks within SAP Business Data Cloud reduce IT overhead for customers?

- A. By eliminating the need for rebuilding data structures and business logic externally
- B. By automating data ingestion pipelines

- C. By providing pre-built connectors to various data sources
- D. By streamlining data governance processes and minimizing the need for complex data security configurations

**Answer: A**

Explanation:

SAP Business Data Cloud (BDC) is a fully managed Software-as-a-Service (SaaS) solution that unifies and governs SAP and non-SAP data, integrating SAP Databricks to enable advanced analytics and AI-driven insights. The question asks how the integration of SAP Databricks within SAP BDC reduces IT overhead for customers, with one correct answer. Below, each option is evaluated based on official SAP documentation, SAP Learning materials, and relevant web sources from the provided search results, ensuring alignment with the "Positioning SAP Business Data Cloud" narrative and focusing on the role of SAP Databricks.

\* Option A: By automating data ingestion pipelines While SAP BDC, including its SAP Datasphere component, supports data integration and pipeline management, the automation of data ingestion pipelines is not a primary focus of SAP Databricks' integration. SAP Databricks is designed to enhance AI/ML, data science, and data engineering capabilities, leveraging zero-copy data sharing via Delta Sharing to access data products. Although SAP BDC as a whole may reduce some pipeline management overhead, the specific role of SAP Databricks is not to automate ingestion pipelines but to utilize pre-curated data products without requiring complex ETL processes. The documentation does not emphasize automated ingestion pipelines as a key IT overhead reduction mechanism for SAP Databricks. Extract: "SAP Business Data Cloud is deeply integrated across SAP applications, so your most critical data retains its original business context and semantics and the hidden costs of data extracts are eliminated-saving you time, resources, and effort." This option is incorrect.

\* Option B: By providing pre-built connectors to various data sources SAP BDC provides pre-built connectors to SAP and non-SAP data sources through its foundation services and SAP Datasphere, enabling seamless data integration. However, this capability is not specifically tied to the SAP Databricks component. SAP Databricks leverages these connections indirectly by accessing data products shared via Delta Sharing, but it does not provide the connectors itself. The documentation highlights SAP BDC's overall integration capabilities, not SAP Databricks' role in providing connectors, as the primary mechanism for reducing IT overhead. Extract: "Effortlessly connect to contextual SAP data and blend with third-party data-without managing pipelines and copying data." This option is incorrect.

\* Option C: By streamlining data governance processes and minimizing the need for complex data security configurations SAP Databricks integrates with Unity Catalog for governance, which enhances data management and security within the SAP BDC environment. SAP BDC itself provides unified provisioning, security, and compliance, reducing some governance overhead. However, while governance is improved, the primary IT overhead reduction from SAP Databricks comes from eliminating the need to replicate and re-engineer data externally, not from streamlining governance processes. The documentation emphasizes data sharing and semantic preservation over governance simplification as the key benefit of SAP Databricks integration. Extract: "SAP Databricks uses both generative and traditional AI to understand your organization's data, business terms, and key metrics, so teams can work with data using natural language. It makes it easier to find, organize, manage, and govern data through Unity Catalog..." This option is incorrect.

\* Option D: By eliminating the need for rebuilding data structures and business logic externally The integration of SAP Databricks within SAP BDC significantly reduces IT overhead by eliminating the need to rebuild data structures and business logic externally. Traditionally, customers replicate SAP data into external platforms, requiring complex ETL processes to clean, transform, and recreate business logic, which increases costs and maintenance efforts. SAP Databricks, through native integration and zero-copy Delta Sharing, provides direct access to curated, semantically rich SAP data products (e.g., from SAP S/4HANA) within the SAP BDC environment. This preserves business context and semantics, avoiding the need to re-engineer data structures or logic, thus reducing development, maintenance, and operational overhead. This is explicitly highlighted in the documentation as a key benefit of the SAP-Databricks partnership. Extract: "Today, customers often replicate SAP data into external platforms to clean, train models, deploy them, run inference, and push results back-introducing complexity, higher costs, and governance gaps. SAP Databricks offers a better path. Customers can now run end-to-end AI, ML, and analytics directly within SAP Business Data Cloud-without needing separate platforms or physical data replication." Extract: "Built-In Business Semantics: Because SAP data already carries deep business context and semantics, Databricks can provide powerful analytics and machine learning without forcing customers to re-invent data pipelines or guess at the meaning of fields." Extract: "SAP Databricks also offers significantly improved data latency... This enhanced latency is possible due to the Delta Sharing approach which enables direct access to clean, curated and context-rich data products with business semantics already incorporated. ... [This] results in a reduction of processing costs and lowering the overheads for initial development and ongoing maintenance of ETL processes." This option is correct.

Summary of Correct answer:

\* D: Integrating SAP Databricks within SAP BDC reduces IT overhead by eliminating the need to rebuild data structures and business logic externally, leveraging zero-copy Delta Sharing to access curated SAP data products with preserved business semantics, thus minimizing complex ETL processes and maintenance costs.

### NEW QUESTION # 16

Which solution enables advanced AI and machine learning models on combined SAP and third-party data?

- A. SAP Datasphere
- B. SAP AI Launchpad
- C. SAP Analytics Cloud
- **D. SAP Databricks**

**Answer: D**

Explanation:

The question asks which solution within the SAP ecosystem enables advanced AI and machine learning (ML) models using both SAP and third-party data. The correct answer is SAP Databricks, as it is specifically designed to provide advanced data engineering, AI, and ML capabilities within the SAP Business Data Cloud platform, seamlessly integrating SAP and non-SAP data. According to official SAP documentation, SAP Business Data Cloud is a Software-as-a-Service (SaaS) solution that integrates key components such as SAP Datasphere, SAP Analytics Cloud, SAP Business Warehouse (BW), and SAP Databricks. Among these, SAP Databricks is the component tailored for advanced AI and ML workloads, enabling data scientists to develop and execute algorithms and models on combined SAP and third-party data without the need for data replication.

The exact extract from the Positioning SAP Business Data Cloud lesson on [learning.sap.com](https://learning.sap.com) states:

"SAP Databricks is a data intelligence platform that provides advanced data engineering capabilities, including artificial intelligence (AI) and machine learning (ML). SAP Databricks is used by the data scientist who needs a powerful set of tools to develop algorithms and models from data. ... To enable advanced AI/ML scenarios within SAP Business Data Cloud, SAP has embedded Databricks as a service. The name of the embedded version of Databricks is SAP Databricks." [learning.sap.com](https://learning.sap.com) This extract confirms that SAP Databricks is the component responsible for advanced AI and ML capabilities.

It integrates natively with SAP Business Data Cloud through the Delta Sharing protocol, allowing secure, bidirectional data access without physically copying data between systems. This enables data teams to blend SAP data with external data sources for AI and ML use cases, as further supported by:

"SAP Databricks integrates natively with SAP Business Data Cloud through Delta Sharing, enabling secure, bidirectional data access without physically copying data between systems. This shared foundation allows data teams to: Blend SAP data with external data: Data teams can blend their SAP data with data from other applications, databases, and object storage systems." [databricks.com](https://databricks.com) In contrast, the other options do not primarily focus on advanced AI and ML model development:

\* SAP AI Launchpad: This is a tool for managing and deploying AI models across SAP solutions but is not the primary platform for developing advanced AI/ML models on combined SAP and third-party data. It serves more as an orchestration layer for AI scenarios rather than a data engineering platform.

\* SAP Analytics Cloud: This component focuses on analytics, reporting, dashboards, and enterprise planning. While it supports some AI-driven insights (e.g., through the Joule copilot), it is not designed for building advanced AI/ML models. The documentation states:

"SAP Analytics Cloud delivers enterprise analytics, reporting, dashboards, and unified planning." [learning.sap.com](https://learning.sap.com)

\* SAP Datasphere: This component provides data integration, federation, and semantic modeling, forming the foundation for data products in SAP Business Data Cloud. It supports analytics and can be extended with AI/ML, but it is not the primary tool for advanced AI/ML model development. The documentation notes:

"At the heart of SAP Business Data Cloud is SAP Datasphere, which provides the foundational structures that define the data model on top of the data products. ... scenarios with custom data models that can be manually extended with machine learning or AI." [learning.sap.com](https://learning.sap.com)

The integration of SAP Databricks with SAP Business Data Cloud is further emphasized as a key innovation for AI-driven use cases, particularly for handling both structured and unstructured data from SAP and non-SAP sources. For example:

"The integration with Databricks enables advanced Artificial Intelligence (AI) and Machine Learning (ML) models, leveraging both SAP and third-party data." [learning.sap.com](https://learning.sap.com) This partnership with Databricks, a market leader in AI and ML, ensures that SAP Databricks provides robust tools for data scientists to work with harmonized data, making it the definitive solution for the question's requirements.

### NEW QUESTION # 17

Match the outcomes in the dropdown lists to the capabilities of Joule

Get the insights you need, when you need them.	<div>Increased workforce productivity, fewer operational errors, and quicker task completion</div> <div>Higher NPS, better conversion rates, and stronger customer retention</div> <div>Reduced time-to-insight, empowerment of non-technical personnel, and quicker decision making.</div>
Enable every employee to achieve more in a faster way.	<div>Increased workforce productivity, fewer operational errors, and quicker task completion</div> <div>Higher NPS, better conversion rates, and stronger customer retention</div> <div>Reduced time-to-insight, empowerment of non-technical personnel, and quicker decision making.</div>
Make every customer touchpoint count.	<div>Increased workforce productivity, fewer operational errors, and quicker task completion</div> <div>Higher NPS, better conversion rates, and stronger customer retention</div> <div>Reduced time-to-insight, empowerment of non-technical personnel, and quicker decision making.</div>

**Answer:**

**Explanation:**

Get the insights you need, when you need them.	<div>Increased workforce productivity, fewer operational errors, and quicker task completion</div> <div>Higher NPS, better conversion rates, and stronger customer retention</div> <div>Reduced time-to-insight, empowerment of non-technical personnel, and quicker decision making.</div>
Enable every employee to achieve more in a faster way.	<div>Increased workforce productivity, fewer operational errors, and quicker task completion</div> <div>Higher NPS, better conversion rates, and stronger customer retention</div> <div>Reduced time-to-insight, empowerment of non-technical personnel, and quicker decision making.</div>
Make every customer touchpoint count.	<div>Increased workforce productivity, fewer operational errors, and quicker task completion</div> <div>Higher NPS, better conversion rates, and stronger customer retention</div> <div>Reduced time-to-insight, empowerment of non-technical personnel, and quicker decision making.</div>

**Explanation:**

**Step-by-Step Solution**

1. Get the insights you need, when you need them.

**Correct Outcome:**

\* Reduced time-to-insight, empowerment of non-technical personnel, and quicker decision making.

This outcome is about having real-time access to insights and analytics. Joule helps by making complex data simple and accessible, empowering all users (not just technical staff) to make decisions quickly, without waiting for IT or reports.

2. Enable every employee to achieve more in a faster way.

**Correct Outcome:**

\* Increased workforce productivity, fewer operational errors, and quicker task completion.

Here, the focus is on how Joule streamlines processes for all employees. With AI automation and proactive recommendations, Joule helps everyone work faster, make fewer mistakes, and complete tasks efficiently.

3. Make every customer touchpoint count.

**Correct Outcome:**

\* Higher NPS, better conversion rates, and stronger customer retention.

This is about customer experience. Joule uses AI to ensure every interaction with the customer is valuable, increasing satisfaction (NPS = Net Promoter Score), conversion, and retention rates.
