APMG-International Agile Project Management (AgilePM) Foundation Exam Sample Questions (Q149-Q154):

NEW QUESTION # 149

What DSDM product reflects the approach to the management of the project as a whole and considers, from a management perspective, how the project will be organized and planned?

- **A. Foundation Summary**
- B. Delivery Plan

- C. Management Approach Definition
- D. Terms of Reference

Answer: A

NEW QUESTION # 150

What is the MoSCoW technical used for?

- A. As an opportunity to share information across the team and to do any day.to.day re-planning and reorganizing as necessary when issues occur.
- **B. Understanding and managing priorities.**
- C. Creating a visual representation of a problem or a solution.
- D. Ensuring a team-based approach through visual and verbal communication and collaboration.

Answer: B

NEW QUESTION # 151

Which of the following is NOT a Project Artifact relevant to Financial Governance?

- A. Project Review Report
- B. Feasibility Assessment
- C. Foundation Summary
- **D. Sprint Review Record**

Answer: D

Explanation:

Comprehensive and Detailed Explanation (paraphrased from AgilePM governance guidance):

AgilePM's financial governance relies on artifacts that demonstrate continuing business justification, predictable control, and informed decision-making. Core project artifacts include the Feasibility Assessment (early viability and value assessment), the Foundations Summary (establishes the Business Case, scope, approach, plans, and controls), and the Project Review Report (evidence-based assessments of progress, benefits, and risks). These directly support budget stewardship, investment decisions, and release planning. A Sprint Review Record is a Scrum team-level event output focused on inspecting increments and adapting the Product Backlog; it is not a defined AgilePM project artifact nor specifically a financial governance instrument. While insights from reviews inform governance, the formal artifacts tied to AgilePM's project-level financial control are exemplified by options A, C, and D-hence B is the correct "NOT" choice.

NEW QUESTION # 152

Both numerical and subjective methods can build a picture of how effective your change interventions are. Which type of measure can help us to understand why, how, or what happened behind certain behaviors?

- **A. Qualitative.**
- B. Lagging.
- C. Quantitative.
- D. Leading.

Answer: A

Explanation:

Qualitative Measures: These provide insight into the underlying reasons, motivations, and emotions behind behaviors. Examples include interviews, open-ended surveys, and focus groups.

Other Options:

B: Quantitative measures focus on numerical data but lack context.

C: Leading indicators predict future performance but don't explain behavior.

D: Lagging indicators reflect past performance, not the reasons behind it.

Key AgilePM Concepts Referenced:

Measurement and Analysis: AgilePM Handbook, Chapter 7, Section 7.5.

NEW QUESTION # 153

Why is it appropriate to give Line Leaders privileged access to the thinking behind a change?

- A. They may block change if not fully engaged.
- B. Their authorization is needed to progress.
- C. They have seniority within the organization.
- D. Everyone should see this information.

Answer: A

Explanation:

* Line Leaders as Key Stakeholders: If line leaders are not fully engaged, they can create barriers to change implementation due to their influence on frontline staff. Providing them with privileged access ensures alignment and reduces resistance.

* Other Options:

* A: Seniority is irrelevant; engagement depends on roles and influence.

* B: Authorization may not always be needed for every change.

* C: Information access should be strategic, not indiscriminate.

Key AgilePM Concepts Referenced:

* Engaging Stakeholders: AgilePM Handbook, Chapter 5, Section 5.4.

NEW QUESTION # 154

.....

If you think it is an adventure for purchasing our APMG-International AgilePM-Foundation braindump, life is also a great adventure.
