With years of experience in the field, VCE4Plus are always striving hard to provide customers with genuine ISO/IEC 27001 (2022) Foundation Exam (ISO-IEC-27001-Foundation) exam dumps so that they crack their ISO/IEC 27001 (2022) Foundation Exam (ISO-IEC-27001-Foundation) exam in less time. VCE4Plus also offer the best self-assessment software so besides memorizing ISO-IEC-27001-Foundation Exam Questions, applicants put their learning to the test and reduce their chances of failure in the real ISO/IEC 27001 (2022) Foundation Exam (ISO-IEC-27001-Foundation) examination.

## APMG-International ISO-IEC-27001-Foundation Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none"><li>• Data Security: Data security refers to protecting digital information—such as that stored in databases or networks—from destruction, unauthorized access, or malicious attacks, ensuring confidentiality and integrity.</li></ul>
Topic 2	<ul style="list-style-type: none"><li>• Framework Design: Framework design is the process of developing a reusable structural foundation that supports and guides the creation and organization of software systems.</li></ul>
Topic 3	<ul style="list-style-type: none"><li>• Information Management (IM): Information management (IM) encompasses the entire lifecycle of information within an organization—from its collection and storage to its distribution, use, and eventual archiving or disposal.</li></ul>
Topic 4	<ul style="list-style-type: none"><li>• Compliance: Regulatory compliance refers to an organization's commitment to understanding and adhering to applicable laws, policies, and regulations to operate within established legal and ethical standards.</li></ul>
Topic 5	<ul style="list-style-type: none"><li>• Cybersecurity: Cybersecurity, also known as IT security or computer security, involves safeguarding computer systems, networks, and data from unauthorized access, theft, damage, or disruption to ensure the integrity and availability of digital information.</li></ul>
Topic 6	<ul style="list-style-type: none"><li>• Continuous Improvement Process (CI, CIP): A continuous or continual improvement process (CIP or CI) involves ongoing, systematic efforts to enhance products, services, or operational processes to achieve higher efficiency and effectiveness over time.</li></ul>

## **ISO-IEC-27001-Foundation Exam Prep and ISO-IEC-27001-Foundation Test Dumps - ISO-IEC-27001-Foundation Exam Question - VCE4Plus**

VCE4Plus expect to design such an efficient study plan to help you build a high efficient learning attitude for your further development. Our ISO-IEC-27001-Foundation study torrent are cater every candidate no matter you are a student or office worker, a green hand or a staff member of many years' experience. Therefore, you have no need to worry about whether you can pass the ISO-IEC-27001-Foundation Exam, because we guarantee you to succeed with our technology strength. The language of our ISO-IEC-27001-Foundation exam questions are easy to follow and the pass rate of our ISO-IEC-27001-Foundation learning guide is as high as 99% to 100%.

### **APMG-International ISO/IEC 27001 (2022) Foundation Exam Sample Questions (Q30-Q35):**

#### **NEW QUESTION # 30**

Which statement is a factor that will influence the implementation of the information security management system?

- A. The ISMS will be operated as an independent process within the organization
- B. The ISMS will encompass all controls specified within ISO/IEC 27001
- **C. The ISMS will be scaled to the controls according to the needs of the organization**
- D. The ISMS will be separate from the organization's overall management structure

**Answer: C**

Explanation:

ISO/IEC 27001 makes clear that the ISMS is intended to be tailored to the organization. The standard states: "This document also includes requirements for the assessment and treatment of information security risks tailored to the needs of the organization. The requirements set out in this document are generic and are intended to be applicable to all organizations regardless of type, size or nature." This means implementation is scaled based on each organization's risk, context, and needs, not a fixed one-size-fits-all set of activities or controls. Clause 6.1.3 further reinforces that control selection is flexible and risk-driven: "Organizations can design controls as required or identify them from any source," and "Annex A contains a list of possible information security controls... The information security controls listed in Annex A are not exhaustive and additional information security controls can be included if needed." Together, these extracts verify that the ISMS implementation is influenced by and scaled to the organization's needs and selected controls, not separated from management processes (A, D) nor mandated to include "all controls" (B).

#### **NEW QUESTION # 31**

What is the definition of a threat according to ISO/IEC 27000?

- A. A single or a series of unwanted or unexpected information security events
- **B. A potential cause of an unwanted incident which can result in harm to a system or organization**
- C. A weakness of an asset or a control that can be exploited
- D. The risk remaining after risk treatment

**Answer: B**

Explanation:

Comprehensive and Detailed Explanation From Exact Extract ISO/IEC 27000 standards:

According to ISO/IEC 27000:2018, Clause 3.74, a threat is defined as:

"Potential cause of an unwanted incident, which can result in harm to a system or organization." This definition directly matches option A.

\* Option B refers to an "information security incident" (ISO/IEC 27000:2018, Clause 3.32).

\* Option C describes a "vulnerability" (ISO/IEC 27000:2018, Clause 3.67).

\* Option D refers to "residual risk" (ISO/IEC 27000:2018, Clause 3.61).

The standard emphasizes that threats exploit vulnerabilities, causing incidents that can harm information confidentiality, integrity, and availability. Correctly identifying threats is critical for risk assessment (Clause 6.1.2). Thus, the correct definition per ISO/IEC 27000 is A.

#### **NEW QUESTION # 32**

Identify the missing words in the following sentence.

The organization shall establish, implement, maintain and [ ? ] an information security management system, including the processes needed and their interactions, in accordance with the requirements of this document.

- A. enforce standards for
- B. report on
- C. communicate the importance of
- D. continually improve

**Answer: D**

Explanation:

Clause 4.4 of ISO/IEC 27001:2022 states:

"The organization shall establish, implement, maintain and continually improve an information security management system, including the processes needed and their interactions, in accordance with the requirements of this document." This requirement highlights that an ISMS is not static; it must evolve continuously to adapt to new risks, technologies, and business changes. Options A, C, and D are not mentioned in the clause. The continual improvement cycle is central to ISO standards, aligning with the Plan-Do-Check-Act (PDCA) model.

Thus, the missing words are "continually improve."

### NEW QUESTION # 33

Which factor is required to be determined when understanding the organization and its context?

- A. Internal issues affecting the purpose of the ISMS
- B. The processes that will be required to operate the ISMS
- C. The ISO/IEC 27001 clauses which apply to the management system
- D. The information security objectives relevant to the ISMS

**Answer: A**

Explanation:

Clause 4.1 specifies exactly what must be determined when establishing context: "The organization shall determine external and internal issues that are relevant to its purpose and that affect its ability to achieve the intended outcome(s) of its information security management system." This requirement is about understanding internal and external issues (e.g., culture, capabilities, regulatory environment) that influence the ISMS's effectiveness. Objectives (option B) are addressed later in Clause 6.2; processes (option C) are addressed in Clause 4.4 and operational planning; and "which clauses apply" (option D) is not a determination step-ISO/IEC 27001's requirements in Clauses 4-10 are not optional. Therefore, the direct, required factor per 4.1 is determining internal (and external) issues relevant to the organization's purpose and ISMS outcomes.

### NEW QUESTION # 34

Which ISMS documentation is part of the minimum scope of documented information required to be managed and controlled?

- A. The budget assigned to operate the ISMS and its related allocations
- B. Records of management decisions related to continual improvement
- C. A statement of correspondence between other ISO standards and the ISMS
- D. Third party information security awareness materials

**Answer: B**

Explanation:

Clause 7.5 (Documented Information) specifies that organizations must maintain documentation necessary for the effectiveness of the ISMS. Additionally, Clause 9.3 (Management Review) requires "records of decisions related to continual improvement opportunities" as an output of management review. This is a core requirement and forms part of the documented information that must be retained and controlled. Third- party materials (B), budgets (C), and cross-reference statements to other ISO standards (D) are not required by ISO/IEC 27001. Only documents that directly demonstrate compliance, decision-making, and continual improvement are mandated. Therefore, the verified minimum required documentation includes records of management review decisions related to continual improvement, confirming answer: A.

## NEW QUESTION # 35

You may feel astonished and doubtful about this figure, but we do make our ISO-IEC-27001-Foundation exam dumps well received by most customers. Better still, the 98-99% pass rate has helped most of the candidates get the certification successfully, which is far beyond that of others in this field. In recent years, supported by our professional expert team, our ISO-IEC-27001-Foundation test braindumps have grown up and have made huge progress. Our ISO-IEC-27001-Foundation Exam Dumps strive for providing you a comfortable study platform and continuously explore more functions to meet every customer's requirements. We may foresee the prosperous talent market with more and more workers attempting to reach a high level through the APMG-International certification.
