Pass Guaranteed Quiz 2026 AWS-Developer: AWS Certified Developer

Associate Exam (DVA-C02) Updated Certification

Our AWS-Developer latest preparation materials provide users with three different versions, including a PDF version, a software version, and an online version. Although involved three versions of the AWS-Developer teaching content is the same, but for all types of users can realize their own needs, whether it is which version of AWS-Developer Learning Materials, believe that can give the user a better AWS-Developer learning experience. Below, I would like to introduce you to the main advantages of our research materials, and I'm sure you won't want to miss it.

Amazon AWS Certified Developer Associate Exam (DVA-C02) Sample Questions (Q316-Q321):

NEW QUESTION # 316

A development team decides to adopt a continuous integration/continuous delivery (CI/CD) process using AWS CodePipeline and AWS CodeCommit for a new application. However, management wants a person to review and approve the code before it is deployed to production

How can the development team add a manual approver to the CI/CD pipeline?

- A. If approved, add an approved tag when pushing changes to the CodeCommit repository. CodePipeline will proceed to build and deploy approved commits without interruption
- B. Add an approval step to CodeCommit Commits will not be saved until approved.
- **C. Add an approval action to the pipeline. Configure the approval action to publish to an Amazon SNS topic when approval is required. The pipeline execution will stop and wait for an approval**
- D. Use AWS SES to send an email to approvers when their action is required Develop a simple application that allows approvers to accept or reject a build Invoke an AWS Lambda function to advance the pipeline when a build is accepted

Answer: C

NEW QUESTION # 317

A company maintains an application that uses an Amazon RDS DB instance for its database. A developer needs to implement encryption at rest for the database.

Which combination of steps should the developer take to meet this requirement? (Choose two.)

- A. Stop the DB instance.
- **B. Restore the DB instance from the encrypted snapshot.**
- C. Enable encryption on the DB instance in the AWS Management Console.
- D. Create a customer managed key in AWS Key Management Service (AWS KMS).
- **E. Take a snapshot of the DB instance, and create an encrypted copy of the snapshot.**

Answer: B,E

Explanation:

Expalantion:

<https://docs.aws.amazon.com/AmazonRDS/latest/UserGuide/Overview.Encryption.html>

NEW QUESTION # 318

An application is processing clickstream data using Amazon Kinesis. The clickstream data feed into Kinesis experiences periodic spikes. The PutRecords API call occasionally fails and the logs show that the failed call returns the response shown below.

Which techniques will help mitigate this exception? (Select TWO.)

- A. Reduce the number of KCL consumers.
- B. Use Amazon SNS instead of Kinesis.
- **C. Implement retries with exponential backoff**
- D. Use a PutRecord API instead of PutRecords
- **E. Reduce the frequency and/or size of the requests**

Answer: C,E

NEW QUESTION # 319

In AWS Elastic Beanstalk, if the application returns any response other than 200 ,OK or there is no response within the configured InactivityTimeout period, _____.

- A. SQS once again makes the message visible in the queue and available for another attempt at processing
- B. SQS waits for another timeout
- C. SQS sends a message to the application with the MessageID and pending status
- D. SQS run DeleteMessagecall and deletes the message from the queue

Answer: A

Explanation:

In AWS Elastic Beanstalk, if the application returns any response other than 200, OK or there is no response within the configured InactivityTimeout period, SQS once again makes the message visible in the queue and available for another attempt at processing.

NEW QUESTION # 320

All IP addresses within a 10.0.0.0/16 VPC are fully utilized with application servers across two Availability Zones. The application servers need to send frequent UDP probes to a single central authentication server on the Internet to confirm that is running up-to-date packages. The network is designed for application servers to use a single NAT gateway for internal access. Testing reveals that a few of the servers are unable to communicate with the authentication server.

- A. The NAT gateway does not support UDP traffic.
- B. The NAT gateway cannot allocate more ports.
- C. The NAT gateway is launched in a private subnet.
- D. The authentication server is not accepting traffic.

Answer: B

NEW QUESTION # 321

.....

In the process of preparing the passing test, our AWS-Developer guide materials and service will give you the oriented assistance. We can save your time and energy to arrange time schedule, search relevant books and document, ask the authorized person. As our AWS-Developer Study Materials are surely valid and high-efficiency, you should select us if you really want to pass AWS-Developer exam one-shot. With so many advantages of our AWS-Developer training engine to help you enhance your strength, why not have a try?
