

VMware 2V0-16.25専門知識訓練 & 2V0-16.25認定試験

無料でクラウドストレージから最新のPass4Test 2V0-16.25 PDFダンプをダウンロードする：<https://drive.google.com/open?id=1hImvNTIhWg5QQgDBD4BYofCyFMhr97gl>

我々は2V0-16.25試験を準備しているあなたに便利をもたらすために、PDF版、ソフト版、オンライン版の3つの異なるバージョンを提供しています。PDF版の2V0-16.25問題集を利用したら、紙でプリントすることができて読みやすいです。ソフト版であなたは試験の環境で2V0-16.25模擬試験をすることができて複数のパソコンで使用することができます。また、オンライン版を通して、どの電子製品でも使うことができ、オンライン版の機能はソフト版のと大体同じです。

VMware 2V0-16.25 認定試験の出題範囲：

トピック	出題範囲
トピック 1	<ul style="list-style-type: none">IT Architectures, Technologies, Standards: This section of the exam measures the understanding of IT Infrastructure Architects and covers foundational concepts of architectures, emerging technologies, and industry standards. Although no testable objectives are listed here, it establishes the baseline knowledge needed to interpret and design VMware-related environments effectively.
トピック 2	<ul style="list-style-type: none">Plan and Design the VMware by Broadcom Solution: This section of the exam measures the ability of VMware Solution Architects to plan and design solutions. While there are no specific testable objectives included, the focus is on preparing professionals to design VMware-based solutions that align with organizational goals and best practices.
トピック 3	<ul style="list-style-type: none">Troubleshoot and Optimize the VMware Solution: This section of the exam measures the ability of Systems Engineers to troubleshoot and optimize VMware-based environments. While no explicit testable objectives are listed, candidates are expected to apply their problem-solving skills to diagnose, resolve, and enhance VMware solutions for improved reliability and performance.
トピック 4	<ul style="list-style-type: none">VMware vSphere Foundation Fundamentals: This section of the exam measures the skills of Virtualization Engineers and focuses on the essentials of virtualization technology. It introduces the principles of virtualization, explores use cases, and highlights the value it brings to businesses. Candidates are expected to demonstrate knowledge of VMware compute components such as vCenter and ESX, cluster configuration, and lifecycle management of virtual machines. It also covers secure workload operations, encryption, and managing resources with content libraries. In addition, storage fundamentals are examined through configuring vSphere storage, deploying VMware vSAN clusters, defining storage policies, and ensuring data availability. Networking fundamentals are also introduced, requiring the ability to differentiate between VMware vSphere networking components.

トピック 5	<ul style="list-style-type: none"> • Deploy, Configure, and Operate VMware vSphere Foundation (VVF): This section of the exam measures the expertise of Data Center Administrators and emphasizes hands-on skills in deploying and configuring VMware vSphere Foundation environments. Candidates must understand the components of a VVF deployment, configure Supervisors within clusters, and manage identity, access control, licensing, and certificate management. The objectives also extend to lifecycle management within the vSphere Foundation. Furthermore, it explores operational tasks including monitoring and analyzing logs, configuring alerting, managing dashboards, and integrating with VMware Cloud Foundation (VCF) Operations. Candidates will also be tested on cost and pricing configuration, compliance monitoring, and security hardening practices. Finally, automation skills are validated through deploying services with Supervisors, running Kubernetes workloads, using VM services, and integrating VCF Operations Orchestrator to support enterprise automation.

痛みも利益もないことは世界中でよく知られている真実です。別のことわざには、耕すほど得るものが増えるというものがあります。あらゆる分野で広く認められている2V0-16.25 試験に合格し、2V0-16.25 証明書を取得すると、新しいキャリアの扉が開かれ、未来は明るく希望に満ちたものになります。当社の2V0-16.25 ガイド急流は、証明書を取得するのに役立つ最高のアシスタントになります。2V0-16.25 ガイド急流を学習したいときはいつでも障害に遭遇しないと信じています。

VMware vSphere Foundation 9.0 Administrator 認定 2V0-16.25 試験問題 (Q47-Q52):

質問 # 47

What are the two methods to add a widget to a VMware Cloud Foundation (VCF) Operations for Logs dashboard? (Choose two.)

- A. Clone the widget from an existing dashboard.
- B. Open Management Pack Builder and clone the widget.
- C. Import the widget in the dashboard design pane.
- **D. Drag and drop the widget in the dashboard design pane.**
- **E. Create the widget in Explore Logs and click Add to Dashboard.**

正解: D、E

解説:

Two supported methods exist for adding widgets to VCF Operations for Logs dashboards:

* From Explore Logs- Create a widget (e.g., query result) and select Add to Dashboard. (B)

* Dashboard Design Pane- Use the design interface to drag and drop widgets. (C) Other options:

* A. Clone widget from existing dashboard# Not a supported method.

* D. Import widget in design pane# Import is for dashboards, not individual widgets.

* E. Management Pack Builder# Not related to Logs dashboard widgets.

質問 # 48

The security team requests the ability to log into VMware vCenter and review datacenter, cluster and network configurations. The following details are provided:

* The security team is not authorized to make any changes to the environment.

* Each user must login with unique credentials.

What steps should the administrator perform to grant access to the security team?

- A. Create a security user, assign the user the Read-Only role, share the credentials with the security team.

- B. Create a group for the security team, add the users to the group, and assign the group the Read-Only role.
- C. Share the password for 'administrator@vsphere.local' with the security team.
- D. Create a group for the security team, add the users to the group, and assign the group the Network Administrator role.

正解: B

解説:

The security team requires visibility into vCenter configurations but must not make changes.

* Best practice is to create an Active Directory or vCenter group, add the security users, and assign them the Read-Only role at the datacenter/cluster/network level.

* This ensures each user logs in with unique credentials, maintaining accountability.

Why others are incorrect:

* A. Share administrator@vsphere.local password# Violates security best practices.

* B. Create a single user and share credentials# Still insecure, lacks unique audit trails.

* C. Assign Network Administrator role# Grants configuration permissions, not allowed.

質問 # 49

An administrator is tasked to deploy a large-scale VDI environment on a VMware vSAN Original Storage Architecture (OSA) cluster.

Which vSAN feature is required to achieve maximum storage space reduction in this cluster?

- A. Deduplication and Compression.
- B. Disable Object Checksum.
- C. Object space reservation.
- D. Compression only.

正解: A

解説:

In vSAN Original Storage Architecture (OSA) cluster, the feature that provides the maximum storage space reduction is Deduplication and Compression.

* Deduplication removes duplicate blocks across the cluster.

* Compression further reduces the space used by unique blocks.

* These are applied at the disk group level and are essential in VDI environments where identical VM images consume space.

Why others are incorrect:

* A. Disable Object Checksum# Only reduces CPU overhead, not storage space.

* C. Object space reservation# Controls reserved capacity, not reduction.

* D. Compression only# Reduces space, but less than Deduplication + Compression combined.

質問 # 50

An administrator is tasked with developing an automated, repeatable process to:

* Connect to the corporate Active Directory and create a Windows computer object in a defined Organizational Unit.

* Connect to the target vCenter and create a Windows VM from a template.

* Power on the VM and join it to the corporate domain.

Which VMware vSphere Foundation (VVF) component is best suited for this task?

- A. VCF Operations Orchestrator
- B. VCF CLI
- C. vSphere Supervisor
- D. VCF Operations

正解: A

解説:

The scenario describes an automated, repeatable workflow:

- * Create an AD computer object.
- * Deploy a VM from a template.
- * Power on the VM and join domain.

The correct tool is VCF Operations Orchestrator (formerly vRealize Orchestrator), which:

- * Provides automation and integration with Active Directory and vCenter APIs.
- * Can execute workflows for VM provisioning and domain joining.

Other options:

- * A. vSphere Supervisor# Kubernetes workload management, not AD/VM automation.
- * B. VCF Operations# Monitoring and analytics, not workflow automation.
- * C. VCF CLI# Useful for manual scripting but not suited for automated workflows.

References:

質問 # 51

An administrator is tasked to create a new view in VMware Cloud Foundation (VCF) Operations to monitor CPU demand on ESX hosts, including the historical and forecast data.

Which view type is appropriate to display such information?

- A. Text
- B. Table
- **C. Trend**
- D. Distribution

正解: C

解説:

In VCF Operations, when monitoring metrics like CPU demand across ESX hosts, including historical usage and forecast data, the best visualization is a Trend view.

- * Trend views display data over time, showing both past and predicted future behavior.
- * This makes them ideal for capacity planning, performance forecasting, and demand analysis.
- * Table (A)# Shows raw values but lacks predictive visualization.
- * Distribution (B)# Useful for comparing values across objects but not for time-based or forecasted trends.
- * Text (C)# Displays static values or metrics, not historical/forecasting data.
