Topic 4	<ul style="list-style-type: none"> <li>• Self Confidence: Self-confidence is the belief in one's abilities, competence, and value, reflecting a sense of assurance and inner strength.</li> </ul>
Topic 5	<ul style="list-style-type: none"> <li>• Framework Design: Framework design is the process of developing a reusable structural foundation that supports and guides the creation and organization of software systems.</li> </ul>
Topic 6	<ul style="list-style-type: none"> <li>• Continuous Improvement Process (CI, CIP): A continuous or continual improvement process (CIP or CI) involves ongoing, systematic efforts to enhance products, services, or operational processes to achieve higher efficiency and effectiveness over time.</li> </ul>
Topic 7	<ul style="list-style-type: none"> <li>• Compliance: Regulatory compliance refers to an organization's commitment to understanding and adhering to applicable laws, policies, and regulations to operate within established legal and ethical standards.</li> </ul>
Topic 8	<ul style="list-style-type: none"> <li>• Information Management (IM): Information management (IM) encompasses the entire lifecycle of information within an organization—from its collection and storage to its distribution, use, and eventual archiving or disposal.</li> </ul>

## APMG-International ISO/IEC 27001 (2022) Foundation Exam Sample Questions (Q41-Q46):

### NEW QUESTION # 41

Which action is an organization required to take to ensure that personnel are competent to perform their assigned tasks within the ISMS?

- A. Identify products which could be used in the organization to improve ISMS performance and effectiveness
- **B. Hold up-to-date records on training, skills, experience and qualifications**
- C. Ensure that the controls for compliance with legal and contractual requirements are implemented
- D. Ensure all personnel are trained to ISO/IEC 27001 Foundation level

**Answer: B**

Explanation:

Clause 7.2 (Competence) requires the organization to:

\* "determine the necessary competence of person(s) doing work under its control that affects its information security performance;"

\* "ensure that these persons are competent on the basis of appropriate education, training, or experience;"

\* "retain appropriate documented information as evidence of competence." This makes holding up-to-date records on training, skills, experience, and qualifications (D) the correct answer. Option A is irrelevant to competence. Option B is incorrect since ISO does not require Foundation-level training - competence is context-based. Option C is related to compliance but does not ensure individual competence.

Thus, the verified correct answer is D.

### NEW QUESTION # 42

Which statement describes a requirement of an internal audit programme?

- A. The programme must use third party auditors to ensure impartiality
- B. All processes must be audited within a 3-year cycle

- C. The programme must consider the importance of the target processes
- D. Previous audit results are disregarded to ensure objectivity

**Answer: C**

Explanation:

Clause 9.2.2 of ISO/IEC 27001:2022 specifies requirements for the internal audit programme. It requires organizations to: "Plan, establish, implement and maintain an audit programme(s) including the frequency, methods, responsibilities, planning requirements and reporting, which shall take into consideration the importance of the processes concerned, changes affecting the organization, and the results of previous audits." This makes option C correct, since importance of the processes is a required factor. Option A is incorrect because audits do not need third-party auditors; objectivity can be maintained internally if independence is respected. Option B is wrong because previous audit results must be considered, not disregarded. Option D is also incorrect - the standard does not specify a 3-year cycle; frequency depends on risks and needs. Thus, the correct verified answer is C.

### NEW QUESTION # 43

What is the definition of a threat according to ISO/IEC 27000?

- A. A weakness of an asset or a control that can be exploited
- B. A single or a series of unwanted or unexpected information security events
- C. A potential cause of an unwanted incident which can result in harm to a system or organization
- D. The risk remaining after risk treatment

**Answer: C**

Explanation:

Comprehensive and Detailed Explanation From Exact Extract ISO/IEC 27000 standards:

According to ISO/IEC 27000:2018, Clause 3.74, a threat is defined as:

"Potential cause of an unwanted incident, which can result in harm to a system or organization." This definition directly matches option A.

\* Option B refers to an "information security incident" (ISO/IEC 27000:2018, Clause 3.32).

\* Option C describes a "vulnerability" (ISO/IEC 27000:2018, Clause 3.67).

\* Option D refers to "residual risk" (ISO/IEC 27000:2018, Clause 3.61).

The standard emphasizes that threats exploit vulnerabilities, causing incidents that can harm information confidentiality, integrity, and availability. Correctly identifying threats is critical for risk assessment (Clause 6.1.2). Thus, the correct definition per ISO/IEC 27000 is A.

### NEW QUESTION # 44

Which benefit is NOT relevant by implementing an ISMS for an organization?

- A. Information security compliance will increase stakeholder trust in the organization
- B. Information security controls are tailored to suit the organization's specific circumstances
- C. Information security risks are assessed and the probability and/or impact reduced
- D. Information security staff will be qualified to ISO/IEC 27001 Foundation level

**Answer: D**

Explanation:

The benefits of implementing an ISMS under ISO/IEC 27001 are well established. Clause 0.1 (General) explains that an ISMS provides a systematic approach to managing sensitive information and "preserves confidentiality, integrity, and availability of information by applying a risk management process and gives confidence to interested parties that risks are adequately managed." Option A is correct as a benefit, since trust and confidence from stakeholders is an outcome of compliance.

Option C is also a benefit, since controls are chosen and tailored based on organizational context and risk assessment (Clause 6.1.3). Option D reflects another real benefit-reducing the probability and/or impact of incidents through effective risk management. However, staff qualifications (option B) are not guaranteed benefits of implementing an ISMS. While training and competence (Clause 7.2) are required, the standard does not require or provide ISO/IEC 27001 Foundation-level certification for staff. That is an external training/certification scheme, not an ISMS outcome.

Therefore, the benefit NOT relevant to implementing ISO/IEC 27001 is B.

### NEW QUESTION # 45

Which statement describes the control for the Compliance with policies, rules and standards for information security within Annex A of ISO/IEC 27001?

- A. Regular review of contractual compliance
- **B. Regular review of compliance**
- C. Return assets to their legal owners
- D. Maintain contact with legal authorities

**Answer: B**

Explanation:

Comprehensive and Detailed Explanation From Exact Extract ISO/IEC 27002:2022 standards:

Annex A.5.36 (Compliance with policies, rules and standards for information security) requires:

"Compliance with the organization's information security policies, rules and standards for information security should be regularly reviewed." This directly matches option A. Option B refers to contractual compliance, which is part of supplier management controls (Annex A.5.19). Option C relates to Annex A.5.7 (Contact with authorities). Option D refers to asset return controls (Annex A.5.9).

Thus, the correct answer is A.

### NEW QUESTION # 46

.....

when you buy our ISO-IEC-27001-Foundation simulating exam, our website will use professional technology to encrypt the privacy of every user to prevent hackers from stealing. We believe that business can last only if we fully consider it for our customers, so we will never do anything that will damage our reputation. Hope you can give our ISO-IEC-27001-Foundation Exam Questions full trust, we will not disappoint you. And with our ISO-IEC-27001-Foundation study materials, you are bound to pass the exam.
