## **Analytics-Con-201 Trustworthy Dumps | Analytics-Con-201 Latest Test Prep**

TrainingQuiz is a website engaged in the providing customer Analytics-Con-201 VCE Dumps and makes sure every candidates passing actual test easily and quickly. We have a team of IT workers who have rich experience in the study of Salesforce dumps torrent and they check the updating of Salesforce top questions everyday to ensure the accuracy of exam collection.

### **Salesforce Certified CRM Analytics and Einstein Discovery Consultant Sample Questions (Q86-Q91):**

#### **NEW QUESTION # 86**

A CRM Analytics consultant has been asked to refactor a dashboard so that it loads quicker. After some analysis, the consultant found that most of the dashboard queries run in less than 5 seconds; however, the Opportunities Table takes more time to load when scrolled down from its initial view.

How should the consultant improve the performance of this dashboard?

- A. Create a Visualforce page and display a list view of the Opportunities on this new page.
- **B. Create a second page on the dashboard and move the table to this new page.**
- C. Create a second dashboard and move the table to this new dashboard.

**Answer: B**

#### NEW QUESTION # 87

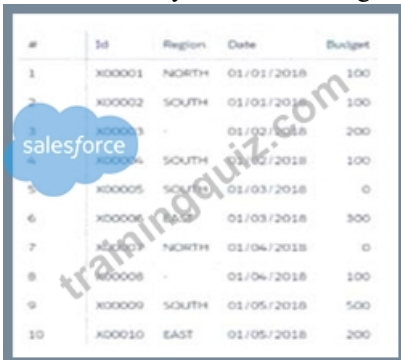

A system administrator and a CRM Analytics consultant are working together on deploying a recipe/dataflow and a dataset to another org. Prior to this deployment, a package was deployed with all the custom fields used in the dataflow and dataset. While running the recipe/dataflow in the target environment, the consultant encounters multiple errors related to these custom fields. How should this be resolved?

- A. Check whether the system administrator has been provided access to these custom fields on the target org.
- B. Check whether the consultant has been provided access to these custom fields on the target org.
- **C. Check whether the Analytics Integration user has been provided access to these custom fields on the target org.**

**Answer: C**

#### NEW QUESTION # 88

Universal Containers (UC) creates a dataset, "Book11", containing a budget per region per month for the first 6 months of the year, as shown in the graphic below. Now, UC wants to create a lens showing the total budget for each region for each month. Every combination of region and month must be shown in the lens, even if there is no data.

#	Id	Region	Date	Budget
1	X00001	NORTH	01/01/2018	100
2	X00002	SOUTH	01/01/2018	100
3	X00003	-	01/02/2018	200
4	X00004	SOUTH	01/02/2018	100
5	X00005	SOUTH	01/03/2018	0
6	X00006	-	01/03/2018	300
7	X00007	NORTH	01/04/2018	0
8	X00008	-	01/04/2018	100
9	X00009	SOUTH	01/05/2018	500
10	X00010	EAST	01/05/2018	200

How should a CRM Analytics consultant help UC build this lens?

- A. Use a "Compare Table" and use the "Show Totals" option.
- B. Use a "fill" statement in SAQL query with a "partition" parameter.
- **C. Use a "Compare Table" and add a column leveraging the "Running Total" function.**

**Answer: C**

#### NEW QUESTION # 89

Universal Containers asks a CRM Analytics consultant to review the performance of its local data sync. After removing unused objects and fields from connected data, what else should the consultant do to improve performance of the data sync?

- A. Enable fast sync in analytics settings.
- **B. Evaluate connection mode for each connected object.**
- C. Contact Salesforce Support to increase sync speed.

**Answer: B**

Explanation:

To improve the performance of local data sync in Universal Containers, evaluating the connection mode for each connected object is a practical approach. Here's the rationale:

\* **Optimization of Resources:** Different connection modes (e.g., Full Sync, Incremental Sync) use different amounts of resources. Choosing the right mode for each object based on how frequently its data changes can optimize the sync process and reduce load times.

\* **Efficient Data Handling:** By tailoring the connection mode to the needs of specific data objects, the overall efficiency of the data sync process is improved, leading to faster refresh rates and more timely data availability.

\* **Cost and Performance Balance:** Evaluating and selecting the appropriate connection mode can also help balance performance needs with cost constraints, as some modes may consume more compute resources than others.

#### **NEW QUESTION # 90**

Cloud Kicks needs a CRM Analytics consultant to install the Appointment Analytics App. After installation, they realize the wrong field was picked and the app did not have access to a newly created field that should be used instead of the old one.

What is the first step the consultant should take to prevent erroneous dataset/dashboard creation?

- A. Update the app with the new field after installation.
- **B. Stop the recipe from running in Data Manager.**
- C. Cancel running installations from Setup

**Answer: B**

Explanation:

If the wrong field is selected in the initial setup of an app or dataset, it is important to stop any data processing activities (like recipe executions) to prevent erroneous data from being loaded into datasets and dashboards. In this case, stopping the recipe from running in Data Manager is the correct first step. Once the recipe is stopped, the consultant can update the field selection or make other necessary corrections before restarting the process.

#### **NEW QUESTION # 91**

.....

To help our customer know our Analytics-Con-201 exam questions better, we have carried out many regulations which concern service most. You can ask what you want to know about our Analytics-Con-201 study guide. Once you submit your questions, we will soon give you detailed explanations. Even you come across troubles during practice the Analytics-Con-201 Learning Materials; we will also help you solve the problems. We are willing to deal with your problems. So just come to contact us.
