- A. The display order in the droop down matches the order defined in the enumeration file

NEW QUESTION # 49

- A. The customer already has an SAP Ariba Strategic Sourcing suite solution deployed
- B. The Test site has been configured using the SAP Bluefield template
- C. Many team members have a naive perception of deploying software solutions
- D. The Production site may have live transactions

Answer: A,D

Explanation:
ABluefield deploymentmeans the customer already has an SAP Ariba solution deployed (B), and the production system may be live with ongoing transactions (C). This requires careful, incremental migration to avoid disruption. There is no specific "Bluefield template" for test sites (D), and team perceptions (A) are irrelevant.

NEW QUESTION # 50
You have a custom string field with a list of values. The values are represented as an Enumeration. Which of the following applies?

- A. The user can filter the values using the search box in the chooser
- B. The display order in the drop down matches the order defined in the enumeration file
- C. The display order of the values is alphabetical
- D. In the enumeration file, the Value column must only contain whole numbers

Answer: B

Explanation:
Forsingle-select enumeration fields, the dropdown list order in SAP Ariba exactly follows the order in which values are defined in the enumeration file, not alphabetical. Alphabetical sorting applies only to multi-select chooser fields. The Value column can be text or integers depending on field type, and search/filter boxes are available only on chooser (multi-select) fields, not single-select dropdowns.

NEW QUESTION # 51
