You can download our C-TS422-2023 guide torrent immediately after you pay successfully. After you pay successfully you will receive the mails sent by our system in 10-15 minutes. Then you can click on the links and log in and you will use our software to learn our C-TS422-2023 prep torrent immediately. Not only our C-TS422-2023 Test Prep provide the best learning for them but also the purchase is convenient because the learners can immediately learn our C-TS422-2023 prep torrent after the purchase. So the using and the purchase are very fast and convenient for the learners

If you do not receive our C-TS422-2023 exam questions after purchase, please contact our staff and we will deal with your problem immediately. The download process of C-TS422-2023 practice engine does not take you a long time. We have some of the best engineers in the industry, and the system they build will guarantee you a smooth download of our C-TS422-2023 Guide questions. After that, please arrange your own study time. Together with our C-TS422-2023 practice engine, start your own learning journey.

100% Pass Quiz 2026 SAP C-TS422-2023: SAP S/4HANA Cloud Private Edition - Production Planning and Manufacturing Newest Exam Materials

TestSimulate are specialized in providing our customers with the most reliable and accurate C-TS422-2023 exam guide and help them pass their C-TS422-2023 exams by achieve their satisfied scores. With our C-TS422-2023 study materials, your exam will be

a piece of cake. We have a lasting and sustainable cooperation with customers who are willing to purchase our C-TS422-2023 Actual Exam. We try our best to renovate and update our C-TS422-2023 study materials in order to help you fill the knowledge gap during your learning process, thus increasing your confidence and success rate.

SAP S/4HANA Cloud Private Edition - Production Planning and Manufacturing Sample Questions (Q62-Q67):

NEW QUESTION # 62

How can you set up the supply source for the Kanban process in SAP S/4HANA Cloud Private Edition?

Note: There are 3 correct answers to this question.

- A. Use run schedule quantities for inhouse production.
- B. Use quotations for internal external procurement.
- C. Use purchase orders for external procurement.
- D. Use purchasing costs for automated source prioritization.
- E. Use stock transfer reservations for stock transfer.

Answer: A,C,E

NEW QUESTION # 63

You want to set up a make-to-order planning scenario for a finished product. The bill of material contains two components: one should be procured for each sales order individually, and the other should be procured jointly for all independent requirements. Forecasting for the finished product is NOT possible. Which settings do you make to achieve this?

- A. Choose planning strategy 20 (Make-to-Order) and select the corresponding Individual/Collective indicator.
- B. Choose planning strategy 20 (Make-to-Order) and select the corresponding Mixed MRP indicator.
- C. Choose planning strategy 50 (Planning without final assembly) and select the corresponding Individual /Collective indicator.
- D. Choose planning strategy 50 (Planning without final assembly) and select the corresponding Mixed MRP indicator.

Answer: A

Explanation:

For a make-to-order (MTO) scenario in SAP S/4HANA without forecasting, where components have different procurement behaviors:

* Choose planning strategy 20 (Make-to-Order) and select the corresponding Individual/Collective indicator(D): Strategy 20 (material master, MRP 3 view, Strategy Group: 20) is pure MTO, where production is triggered by sales orders (VA01) without PIRs-fitting the "no forecasting" requirement.

The Individual/Collective indicator(material master, MRP 4 view, field: Ind./Coll.) is set to "1" (Individual Requirements) for the component procured per sales order, generating separate dependent requirements per order, and "2"(Collective Requirements) for the component procured jointly, aggregating requirements across all orders into a single planned order or requisition.

Planning strategy 50 (Planning without final assembly)(A, C) relies on PIRs for subassemblies, conflicting with the "no forecasting" condition.Mixed MRP indicator(B, C) (MRP 4 view) applies to mixed MTS/MTO scenarios (e.g., strategy 11), not pure MTO, and doesn't address the individual/collective split directly.

Strategy 20 with the indicator meets SAP's MTO configuration standards.

NEW QUESTION # 64

What time element of midpoint scheduled operations can be reduced by reduction strategy settings while dispatching? Note: There are 2 correct answers to this question

- A. Teardown time
- B. Setup Time
- C. Move time
- D. Queue

Answer: A,B

Explanation:

The time element of midpoint scheduled operations that can be reduced by reduction strategy settings while dispatching are

teardown time and setup time. Teardown time is the time required to dismantle the production equipment after the operation is completed. Setup time is the time required to prepare the production equipment before the operation is started. Both teardown time and setup time can be influenced by the reduction strategy settings, which define the percentage of reduction and the minimum duration for each time element. The reduction strategy settings can be maintained in the work center or the routing. The system applies the reduction strategy settings when dispatching the operations to the resources in the planning board or the product view. Reference: SAP S/4HANA Manufacturing for Planning & Scheduling - Implementation Guide, page 32; [SAP S/4HANA Production Planning and Manufacturing Certification Guide], page 81.

NEW QUESTION # 65

Generic Parent » Generic 1 pt

What is the purpose of collective orders?

- A. To manage production orders for an entire finished product on multiple levels
- B. To combine order management of co-products and by-products with the main product
- C. To post production costs on a cost collector instead of the production order
- D. To post any component withdrawal as single backflush with order confirmation

Answer: A

Explanation:

Collective orders are used to represent multilevel production structures for materials produced in-house, where the manufacturing order for the highest material in the structure automatically generates manufacturing orders for the semifinished products in the structure. This allows for an integrated view of the production process and avoids unnecessary placements in storage or removals from storage between production levels. Collective orders can consist of planned orders, production orders, or process orders, and each order has its own order number. Collective orders can be processed with or without automatic goods movements, depending on the business scenario. NEW QUESTION # 66

Which of the following are possible configuration steps when setting up the alert monitor in Advanced Planning? Note: There are 2 correct answers to this question.

- A. Create an object selection variant for production-planning-related alerts.
- B. Create an object selection variant for alerts according to the priority of ATP categories.
- C. Assign the overall profile to the authorization profile.
- D. Assign the alert profile to the overall profile.

Answer: A,D

Explanation:

The Alert Monitor in SAP S/4HANA PP/DS (transaction /SAPAPO/AMON1) highlights planning issues.

Configuration steps include:

* Assign the alert profile to the overall profile(A): In Customizing (/SAPAPO/ALERT_PROFILE), you define an alert profile (e.g., specifying alert types like capacity overload) and assign it to an overall profile (e.g., in /SAPAPO/CDPSC11). This links alert settings to planning applications (e.g., Planning Board).

* Create an object selection variant for production-planning-related alerts(D): You create a variant (e.g., in /SAPAPO/AMON_SETTING) to filter objects (e.g., materials, resources) for which alerts are monitored, tailoring it to production planning issues (e.g., late orders, shortages).

Assign the overall profile to the authorization profile(B) is incorrect-overall profiles link to planning, not authorization (handled via PFCG roles). Object selection variant for ATP categories(C) relates to availability checks, not production planning alerts, which focus on PP/DS issues. This is per SAP's Alert Monitor setup.

NEW QUESTION # 67

.....

You will earn the SAP C-TS422-2023 certification on the first try if you use C-TS422-2023 Questions. Our high-quality SAP C-TS422-2023 practice questions preparation material in three formats will help you crack the SAP C-TS422-2023 Exam in one go.

For the SAP C-TS422-2023 exam dumps, we offer SAP C-TS422-2023 PDF questions, desktop C-TS422-2023 practice test software, and web-based C-TS422-2023 practice exam software.
