You can have a try of using the H19-619_V1.0 Prep Guide from our company before you purchase it. We believe that the trial version provided by our company will help you know about our study materials well and make the good choice for yourself. More importantly, the trial version of the H19-619_V1.0 exam questions from our company is free for all people. We believe that the trial version will help you a lot.

Huawei HCSP-Presales-Government Public Services V1.0 Sample Questions (Q58-Q63):

NEW QUESTION # 58

"Easy Handling / 'Good to Handle' (##)" business does not include which scenario?

- A. Government Service Hotline
- B. Certificate-Free Handling
- C. One-Matter-Once Handling
- D. One-Code Handling

Answer: A

Explanation:

"Easy Handling" focuses on reforms that make administrative procedures easier, such as code-based handling, certificate-free handling, and one-matter-once handling. The hotline is mainly a channel for consultation and complaints, not a handling/processing scenario itself.

NEW QUESTION # 59

In consulting and planning services, which of the following is not included in "business planning"?

- A. Business-scenario planning
- B. Business-scope planning
- C. Business-process planning
- D. System-integration planning

Answer: D

Explanation:

Business planning defines goals, scenarios, scope, and processes of the business. System-integration planning belongs to the technical implementation layer, focusing on how systems interconnect, not the business top-level design itself. B, C, and D are all core parts of business planning.

NEW QUESTION # 60

Which of the following is a capability that a dispatch center does not need?

- A. City Operation Middle Platform
- B. Intelligent Dispatch/Distribution Algorithm
- C. City Operation Integrated Platform
- D. Video Intelligent Analysis

Answer: D

Explanation:

A dispatch center mainly needs integrated platforms, middle-platform support, and intelligent dispatch algorithms to coordinate resources and tasks. Video intelligent analysis is more related to monitoring and security scenarios, not a core requirement of the dispatch center's own scheduling capability.

NEW QUESTION # 61

In the Intelligent-Connected collaborative smart parking scenario, which aspects are mainly addressed to solve customer problems?

- A. Difficulty in finding a space; unknown free spots
- B. Regional sharing and interconnection
- C. Need to solve AVP (automated valet parking) one-click summon
- D. Difficulty in reverse car-finding; similar environment leads to getting lost

Answer: A,C,D

Explanation:

The scenario mainly solves reverse car-finding, space-finding with real-time free-slot information, and one-click summon/valet parking problems. "Regional sharing/interconnection" is more of a higher-level ecosystem concept and not a core pain point directly listed here.

NEW QUESTION # 62

"One-Network Unified Management (#####)" means managing everything.

- A. False
- B. True

Answer: A

Explanation:

"One-Network Unified Management" refers to digital integration of urban governance resources, focusing on cross-department collaboration and precise management, not literal control of "everything." It aims for efficiency and accuracy rather than unlimited scope.

NEW QUESTION # 63

.....

The empty promise is not enough.
