CIPS L4M6 Prüfungsplan:

Thema	Einzelheiten
Thema 1	Understand the dynamics of relationships in supply chains: This section of the exam measures the skills of Supply Chain Managers and Procurement Specialists. It covers the different types of commercial relationships in supply chains, including internal and external relationships, the relationship spectrum, and the lifecycle. A key skill measured is the ability to differentiate between various commercial relationships. The section also explores portfolio analysis techniques to assess relationships, using matrices to identify supply, supplier, and purchaser positioning. Candidates are expected to understand competitive forces impacting supply chain relationships, including sources of competitive rivalry and STEEPLED factors.

Thema 2	Understand processes and procedures for working successfully with stakeholders: This section targets Stakeholder Relationship Managers and focuses on organizational procedures for sourcing goods and services. It covers supplier identification, assessment, and selection processes to secure successful relationships. A critical skill measured is analyzing the purpose of organizational procedures in sourcing. The section also compares team management techniques for positive stakeholder relationships, including conflict resolution and working with cross-organizational teams.
Thema 3	Understand the concept of partnering: This section evaluates the skills of Partnership Managers and covers the concept of partnering in supply chains. It analyzes when to use partnering, comparing it with traditional contracting agreements. A key skill assessed is appraising the process of partnership implementation. The section explores types of partnering, drivers, advantages, and suitable circumstances for this approach.

L4M6 Echte Fragen, L4M6 Prüfungsfrage

Wir alle wissen, dass die CIPS L4M6 Zertifizierungsprüfung in der IT-Branche eine zentrale Position darstellt. Aber die Kernfrage ist, dass es schwer ist, ein CIPS L4M6 Zertifikat zu erhalten. Wir wissen genau, dass im Internet relevanten Prüfungsmaterialien von guter Qualität fehlen. Die Examsfragen und Antworten von ZertPruefung können allen an den Zertifizierungsprüfungen teilnehmenden Prüflingen irgendwann die notwendigen Informationen liefern. Wir versprechen Ihnen, dass Sie Ihre CIPS L4M6 Zertifizierungsprüfung einmalig bestehen können.

CIPS Supplier Relationships L4M6 Prüfungsfragen mit Lösungen (Q92-Q97):

92. Frage

A procurement category manager has been asked to advise the project team on the appropriate selection and awarding process for a complex procurement project in a multi-geographical organisation. It is likely the specification will be updated during the process, and several phases of negotiation will be required throughout. This will include final negotiations with the winning bidder. The team are therefore aware it will be a time-consuming project. Which process should be advised?

- **A. Competitive dialogue**
- B. Open tender
- C. Request for quotation
- D. Restricted tender

Antwort: A

Begründung:

Competitive dialogue is the most appropriate method for complex, high-value procurements where requirements cannot be fully defined at the outset. This process allows dialogue with shortlisted bidders to refine specifications and negotiate solutions before awarding. CIPS states that this procedure is particularly suited for projects requiring flexibility, multiple negotiation phases, and innovative input from suppliers.

93. Frage

Under which circumstances would a partnership sourcing approach be used?

- A. 1 and 3 only
- B. 2 and 4 only
- C. 1 and 4 only
- D. 1 and 2 only

Antwort: A

Begründung:

Partnership sourcing is ideal for high-spend, high-risk situations where collaboration mitigates risks and maximizes value through innovation, efficiency, and trust.

94. Frage

A procurement manager has established a project steering committee to undertake regular reviews and audits, and to ensure a successful buyer/supplier long-term partnership. The committee membership will comprise the procurement manager (chairperson), three of their cross-functional colleagues, the supplier's partnership project manager, and an independent member. Which of the following is a potential disadvantage of the proposed committee structure?

- A. The committee includes an independent member
- B. The procurement manager should not be the chairperson of the committee
- C. The size of the committee is too large as there should be a limit of three members
- D. The supplier does not have equal membership in the committee

Antwort: D

Begründung:

Effective partnership governance requires balanced representation from both buyer and supplier. If the supplier has fewer members than the buyer, decision-making power becomes unequal, potentially undermining collaboration.

95. Frage

Which of the following are possible drivers for partnership sourcing? Select THREE.

- A. The need to improve performance to satisfy the end customer To increase production costs and lead- times
- B. The marketplace has become more volatile
- C. Working together will create synergies
- D. The protection of intellectual property rights

Antwort: A,B,C

Begründung:

The correct answers are; The marketplace has become more volatile, Working together will create synergies and The need to improve performance to satisfy the end customer. Further Drivers of Partnership Sourcing can be found on p.127. The other answers are incorrect as entering a partnership won't protect intellectual property rights- in fact that's one of the big risks of entering into a partnership. Partnerships won't increase costs and lead-times, they're likely to decrease them.

96. Frage

National Hospital Trust (NHT) has entered into a partnership relationship with a major facilities management provider. The two organizations have agreed on the approach to undertake regular reviews and audits. The audit approach will include which of the following?

- A. Category management and supplier rationalization
- B. Lessons learned and continuous improvement
- C. Macro and micro environmental analysis
- D. Specification development and management

Antwort: B

Regular reviews focusing on lessons learned and continuous improvement ensure the partnership remains effective and aligned with objectives. This supports ongoing collaboration and operational excellence.
