

# 100-160 Latest Exam Practice Pass Certify | Latest 100-160 Exam Vce: Cisco Certified Support Technician (CCST) Cybersecurity

DOWNLOAD the newest Itexamguide 100-160 PDF dumps from Cloud Storage for free: <https://drive.google.com/open?id=1mh9Z7GLBZnGB3NZr2YaEjRZHbG5Y8TUU>

Over the past few years, we have gathered hundreds of industry experts, defeated countless difficulties, and finally formed a complete learning product - 100-160 Test Answers, which are tailor-made for students who want to obtain Cisco certificates. Our customer service is available 24 hours a day. You can contact us by email or online at any time. In addition, all customer information for purchasing Cisco Certified Support Technician (CCST) Cybersecurity test torrent will be kept strictly confidential. We will not disclose your privacy to any third party, nor will it be used for profit.

## Cisco 100-160 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none"><li>Endpoint Security Concepts: This section of the exam measures the skills of an Endpoint Security Specialist and includes securing individual devices, understanding protections such as antivirus, patching, and access control at the endpoint level, essential for maintaining device integrity.</li></ul>
Topic 2	<ul style="list-style-type: none"><li>Essential Security Principles: This section of the exam measures the skills of a Cybersecurity Technician and covers foundational cybersecurity concepts such as the CIA triad (confidentiality, integrity, availability), along with basic threat types and vulnerabilities, laying the conceptual groundwork for understanding how to protect information systems.</li></ul>
Topic 3	<ul style="list-style-type: none"><li>Vulnerability Assessment and Risk Management: This section of the exam measures the skills of a Risk Management Analyst and entails identifying and assessing vulnerabilities, understanding risk priorities, and applying mitigation strategies that help manage threats proactively within an organization's systems</li></ul>

Topic 4	<ul style="list-style-type: none"> <li>• Basic Network Security Concepts: This section of the exam measures the skills of a Network Defender and focuses on understanding network-level protections, including firewalls, VPNs, and intrusion detection</li> <li>• prevention systems, providing insight into how threats are mitigated within network environments.</li> </ul>
Topic 5	<ul style="list-style-type: none"> <li>• Incident Handling: This section of the exam measures the skills of an Incident Responder and centers on recognizing security incidents, responding appropriately, and containing threats—forming the essential foundation of incident response procedures.</li> </ul>

## 100-160 Exam Vce - 100-160 Test Braindumps

Our 100-160 practice materials are suitable for exam candidates of different degrees, which are compatible whichever level of knowledge you are in this area. These 100-160 training materials win honor for our company, and we treat 100-160 test engine as our utmost privilege to help you achieve your goal. Meanwhile, you cannot divorce theory from practice, but do not worry about it, we have stimulation 100-160 Test Questions for you, and you can both learn and practice at the same time.

## Cisco Certified Support Technician (CCST) Cybersecurity Sample Questions (Q173-Q178):

### NEW QUESTION # 173

What is the purpose of backup in the context of disaster recovery and business continuity?

- A. To replicate data in real-time for immediate failover during a disaster event
- **B. To create a secondary copy of data for future restoration purposes**
- C. To ensure physical security of data storage facilities
- D. To monitor and identify potential risks and threats to critical systems

**Answer: B**

Explanation:

Backup refers to the process of creating and storing a secondary copy of data to be used for restoration purposes in the event of data loss or system failure. It serves as a safeguard against data corruption, accidental deletion, hardware failure, or any other event that may result in the loss of important information.

### NEW QUESTION # 174

Which of the following best describes the relationship between a business continuity plan (BCP) and a disaster recovery plan (DRP)?

- A. A BCP and a DRP are separate and unrelated plans within the realm of cybersecurity
- B. A BCP and a DRP are two different terms for the same plan
- C. A BCP focuses on data backup and restoration, while a DRP focuses on maintaining essential functions during a disaster
- **D. A BCP focuses on maintaining essential functions during a disaster, while a DRP focuses on data backup and restoration**

**Answer: D**

Explanation:

While both business continuity plans (BCPs) and disaster recovery plans (DRPs) are essential components of a comprehensive cybersecurity strategy, they have distinct focuses. A BCP primarily deals with the maintenance of essential functions during a disaster, ensuring business continuity, while a DRP primarily deals with data backup, restoration, and recovery processes. Both plans work in tandem to ensure effective cybersecurity practices during a disaster scenario.

### NEW QUESTION # 175

How can vulnerabilities be discovered in a network or system?

- A. By monitoring network traffic.
- **B. By conducting penetration testing.**
- C. By implementing strong cryptographic protocols.
- D. By using firewalls and antivirus software.

**Answer: B**

Explanation:

Penetration testing, also known as ethical hacking, is a method used to discover vulnerabilities in a network or system. It involves simulating an attack on the system to identify weaknesses and potential entry points for attackers. Penetration testing can help organizations uncover vulnerabilities before they can be exploited by malicious actors.

#### NEW QUESTION # 176

Which of the following is a characteristic of an IPv6 address?

- A. Consists of 32 bits
- B. Can be represented by both decimal and binary notation
- **C. Uses colons as separators**
- D. Supports a maximum of 4.3 billion unique addresses

**Answer: C**

Explanation:

An IPv6 address consists of 128 bits, which is four times the size of an IPv4 address. Unlike IPv4 addresses that use periods (dots) as separators, IPv6 addresses use colons as separators. For example, an IPv6 address could be written as 2001:0db8:85a3:0000:0000:8a2e:0370:7334.

#### NEW QUESTION # 177

Which of the following is an integral part of the CIA triad in cybersecurity?

- A. Firewall
- B. Intrusion Detection System (IDS)
- **C. Two-factor authentication (2FA)**
- D. Data loss prevention (DLP)

**Answer: C**

Explanation:

The CIA triad in cybersecurity stands for confidentiality, integrity, and availability. Two-factor authentication (2FA) ensures confidentiality by adding an extra layer of security, requiring users to provide two forms of authentication before gaining access. It helps protect against unauthorized access and adds an additional level of assurance for ensuring data confidentiality.

#### NEW QUESTION # 178

.....

If you want to study with computer, then you can try our Software or APP ONLINE versions. These two versions of our 100-160 practice guide helps you to test your knowledge and over the exam anxiety. They have various self-assessment and self-learning tools, like timed exam and exam history, test series etc Which help you to manage time during actual 100-160 Exam and arrange multiple tests which you can attempt on different intervals. Also you may improve your test skills by attempting 100-160 exam questions multiple times.
