Exam Cisco 300-540 Questions Pdf & 300-540 Latest Exam Cost

Download Cisco 300-540 Exam Dumps for Best Preparation

Exam : 300-540

Title : Designing and Implementing Cisco Service Provider Cloud Network Infrastructure

https://www.passcert.com/300-540.html

P.S. Free & New 300-540 dumps are available on Google Drive shared by Exam4Tests: https://drive.google.com/open?id=1DXwCaZEGvrUHB65Q4v07FS39yQ9Lgrjm

Our Exam4Tests website has a long history of providing 300-540 test training materials. With many years'hard work, our passing rate of Exam4Tests's 300-540 exam has achieved 100%. In order to make sure that the accuracy of 300-540 test of Exam4Tests, our 300-540 test training materials are continuing update. If you purchase our 300-540 exam dumps, we will offer one year-free update service.

Cisco 300-540 Exam Syllabus Topics:

Topic	Details
Topic 1	• Security: This section of the exam measures the skills of Network Security Engineers and covers the implementation of infrastructure-level protection in cloud and NFVI ecosystems. It includes topics such as ACLs, uRPF, RTBH, router hardening, BGP flowspec, TACACS, and MACSEC. Candidates should understand DoS mitigation methods and apply security practices within NFVI, focusing on API protection, securing the control and management plane, and segmentation strategies in service provider cloud environments. The domain also evaluates basic knowledge of TLS, mTLS, and general cloud security solutions related to DNS protection, zero-day defenses, and malware detection.

Topic 2	• Service Assurance and Optimization: This section of the exam measures the skills of Cloud Operations Engineers and covers assurance mechanisms used to maintain performance, stability, and visibility across NFVI environments. It includes network assurance concepts such as MANO frameworks, VNF workload monitoring, VIM control plane KPIs, and streaming telemetry with gRPC and gNMI. Candidates must understand cloud infrastructure performance monitoring tools, including SR-PM, NetFlow, IPFIX, syslog, SNMP traps, RMON, cloud agents, and automated fault management systems. The domain also touches on diagnosing NFVI-related errors and optimizing VNFs using techniques such as SR-IOV and software-accelerated virtual switching technologies like DPDK and VPP.
Topic 3	• High Availability: This section of the exam measures the skills of Cloud Infrastructure Architects and covers the design and implementation of redundancy and resiliency mechanisms in virtualized network functions and distributed cloud platforms. It includes data plane redundancy for VNFs, high availability within a single VIM control plane, and resilient compute, vNIC, and top-of-rack switching. The exam requires an understanding of multi-homing, EVLAG configurations, virtual private cloud deployment, and ECMP strategies for NFVI integrations with physical routing protocols such as BGP, OSPF, and IS-IS. Candidates must also recommend suitable high-availability models involving DNS, routing, and load balancing.
Topic 4	• Cloud Interconnect: This section of the exam measures the skills of Service Provider Network Engineers and covers how large networks interconnect with cloud platforms and carrier-neutral facilities. Candidates are expected to understand various connectivity options to cloud providers, customer sites, and other neutral facilities, as well as evaluate WAN connectivity models such as direct connect, MPLS or segment routing, and IPsec VPN links. The domain also includes the ability to troubleshoot advanced data center interconnect solutions, including EVPN VXLAN, EVPN over SR • MPLS, ACI-based connectivity, and pseudowire architectures supporting cloud-to-cloud and cloud-to-edge communication.
Topic 5	• Virtualized Architecture: This section of the exam measures the skills of Cloud Network Engineers and covers the foundational concepts of virtualized infrastructures used in modern service provider and cloud environments. Candidates are expected to understand constraints in IaaS designs, determine appropriate cloud service models, and demonstrate awareness of container orchestration compared to traditional virtual machines. The exam also evaluates the ability to implement key virtualization functions such as NFV, VNF, NSO, and virtualized Cisco platforms. Learners must be able to deploy NFV with automation tools, manage VNF onboarding, work with NSO-driven orchestration, and use protocols like NETCONF, RESTCONF, REST APIs, and gNMI within automated cloud ecosystems. A general understanding of supporting platforms such as OpenStack also forms part of the required knowledge in this domain.

Get Unparalleled Exam 300-540 Questions Pdf and Pass Exam in First Attempt

Using these Cisco 300-540 practice test software you will identify your mistakes, gain confidence and learn time-management skills. It will help you to prepare better for the final 300-540 exam. Exam4Tests Cisco 300-540 Valid Dumps - Free Demo Download & Refund Guarantee Cisco 300-540 exam dumps are the best option if you really want to pass the Designing and Implementing Cisco Service Provider Cloud Network Infrastructure exam on your first attempt.

Cisco Designing and Implementing Cisco Service Provider Cloud Network Infrastructure Sample Questions (Q77-Q82):

NEW QUESTION # 77
VNF workloads are critical for:

- A. Virtualizing network functions to enhance flexibility
- B. Decreasing network reliability
- C. Reducing the need for monitoring

- D. Implementing physical network functions

Answer: A

NEW QUESTION # 78
Which of the following protocols is NOT directly related to implementing ECMP?

- A. IS-IS
- B. SMTP
- C. OSPF
- D. BGP

Answer: B

NEW QUESTION # 79
Cloud infrastructure monitoring can be automated through the use of:

- A. Physical network adjustments
- B. Cloud agents
- C. Decreasing telemetry data
- D. Manual system checks

Answer: B

NEW QUESTION # 80
Refer to the exhibit. An engineer must configure an IPsec VPN connection between site 1 and site 2. The indicated configuration was applied to router R1; however, the tunnel fails to come up. Which command must be run on R1 to resolve the issue?

- A. crypto isakmp key vpnuser address 10.1.1.2
- B. crypto isakmp key vpnuser address 192.168.20.2
- C. ip route 0.0.0.0 0.0.0.0 192.168.20.2
- D. ip route 0.0.0.0 0.0.0.0 10.1.1.2

Answer: B

Explanation:
For a site-to-site IPsec VPN, each peer must configure a pre-shared key tied to the public IP address of the remote VPN peer:
crypto isakmp key <KEY> address <REMOTE_PUBLIC_IP>
From the diagram:
* R1 outside IP: 192.168.10.1/24
* R2 outside IP: 192.168.20.2/24 # remote peer for R1
In the current R1 configuration, the ISAKMP key is incorrectly bound to 192.168.10.2, which is a local next- hop/ISP address on R1's own subnet, not the R2 public IP. Because the pre-shared-key address does not match the source IP of R2's IKE packets, phase 1 negotiation fails and the tunnel never comes up.
The correct configuration on R1 must therefore be:
crypto isakmp key vpnuser address 192.168.20.2
Options A and C incorrectly change the default route (next hop must be the local ISP router, not R2's public IP or a LAN address).
Option D uses an internal address (10.1.1.2), which is not the IP used for IKE on the Internet.

NEW QUESTION # 81
Direct Connect offers which of the following advantages over traditional internet connections?

- A. Reduced bandwidth
- B. More consistent network performance
- C. Increased security
- D. Higher latency

Answer: B,C

NEW QUESTION # 82

......

If you are a person who desire to move ahead in the career with informed choice, then the 300-540 test material is quite beneficial for you. Our 300-540 pdf is designed to boost your personal ability in your industry. To enhance your career path with your certification, you need to use the valid and Latest 300-540 Exam Guide to assist you for success. Our 300-540 practice torrent offers you the realistic and accurate simulations of the real test. The aim of our 300-540 practice torrent is to help you successfully pass the 300-540 exam.
