New Juniper JN0-253 Test Answers, Reliable JN0-253 Exam Cram

If you want to get a good job, and if you are not satisfied with your present situation, if you long to have a higher station in life. We think it is high time for you to try your best to gain the JN0-253 certification. You do not need to think it is too late for you to study. As the saying goes, success and opportunity are only given to those people who are well-prepared! If you really long to own the JN0-253 Certification, it is necessary for you to act now. We are willing to help you gain the JN0-253 certification.

Juniper Mist AI, Associate (JNCIA-MistAI) Sample Questions (Q44-Q49):

NEW QUESTION # 44

What are two components of WiFi Management and Assurance? (Choose two.)

- A. Marvis Actions
- B. wayfinding
- C. Dynamic Packet Capture
- D. Radio Resource Management

Answer: C,D

Explanation:

Dynamic Packet Capture and Radio Resource Management (RRM) are two key components of WiFi Management and Assurance in Juniper Mist. According to official documentation: "Dynamic packet capture allows capturing wireless packets between clients and an access point to diagnose root-cause wireless issues.

For example, when a major issue is detected, such as an authorization failure, packet captures facilitate quick troubleshooting and root-cause analysis." RRM, driven by Mist's AI, proactively analyzes network conditions and client experiences to automatically adjust channel and power settings for optimal performance: "AI- driven RRM uses data science and cumulative SLE performance to learn and optimize radio settings, helping RF planning to continue to improve and adapt in the changing environments..." Marvis Actions is an AI-powered troubleshooting feature, but it is a separate component enabled by the Marvis subscription, not by base WiFi Management and Assurance. Wayfinding is part of the vBLE Engagement or location services.

NEW QUESTION # 45

Which Mist API is event driven?

- A. Webhook
- B. RESTful
- C. Python
- D. FTP

Answer: A

Explanation:

Event-Driven API: Webhooks are used as an event-driven API in Mist. They allow the system to send real-time notifications to external systems when specific events occur, enabling immediate actions or alerts.

NEW QUESTION # 46

You are asked to create a label that will be applied to a WLAN template.
In this scenario, under which level should you create the label?

- A. organization
- **B. site**
- C. clients
- D. WLAN

Answer: B

Explanation:

When creating a label to be applied to a WLAN template in Mist AI, you should create the label at the site level. This is because WLAN templates are designed to be associated with specific sites or site groups, allowing you to customize WLAN configurations per site. Creating labels at the site level ensures that these configurations are applied appropriately within the desired site context.

NEW QUESTION # 47

What does the "Exceeded" status mean for a subscription?

- A. The subscription has been cancelled.
- B. The subscription exceeds the number of maximum allowable APs.
- **C. The allowed usage within the subscription has been surpassed.**
- D. The subscription is nearing its expiration date.

Answer: C

Explanation:

The "Exceeded" status for a subscription means that the allowed usage defined within the subscription has been surpassed. This typically refers to exceeding limits such as the number of devices, data usage, or other metrics specified in the subscription plan. Exceeding these limits may require action such as upgrading the subscription plan to accommodate the additional usage.

NEW QUESTION # 48

You are asked to configure Mist to send e-mail alerts to your organization administrators, who all have mailboxes that reside on the same e-mail server. Alerts are being generated and are visible in the Mist GUI, but only some administrators are receiving the alert e-mails.

What is the problem in this scenario?

- A. The user e-mail addresses are not correctly formatted.
- B. The organization does not have sufficient alert subscriptions.
- **C. The affected administrators have not enabled e-mail notifications in their Mist My Account settings.**
- D. Your e-mail server is blocking e-mail from Mist.

Answer: C

Explanation:

Identify the Problem: Alerts are being generated and visible in the Mist GUI, but only some administrators receive the alert emails.

Possible Issues:

User email addresses not correctly formatted.

Email server blocking Mist emails.

Insufficient alert subscriptions.

Administrators not enabling email notifications.

Root Cause:

Since some administrators receive the alerts, email formatting and server blocking issues can be ruled out.

If alert subscriptions were insufficient, no administrators would receive the alerts. The most likely cause is that the affected administrators have not enabled email notifications in their Mist My Account settings.

Resolution:

Ensure that all administrators have enabled email notifications in their Mist My Account settings.

NEW QUESTION # 49

.....

It is evident to all that the JN0-253 test torrent from our company has a high quality all the time. A lot of people who have bought our products can agree that our JN0-253 test questions are very useful for them to get the certification. There have been 99 percent people used our JN0-253 Exam Prep that have passed their exam and get the certification. It means that our JN0-253 test questions are very useful for all people to achieve their dreams, and the high quality of our JN0-253 exam prep is one insurmountable problem.
