Reliable Peoplecert DevOps-Foundation Dumps Questions - DevOps-Foundation Test Simulator Online

You can finish practicing all the contents in our DevOps-Foundation practice materials within 20 to 30 hours, and you will be

confident enough to attend the exam for our DevOps-Foundation exam dumps are exact compiled with the questions and answers of the real exam. What's more, during the whole year after purchasing, you will get the latest version of our DevOps-Foundation Study Materials for free. You can see that there are only benefits for you to buy our DevOps-Foundation learning guide, so why not just have a try right now?

Peoplecert PeopleCert DevOps Foundation v3.6 Exam Sample Questions (Q80-Q85):

NEW QUESTION # 80

The goal of which role is the creation of ultra-scalable and highly reliable software systems?

- A. Site resilience engineer
- B. Product Owner
- **C. Site reliability engineer**
- D. Software engineer

Answer: C

Explanation:

The Site Reliability Engineer (SRE) role originated at Google and is now widely recognized. SREs apply software engineering principles to IT operations to create systems that are scalable, reliable, and highly available. Their responsibilities include:

- * Designing reliability into systems (SLIs, SLOs, SLAs)
- * Automating operational tasks to reduce toil
- * Building monitoring and alerting systems
- * Performing capacity planning and disaster recovery exercises

A (Site resilience engineer) is not a standard industry term. C (Software engineer) focuses on developing applications but not specifically on operational reliability. D (Product Owner) is a role in Agile frameworks that manages product backlog and priorities, not system reliability.

Thus, the correct answer is B - Site Reliability Engineer.

NEW QUESTION # 81

Agile funding can be _____

- A. Fixed cost
- B. Reviewed frequently
- **C. All of the Above**
- D. Continuous cost

Answer: C

Explanation:

Agile funding is flexible and adapts to the iterative, incremental nature of Agile and DevOps projects.

It can be fixed cost for some work, continuous cost for ongoing value streams, and is reviewed frequently to align with evolving priorities.

All three characteristics are true, so D ("All of the Above") is correct.

Extract-style reference:

"Agile funding models support continuous review and adaptation, providing the flexibility required for digital transformation and DevOps ways of working."

- Project to Product, Mik Kersten

PeopleCert DevOps Foundation v3.6: Advocates funding models that encourage agility, experimentation, and rapid value delivery.

NEW QUESTION # 82

Learning organizations understand that not embedding learning into the culture of an organization creates cultural debt.

Which of the following are characteristics of high performing organizations?

- A. Employees & Leadership Committed to Learning
- B. Change Management Team requiring Training
- C. Individualism
- D. Incentive Plans offered but frowned upon being used

Answer: A

Explanation:

High-performing organizations embed learning into their culture, which leads to continuous improvement, innovation, and adaptability.

* Employees and leadership committed to learning (option C) is a proven characteristic of high performance.

* Other options-individualism, mandated training, and disincentivized development-are actually barriers to DevOps success.

Extract-style reference:

"High-performing organizations deliberately invest in learning and development and have leaders who model and reward learning behaviors."

-Accelerate: The Science of Lean Software and DevOps, Nicole Forsgren et al.

PeopleCert DevOps Foundation v3.6: The syllabus highlights that a "culture of learning" and psychological safety are core characteristics of successful DevOps organizations.

NEW QUESTION # 83

Which of the following DevOps practices encourages conversation driven development, delivery and support?

- A. The Second Way
- B. ChatOps
- C. Communication Platforms
- D. VisOps

Answer: B

Explanation:

ChatOps is the DevOps practice of using chat platforms (like Slack, Teams, Mattermost) as the central interface for communication, collaboration, and even automated deployment or support tasks.

It encourages "conversation-driven development, delivery, and support," making processes transparent and collaborative.

* Second Way(A) is about feedback loops, but not specifically conversational platforms.

* Communication Platforms(C) is a generic term

* VisOps(D) is not a standard DevOps term

Extract-style reference:

"ChatOps is a collaboration model that connects people, tools, process, and automation into a transparent workflow. Teams communicate and execute commands from a central chat client."

-DevOps Handbook

PeopleCert Foundation v3.6: ChatOps promotes rapid feedback and a culture of sharing.

NEW QUESTION # 84

Updates to a complex critical business service are released every calendar quarter. The business would like to increase the frequency of releases for this service.

Why would segmenting the service into microservices help to improve the frequency of release?

- A. Microservices are less expensive and therefore can be built and released more frequently
- B. Microservices create a service architecture built on smaller modules that can be updated independently without affecting the primary system
- C. Microservices are always open source so they can be modified frequently to meet business requirements
- D. Microservices can be built quickly to correct or remove errors in the primary system

Answer: B

Explanation:

Microservices architecture breaks down applications into small, independent, loosely coupled services that can be developed, tested, and deployed independently.

* Why does this improve release frequency? Each microservice can be updated, tested, and deployed on its own, reducing the risk and coordination overhead associated with monolithic releases.

* This allows for faster feedback and more frequent delivery of value to users.

Extract-style reference:

"Microservices enable teams to deploy independently, reduce deployment risk, and increase release frequency by decoupling services."

-Accelerate: The Science of Lean Software and DevOps, Chapter 4

PeopleCert DevOps Foundation v3.6:Stresses modular architectures for enabling rapid, independent deployments and continuous delivery.

NEW QUESTION # 85

.....

We have dedicated staff to update all the content of DevOps-Foundation exam questions every day. So you don't need to worry about that you buy the materials so early that you can't learn the last updated content. And even if you failed to pass the exam for the first time, as long as you decide to continue to use DevOps-Foundation torrent prep, we will also provide you with the benefits of free updates within one year and a half discount more than one year. DevOps-Foundation Test Guide use a very easy-to-understand language. So even if you are a newcomer, you don't need to worry that you can't understand the contents. Industry experts hired by DevOps-Foundation exam questions also explain all of the difficult professional vocabulary through examples, forms, etc. You can completely study alone without the help of others.
