I believe that after you try ITFAS-Level-1 certification training, you will love them.

NICET Inspection and Testing of Fire Alarm Systems Level I Exam Sample Questions (Q10-Q15):

NEW QUESTION # 10

Secondary power shall automatically provide power to a protected premises system within how many seconds after the primary power fails?

- A. 0
- B. 1
- **C. 2**
- D. 3

Answer: C

Explanation:

NFPA 72 specifies a strict timeframe for the automatic switchover to secondary power after loss of primary power.

NFPA 72 (2022), Section 10.6.7.1.2:

"Transfer to secondary power shall occur within 30 seconds after loss of primary power." This ensures uninterrupted monitoring and alarm functions during outages.

Correct answer: B. 30

NEW QUESTION # 11

Which of the following signals takes highest priority?

- A. Supervisory
- B. Trouble
- **C. Pre-alarm**
- D. Restoral

Answer: C

Explanation:

Signal priorities determine the order in which events are processed and displayed by the fire alarm system.

NFPA 72 (2022), Annex A.10.14.3 and system programming guidelines:

While not directly listed in a table, systems are programmed such that:

* Alarm (including pre-alarm) has the highest priority

* Followed by supervisory, then trouble, and finally restoral

Pre-alarm is part of alarm initiation logic and is treated as high-priority due to its potential escalation.

Correct answer: A. Pre-alarm

NEW QUESTION # 12

How should the documentation cabinet be labeled?

- A. Fire alarm documents
- B. System records
- C. Fire alarm record documents
- **D. System record documents**

Answer: D

Explanation:

NFPA 72 mandates that fire alarm system documentation be stored in a dedicated cabinet, and that cabinet must be clearly labeled.

The exact phrase required is:

NFPA 72 (2022), Section 7.7.2:

"The cabinet shall be prominently labeled 'SYSTEM RECORD DOCUMENTS.'"

This ensures that anyone - including inspectors, AHJs, or technicians - can easily identify where critical system information is stored.

Correct answer: D. System record documents

NEW QUESTION # 13

When a system must be fully or partially disabled for less than 8 hours, who must be notified when the system is restored?

- A. Fire department

- B. AHJ
- **C. System owner**
- D. Insurance company

Answer: C

Explanation:

When a fire alarm system is impacted for any period of time, certain parties must be notified both before and after testing or impairment. When the impairment is less than 8 hours, NFPA 72 (2022), Section 10.21.3.6 applies.

NFPA 72 (2022), Section 10.21.3.6:

"Where a system has been impaired for less than 8 hours, notification shall be made to the system owner or the owner's designated representative when the system has been returned to service." This section makes it clear that the system owner is the responsible party to be notified upon restoration in these shorter impairments.

Correct answer: D. System owner

NEW QUESTION # 14

In addition to 10% of devices not affected, what else must be tested when site-specific software is changed?

- A. 25% of devices affected
- **B. 100% of devices affected**
- C. 10% of devices affected
- D. 50% of devices affected

Answer: B

Explanation:

When site-specific software (such as logic for fire alarm control panels) is changed, 100% of the devices affected by that change must be tested to confirm correct operation. Also, 10% of unaffected devices must be tested as a safeguard.

NFPA 72 (2022), Section 14.4.2.2.4:

"When system software is modified, 100% of the affected devices or functions and 10% of the nonaffected devices or functions shall be tested." This ensures that updates don't unintentionally compromise unrelated areas of the system.

Correct answer: D. 100% of devices affected

NEW QUESTION # 15

.....

Generally speaking, preparing for the ITFAS-Level-1 exam is a very hard and even some suffering process. Because time is limited, sometimes we have to spare time to do other things to review the exam content, which makes the preparation process full of pressure and anxiety.
