さまざまな電子デバイスを通じてFCP_FMG_AD-7.4ガイド資料を使用できます。自宅ではコンピューターを使用でき、外では電話も使用できます。FCP_FMG_AD-7.4学習教材を学ぶために携帯電話を使用する人が増えているので、好きなものを選択することもできます。利点の1つは、ネットワーク環境でFCP_FMG_AD-7.4練習問題を初めて使用する場合、次回教材を使用するときにネットワーク要件がなくなることです。いつでもどこでもFCP_FMG_AD-7.4本物の試験を開くことができます。

Fortinet FCP_FMG_AD-7.4 認定試験の出題範囲:

トピック	出題範囲
トピック 1	Advanced Configuration: This domain explains FortiManager's high availability (HA), configures FortiGuard services and works with the global database ADOM.
トピック 2	Policy and Objects: This section deals with how to manage policies and objects, oversee ADOM revisions, configure workspace mode, and conduct policy imports and installations.
トピック 3	Troubleshooting: This section covers how to familiarize with FortiManager deployment scenarios and troubleshoot issues related to imports, installations, device-level, ADOM-level, and system-level concerns.
トピック 4	Administration: This section covers how to understand FortiManager capabilities, perform initial configurations, and set up administrative domains (ADOMs).
トピック 5	Device Manager: In this domain, the focus is on how to register devices within ADOMs, implement configuration changes using scripts, and troubleshoot using the revision history.

FCP_FMG_AD-7.4最新関連参考書 & FCP_FMG_AD-7.4資格トレーニング

これらの問題を解決するための基本的な方法は、社会の発展よりも速いスピードで成長することです。現場では、Fortinet認定を取得して、自分自身を改善し、より良いあなたとより良い未来を目指してください。それに

より、あなたはあなたの職業で認められます。FCP_FMG_AD-7.4試験トレンドは、より大企業に注意を向けさせる能力を証明できます。その後、より良い仕事を取得し、適切な職場に行くための選択肢があります。そして、FCP_FMG_AD-7.4試験問題は、98%以上の高い品質と高い合格率で有名です。FCP_FMG_AD-7.4学習ガイドをお試しください。

Fortinet FCP - FortiManager 7.4 Administrator 認定 FCP_FMG_AD-7.4 試験問題 (Q26-Q31):

質問 # 26

Exhibit.

What is true about the objects highlighted in the image?

- A. They cannot be created in the global database ADOM.
- B. They are available across all ADOMs by default.
- C. They can be set to optional or required.
- D. They can be used as variables in scripts.

正解: D

質問 # 27

An administrator created a new global policy package that includes header and footer policies and then assigned it to an ADOM. What are two outcomes of this action? (Choose two.)

- A. To assign another global policy package later to the same ADOM, you must unassign this policy first.
- B. After you assign the global policy package to an ADOM, the impacted policy packages become hidden in that ADOM.
- C. You can edit or delete all the global objects in the global ADOM.
- D. You must manually move the header and footer policies after the policy assignment.

正解: A、C

質問 # 28

Refer to the exhibit.

Create New Script

Script Name

6 set action permit

7 next

8 edit 2

9 set prefix 8.8.8.8/32

10 set action deny

11 end

Revert All Changes

Advanced Device Filters >

Which two results occur if the script is run using the Device Database option? (Choose two.)

- A. The script history shows successful installation of the script on the remote FortiGate device.
- B. You must install these changes on a managed device using the Install Wizard.
- C. The successful execution of a script on the Device Database creates a new revision history.
- D. The device Config Status is tagged as Modified.

正解: B、D

解説:

If the script is run using the "Device Database" option on FortiManager, the following occurs:

- * A. You must install these changes on a managed device using the Install Wizard.
- * Running the script on the Device Database updates only the configuration in the FortiManager's database, not on the actual FortiGate device. To apply the changes, you need to use the Install Wizard to push these configurations to the managed device.
- * D. The device Config Status is tagged as Modified.
- * After running the script on the Device Database, FortiManager tags the device's configuration status as "Modified," indicating that there are pending changes that have not yet been installed on the device.

Options B and C are incorrect because:

- * B suggests a new revision history is created, but this only happens when changes are actually installed on the managed device.
- * C implies the script is directly executed on the FortiGate, which is not the case when using the Device Database option.

FortiManager References:

- * Refer to FortiManager 7.4 Administrator Guide: Scripting and Configuration Management.

質問 # 29

An administrator configures a new OSPF area on FortiManager and has not yet pushed the changes to the managed FortiGate device. In which database will the configuration be saved?

- A. ADOM-level database
- B. Revision history database
- C. Device-level database
- D. Configuration-level database

正解: C

質問 # 30

Refer to the exhibit.

You are using the Quick Install option to install configuration changes on the managed FortiGate.

Which two statements correctly describe the result? (Choose two.)

- A. It installs device-level changes on the FortiGate device without launching the Install Wizard
- B. It installs all the changes in the device database first and the administrator must reinstall the changes on the FortiGate device.
- C. It installs provisioning template changes on the FortiGate device.
- D. It provides the option to preview only the policy package changes before installing them

正解: A、D

解説:

* Option B: It provides the option to preview only the policy package changes before installing them. This is correct. The Quick Install option in FortiManager provides a preview of policy changes before they are applied, allowing administrators to review and confirm the changes.

* Option D: It installs device-level changes on the FortiGate device without launching the Install Wizard. This is correct. Quick Install allows for the immediate installation of device-level changes, such as interface or routing configurations, directly onto the FortiGate without going through the full Install Wizard.

Explanation of Incorrect Options:

* Option A: It installs provisioning template changes on the FortiGate device is incorrect because Quick Install does not specifically deal with provisioning templates.

* Option C: It installs all the changes in the device database first and the administrator must reinstall the changes on the FortiGate device is incorrect because Quick Install directly applies changes to the FortiGate device, not requiring a separate reinstall step.

FortiManager References:

* Refer to "FortiManager Administration Guide" for details on "Quick Install" functionality under "Device Management."
