100% Pass Quiz 2026 Amazon ANS-C01 – Professional Valid Dumps Book

In every area, timing counts importantly. With the advantage of high efficiency, our ANS-C01 practice materials help you avoid wasting time on selecting the important and precise content from the broad information. In such a way, you can confirm that you get the convenience and fast. By studying with our ANS-C01 Real Exam for 20 to 30 hours, we can claim that you can get ready to attend the ANS-C01 exam.

Amazon ANS-C01 Certification is recognized globally and is highly valued in the IT industry. AWS Certified Advanced Networking Specialty Exam certification demonstrates the candidate's proficiency in advanced networking technologies and their ability to design and implement networking solutions in the AWS cloud environment. AWS Certified Advanced Networking Specialty certified professionals are in high demand and can command higher salaries than their non-certified peers.

Amazon AWS Certified Advanced Networking Specialty Exam Sample Questions (Q240-Q245):

NEW QUESTION # 240

Which AWS Identity and Access Management (IAM) entities are used when creating an environment?

(Select TWO.)

Response:

- A. User name and access keys
- B. Service role
- C. Instance profile
- D. Profile role
- E. Federated role

Answer: B,C

NEW QUESTION # 241

A media company wants to use AWS Cloudfront to manage its content. Firstly, it would like to allow only those new users who have paid the annual subscription fee the ability to download the application installation file. Secondly, only the subscribers should be able to view the files in the members' area.

As a Networking Specialist, which of the following would you recommend as the MOST optimal solutions to deliver restricted content to the bona fide end users?

(Select two)

Response:

- A. Use CloudFront signed cookies to restrict access to the application installation file
- B. Use CloudFront signed URLs to restrict access to all the files in the members' area of the website
- C. Use CloudFront signed cookies to restrict access to all the files in the members' area of the website
- D. Require HTTPS for communication between CloudFront and your S3 origin
- E. Use CloudFront signed URLs to restrict access to the application installation file

Answer: C,E

NEW QUESTION # 242

You have an EC2 instance inside a VPC that needs to communicate with an S3 bucket. How does that traffic flow by default?

Response:

- A. Over the Internet
- B. Over the AWS backbone network using a VPC Endpoint
- C. Over a VPN

Answer: A

NEW QUESTION # 243

A company has an application running on Amazon EC2 instances in a private subnet that connects to a third-party service provider's public HTTP endpoint through a NAT gateway.

As request rates increase, new connections are starting to fail. At the same time, the ErrorPortAllocation Amazon CloudWatch metric count for the NAT gateway is increasing.

Which of the following actions should improve the connectivity issues?

(Select TWO.)

Response:

- A. Allocate additional elastic IP addresses to the NAT gateway
- B. Request that the third-party service provider implement HTTP keepalive
- C. Implement TCP keepalive on the client instances
- D. Create additional NAT gateways in the public subnet and split client instances into multiple private subnets, each with a route to a different NAT gateway
- E. Create additional NAT gateways and update the private subnet route table to introduce the new NAT gateways

Answer: C,D

NEW QUESTION # 244

A company uses the us-east-1 Region and the ap-south-1 Region for its business units (BUs). The BUs are named BU-1 and BU-2. For each BU, there are two VPCs in us-east-1 and one VPC in ap-south-1.

Because of workload isolation requirements, resources can communicate within the same BU but cannot communicate with resources in the other BU. The company plans to add more BUs and plans to expand into more Regions.

Which solution will meet these requirements with the MOST operational efficiency?

- A. Configure a transit gateway in each Region. Configure peering between the transit gateways. Attach the BU VPCs to the transit gateway in the corresponding Region. Configure the transit gateway and VPC route tables to isolate traffic between BU VPCs.
- B. Configure an AWS Cloud WAN network that operates in the required Regions. Attach all BU VPCs to the AWS Cloud WAN core network. Update the core network policy by setting the isolate-attachments parameter for each segment.
- **C. Configure an AWS Cloud WAN network that operates in the required Regions. Create AWS Cloud WAN segments for each BU. Configure VPC attachments for each BU's VPCs to the corresponding BU segment.**
- D. Configure an AWS Cloud WAN network that operates in the required Regions. Attach all BU VPCs to the AWS Cloud WAN core network. Update the AWS Cloud WAN segment actions to configure new routes to deny traffic between the different BU segments.

Answer: C

NEW QUESTION # 245

.....

In order to provide the most effective ANS-C01 exam materials which cover all of the current events for our customers, a group of experts in our company always keep an close eye on the changes of the ANS-C01 exam even the smallest one, and then will compile all of the new key points as well as the latest types of exam questions into the new version of our ANS-C01 Practice Test, and you can get the latest version of our ANS-C01 study materials for free during the whole year. Do not lose the wonderful chance to advance with times.
