UiPath UiPath-ADAv1 Prüfungsplan:

Thema	Einzelheiten
Thema 1	<ul style="list-style-type: none"> Integration Service: The section introduces Integration Service, explaining its purpose and demonstrating the use of connectors and triggers in automation projects to interact with external systems.
Thema 2	<ul style="list-style-type: none"> PDF Automation: The section focuses on data extraction from native and scanned PDFs, including single and multiple document scenarios.
Thema 3	<ul style="list-style-type: none"> Variables and Arguments: This topic introduces data types and delves into creating, managing, and utilizing variables, arguments, and global constants variables. It also clarifies the distinctions between these concepts, ensuring a comprehensive understanding of data handling in automation projects.
Thema 4	<ul style="list-style-type: none"> Working with Files and Folders: Here, you explore creating, managing, and navigating local files and folders, providing a foundation for file system automation.
Thema 5	<ul style="list-style-type: none"> Exception Handling: This topic focuses on error management, showcasing the use of Try Catch, Throw, and Rethrow activities, along with the Retry Scope feature, to handle exceptions gracefully.
Thema 6	<ul style="list-style-type: none"> Orchestrator: This topic covers the definition of Orchestrator entities, tenant entities, and folder entities, along with their respective functionalities. It also provides practical guidance on robot provisioning, workspace management, role assignments, and logging features.
Thema 7	<ul style="list-style-type: none"> Data Manipulation: This topic covers a range of data manipulation techniques, including string manipulation using VB.Net methods and the RegEx Builder. It also guides users through working with arrays, lists, and dictionaries, as well as building and iterating through Data Tables.
Thema 8	<ul style="list-style-type: none"> Implementation Methodology: The section offers an overview of project implementation stages, interpretation of PDDs and SDDs, and the conduct of automation project peer reviews, ensuring a structured approach to development.

Thema 9	<ul style="list-style-type: none"> • Email Automation: This topic covers retrieving emails via IMAP • POP3, sending SMTP messages, and managing integrations with Microsoft and Gmail accounts, utilizing their respective packages.
Thema 10	<ul style="list-style-type: none"> • Logging: The section provides insights into interpreting robot execution logs and adhering to logging best practices, ensuring effective issue identification and resolution.
Thema 11	<ul style="list-style-type: none"> • Control Flow: The section explains the functionality of control flow activities and their impact on workflow types. It covers the use of sequence and flowchart layouts. Lastly, it focuses on implementing IF, For Each, and While activities, among others.
Thema 12	<ul style="list-style-type: none"> • UI Automation: Here, the topic explains how UI Automation works and offer guidance on using the Modern Recorder and associated activities. It also covers UI synchronization and the configuration of static and dynamic descriptors.
Thema 13	<ul style="list-style-type: none"> • Workflow Analyzer: Here, the topic introduces the Workflow Analyzer tool, explaining its use for project analysis and validation, and providing guidance on configuring its settings.
Thema 14	<ul style="list-style-type: none"> • Debugging: Here, we explore various debugging techniques, including debug modes, actions, and ribbon options. It also guides users through setting breakpoints, utilizing debugging panels, and optimizing performance with profile execution.
Thema 15	<ul style="list-style-type: none"> • Studio Interface: Here, the topic guides users through installing Studio Community Edition and connecting to Orchestrator. It covers profile differences, backstage view options, compatibility modes, and package management. Additionally, it offers an in-depth exploration of the Studio interface and its various elements.
Thema 16	<ul style="list-style-type: none"> • Excel Automation: The section delves into Excel Automation, showcasing the use of modern Excel activities and workbook-level operations.
Thema 17	<ul style="list-style-type: none"> • Version Control Integration: The section highlights the benefits of version control by demonstrating the use of Studio's Git integration for adding projects, cloning repositories, committing changes, and managing branches.
Thema 18	<ul style="list-style-type: none"> • Object Repository: This topic covers the creation, publication, and consumption of UI Libraries, including the use of static and dynamic descriptors, offering a structured approach to UI element management.
Thema 19	<ul style="list-style-type: none"> • Libraries and Templates: This topic covers the creation, publication, and consumption of process libraries, along with the sharing and access of templates, promoting efficient project development and standardization.

Sie können so einfach wie möglich - UiPath-ADAv1 bestehen!

Die UiPath UiPath-ADAv1 Prüfungsfragen und Antworten (UiPath-ADAv1) von PrüfungFrage ist eine Garantie für eine erfolgreiche Prüfung! Bisher fällt noch keiner unserer Kandidaten durch! Falls jemand bei der Zertifizierungsprüfung durchfallen sollte, zahlen wir 100% Material-Gebühr zurück. Wir übernehmen die volle Geld-zurück-Garantie auf Ihre Zertifizierungsprüfungen! Unsere UiPath-ADAv1 Fragen und Antworten (UiPath Automation Developer Associate v1 Exam) sind aus dem Fragenpool, alle sind echt und original.

UiPath Automation Developer Associate v1 Exam UiPath-ADAv1 Prüfungsfragen mit Lösungen (Q253-Q258):

253. Frage

What are the three main components of UiPath Integration Service?

- A. Activities, Connections, Triggers.
- B. Connectors, Connections, Orchestrator.
- C. Connectors, API Tokens, Triggers.
- **D. Connectors, Connections, Triggers.**

Antwort: D

Begründung:

UiPath Integration Service is a feature that enables you to integrate UI and API automation in a unified way.

The three main components of UiPath Integration Service are:

* **Connectors:** These are pre-built or custom components that provide access to various applications or systems through their APIs. You can use connectors to perform actions or retrieve data from different sources, such as Salesforce, Slack, Google Sheets, etc.

(UiPath Integration Service documentation1)

* **Connections:** These are configurations that store the authentication and connection details for each connector. You can create and manage connections in the UiPath Automation Cloud and share them across different folders and processes. (UiPath Integration Service documentation2)

* **Triggers:** These are rules that define when and how to start a process in Orchestrator based on events from connectors. You can configure triggers to react to data changes, insertions, deletions, or custom events in the connected applications or systems. (UiPath Integration Service documentation3) References:

* 1: Integration Service - Connectors - UiPath Documentation Portal.

* 2: Integration Service - Connections - UiPath Documentation Portal.

* 3: Integration Service - Triggers - UiPath Documentation Portal.

254. Frage

Which activity should the developer utilize in order to retrieve all UI elements from a form based on a filter criterion?

- A. Get Ancestor
- **B. Find Children**
- C. Find Element
- D. Export UI Tree

Antwort: B

Begründung:

The "Find Children" activity should be used to retrieve all UI elements from a form based on a filter criterion.

This activity can be used to find all UI elements that are children of a specified UI element, and it allows for filtering these children according to specified criteria. Therefore, the correct answer is D.

255. Frage

What is the default priority value for the Job Priority field in UiPath Orchestrator when starting a job manually?

- A. Inherited
- B. Low
- **C. Medium**
- D. High

Antwort: C

Begründung:

Explanation

The Job Priority field in UiPath Orchestrator is used to specify the priority of a job when it is added to a queue of pending jobs on the same robot. The priority can be set to Low, Medium, High, or Inherited. The Inherited option means that the priority is inherited from the trigger that started the job. When starting a job manually, the default priority value is Medium, which means that the job will be executed after any high-priority jobs and before any low-priority jobs in the queue. (UiPath Orchestrator documentation1)

References:

1: Starting a Job - UiPath Orchestrator.

256. Frage

A developer loaded an existing workflow that uses UI Automation in Google Chrome. The Google Chrome extension has not been installed on the developer's machine. How should the developer load the Google Chrome extension from UiPath Studio?

Instructions: Drag the Description found on the left and drop on the correct Step found on the right.

Antwort:

Begründung:

Explanation

The developer can load the Google Chrome extension from UiPath Studio by following these steps:

Step 1 = Navigate to Home in UiPath Studio. This is the section where you can create, open, or manage your projects.

Step 2 = Click Tools to see UiPath Extensions. This is the section where you can install or update various extensions for different applications or browsers.

Step 3 = Select Chrome and then click Install. This will launch the Chrome browser and redirect you to the Chrome Web Store page for the UiPath extension.

Step 4 = Click Enable extension in the Google Chrome confirmation pop-up. This will add the UiPath extension to your browser and allow you to use UI automation activities in Chrome.

257. Frage

If you are inserting activities into a Sequence in UiPath Studio, in which panel do the activities appear?

- A. Designer
- B. Outline
- C. Imports
- D. Snippets

Antwort: A

Begründung:

Explanation

The Designer panel is the central panel in UiPath Studio, where you can design your automation workflows by dragging and dropping activities. When you insert activities into a Sequence, they appear in the Designer panel as a linear representation that flows from top to bottom. The Snippets panel contains ready-made workflows that you can reuse in your projects. The Imports panel allows you to import namespaces and libraries that you can use in your workflows. The Outline panel shows the hierarchical structure of your project and its components. References: The User Interface, Sequences

258. Frage
