如果你仍然在努力獲得SAP的C-BCBAI-2509考試認證，我們PDFExamDumps為你實現你的夢想，PDFExamDumps SAP的C-BCBAI-2509考試培訓資料是品質最好的培訓資料，為你提供了一個好的學習平臺，問題是你如何準備這個考試，以確保你百分百成功，答案是非常簡單的，如果你有適當的時間學習，那就選擇我們PDFExamDumps SAP的C-BCBAI-2509考試培訓資料，有了它，你將快樂輕鬆的準備考試。

最新的 SAP Certified Associate C-BCBAI-2509 免費考試真題 (Q38-Q43):

問題 #38

(What are some functions that the SAP Build Code with code generation add-on provides? Note: There are 2 correct answers to this question.)

- A. Generate unit tests for ABAP classes
- B. Explain existing code
- C. Refactor CAP projects
- D. Insert code snippets through Joule

答案: A,B

解題說明:

Comprehensive and Detailed Explanation From Exact Extract: The SAP Build Code with code generation add-on, powered by Joule, provides functions such as explaining existing code through code reviews and comments, and generating unit tests for ABAP classes by selecting methods and using AI-based features to create tests efficiently.

Exact extracts supporting this:

Explain existing code: "/cap-edit-model: Edits existing CAP data models, supports code reviews, adds comments, and answers questions like 'Does this code follow the best practices of CAP?'"community.sap.com "/ui5: Explains UI5-related artifacts, e.g., 'What does the code in the main controller do?', with options to consider selected code without specifying files."community.sap.com "Code Commenting via Joule Code Assistant, generating explanatory comments for selected code, with accept/reject options."community.sap.com Generate unit tests for ABAP classes: "With Joule for developers, ABAP AI capabilities, you can easily access AI-based features designed to help you create ABAP Unit tests."help.sap.com "Navigate to any of the specified views and select a public method from a global ABAP class. Open the context menu and select Joule Generate Unit Tests."help.sap.com Other options are incorrect because:

Option B: While Joule supports inline code-completion for suggesting snippets, this is a general feature rather than a specific function of the code generation add-on, which focuses on broader generation tasks like models and tests rather than snippet insertion.

Option C: Refactoring is supported for CAP projects through editing models and code refactor assistants, but it is not highlighted as a primary function of the code generation add-on, which emphasizes generation and explanation over refactoring.

Reference from Positioning SAP Business AI Solutions as part of SAP Business Suite documents or Study Guide: Based on SAP Community blogs like "Overview of all GenAI Options in SAP Build Code" and "Develop with Joule in SAP Build Code," as well as SAP Help Portal documentation on ABAP AI capabilities in SAP Build Code. These align with the C_BCBAI_2502 certification, positioning SAP Build Code as an AI-enhanced development tool within the SAP Business Suite for Java, JavaScript, and ABAP.

問題 #39

What are some important features of the Joule Agent architecture? Note: There are 3 correct answers to this question.

- A. Managed agent runtime
- B. Bi-directional connectivity
- C. Seamless collaboration
- D. Shared agent services

答案: A,C,D

解題說明:

The Joule Agent architecture includes key features that enhance its functionality, as per SAP Business AI documentation. Managed agent runtime provides a controlled environment for executing AI agents, ensuring reliability and performance. Seamless collaboration enables agents to work together across business functions, supporting complex workflows. Shared agent services allow agents to leverage common resources, such as data models or APIs, for efficiency and consistency. Bi-directional connectivity, while relevant to integration, is not explicitly highlighted as a core feature of the Joule Agent architecture. These features ensure that Joule Agents deliver scalable, collaborative, and efficient AI solutions within SAP ecosystems.

問題 #40

Match the benefit from the dropdown list to the SAP LeanIX AI capabilities.

□

答案:

解題說明:

□

問題 #41

You are asking Joule to create a new purchase requisition. Which interaction pattern does your request represent?

- A. Transactional
- B. Informational
- C. Commercial
- D. Financial

答案: A

解題說明:

Creating a new purchase requisition with Joule represents a transactional interaction pattern. As per SAP Business AI documentation, transactional interactions involve executing specific business processes, such as creating, updating, or managing records within SAP systems. Joule's ability to handle such tasks streamlines operations by automating workflows and reducing

manual effort. Informational interactions focus on retrieving data, commercial and financial are not defined interaction patterns in SAP's framework, and the act of creating a requisition is distinctly transactional. This capability enhances efficiency in procurement processes, allowing users to focus on strategic tasks while Joule manages operational activities seamlessly.

問題 #42

In SAP Business AI, what are some safeguards for protecting customer data? Note: There are 3 correct answers to this question.

- A. Consent-based model training
- B. SAP-hosted AI infrastructure
- C. Clean core maintenance
- D. Tenant isolation

答案: A,B,D

解題說明:

SAP Business AI incorporates robust safeguards to protect customer data, ensuring privacy and compliance. The consent-based model training approach ensures that AI models are trained only on data for which explicit user consent has been obtained, aligning with global data protection regulations such as GDPR. This minimizes the risk of unauthorized data usage. SAP-hosted AI infrastructure provides a secure environment where data is processed within SAP's controlled, enterprise-grade cloud infrastructure, reducing exposure to external vulnerabilities. Tenant isolation ensures that each customer's data is stored and processed in a dedicated environment, preventing cross-tenant data leakage and enhancing security. These measures collectively uphold SAP's commitment to data privacy and security, as outlined in the SAP Business AI documentation. Clean core maintenance, while important for system efficiency, is not directly related to data protection. Sustainability is not a safeguard for customer data.
