

# Trustable 100% Free OGEA-101–100% Free Vce Test Simulator | Valid OGEA-101 Mock Exam

What's more, part of that ExamsReviews OGEA-101 dumps now are free: [https://drive.google.com/open?id=1fYogU\\_wwuA2Pq5mj\\_LpDdu\\_G-gOyTRf](https://drive.google.com/open?id=1fYogU_wwuA2Pq5mj_LpDdu_G-gOyTRf)

As we all know, the influence of OGEA-101 exam guides even have been extended to all professions and trades in recent years. Passing the OGEA-101 exam is not only for obtaining a paper certification, but also for a proof of your ability. Most people regard The Open Group certification as a threshold in this industry, therefore, for your convenience, we are fully equipped with a professional team with specialized experts to study and design the most applicable OGEA-101 Exam prepare. We have organized a team to research and OGEA-101 study question patterns pointing towards various learners.

If you purchase The Open Group OGEA-101 exam questions and review it as required, you will be bound to successfully pass the exam. And if you still don't believe what we are saying, you can log on our platform right now and get a trial version of TOGAF Enterprise Architecture Part 1 Exam OGEA-101 study engine for free to experience the magic of it.

## The Open Group OGEA-101 Dumps Material Formats

For more than ten years, our OGEA-101 practice engine is the best seller in the market. More importantly, our good OGEA-101 guide questions and perfect after sale service are approbated by our local and international customers. If you want to pass your practice exam, we believe that our OGEA-101 Learning Engine will be your indispensable choices. More and more people have bought our OGEA-101 guide questions in the past years. What are you waiting for? Just rush to buy our OGEA-101 exam braindumps and become successful!

## The Open Group OGEA-101 Exam Syllabus Topics:

Topic	Details

Topic 1	<ul style="list-style-type: none"> <li>• <b>Architecture Vision:</b> Aspiring TOGAF practitioners learn to develop an architecture vision that aligns with business goals and drivers. This topic evaluates the skills in articulating a clear and compelling vision, a necessary competency for successfully navigating the OGEA-101 exam and implementing enterprise architecture.</li> </ul>
Topic 2	<ul style="list-style-type: none"> <li>• <b>Architecture Content Framework:</b> Candidates learn about the TOGAF content metamodel and architecture artifacts. This topic of the OGEA-101 exam measures their understanding of content organization and documentation.</li> </ul>
Topic 3	<ul style="list-style-type: none"> <li>• <b>Architecture Change Management:</b> Focusing on managing architecture changes, this topic of the TOGAF Enterprise Architecture Part 1 exam assesses skills of practitioners in handling change requests and maintaining architecture repositories.</li> </ul>
Topic 4	<ul style="list-style-type: none"> <li>• <b>Information Systems Architecture:</b> Focusing on data and application architectures, this topic of the OGEA-101 Exam assesses ability of TOGAF practitioners to define and manage information systems. It measures their skills in identifying data entities and application components.</li> </ul>
Topic 5	<ul style="list-style-type: none"> <li>• <b>Implementation Governance:</b> This topic of The Open Group OGEA-101 exam emphasizes the governance framework for architecture implementation, including compliance processes. It measures the understanding of TOGAF practitioners about governance principles, a key competency for the OGEA-101 exam.</li> </ul>

## The Open Group TOGAF Enterprise Architecture Part 1 Exam Sample Questions (Q65-Q70):

### NEW QUESTION # 65

What is an objective of the ADM Preliminary Phase?

- A. To obtain approval for the Statement of Architecture Work
- B. To create the initial version of the Architecture Roadmap
- **C. To select and implement tools to support the Architecture Capability**
- D. To develop a vision of the business value to be delivered by the proposed enterprise architecture

**Answer: C**

Explanation:

The Preliminary Phase is the preparatory phase of the Architecture Development Method (ADM) cycle, which sets the context and direction for the architecture work. One of the objectives of this phase is to select and implement tools to support the Architecture Capability, which is the ability of an organization to perform enterprise architecture effectively and efficiently. Tools can include software applications, methods, techniques, standards, and frameworks that assist the architecture development and governance processes. The selection and implementation of tools should be based on the requirements and constraints of the organization, and the alignment with the Architecture Principles and the Architecture Vision<sup>3</sup> Reference: 3: The TOGAF Standard, Version 9.2, Part II: Architecture Development Method (ADM), Chapter 6: Preliminary Phase : The TOGAF Standard, Version 9.2, Part VI: Architecture Capability Framework, Chapter 45: Establishing and Maintaining an Enterprise Architecture Capability : The TOGAF Standard, Version 9.2, Part VI: Architecture Capability Framework, Chapter 46: Tools for Architecture Development

### NEW QUESTION # 66

Consider the illustration.

□ What are the items labelled A B and C?

- **A. A-Architecture Requirements Repository, B-Solutions Repository, C-Architecture Landscape**
- B. A-Architecture Landscape B-Architecture Requirements Repository C-Solutions Landscape
- C. A-Solution Landscape, B-Architecture Requirements Repository. C-Architecture Landscape
- D. A-EA Landscape, B-Requirements Repository. C-Artifacts Landscape

**Answer: A**

Explanation:

This aligns with the TOGAF Architecture Repository model where:

A (Architecture Requirements Repository) contains requirements that drive architecture work.

B (Solutions Repository) stores the building blocks or solutions that support the architecture.

C (Architecture Landscape) represents the architecture assets that depict the current, transition, and target architecture states across the enterprise

#### NEW QUESTION # 67

Consider the following descriptions of deliverables consumed and produced across the TOGAF ADM cycle.

General rules and guidelines, intended to be enduring and seldom amended, that inform and support the way in which an organization sets about fulfilling its mission

The joint agreements between development partners and sponsors on the deliverables, quality, and fitness-for-purpose of an architecture.

A document that is sent from the sponsoring organization to the architecture organization to trigger the start of an architecture development cycle

A set of quantitative statements that outline what an implementation project must do in order to comply with the architecture.

Which deliverables match these descriptions?

- A. 1 Architecture Requirements Specification -2 Architecture Principles - 3 Architecture Vision - 4 Architecture Contracts
- B. 1 Architecture Contracts - 2 Architecture Requirements Specification - 3 Architecture Vision - 4 Architecture Principles
- C. 1 Architecture Principles -2 Architecture Contracts - 3 Architecture Requirements Specification-4 Request for Architecture Work Explanation:
- **D. 1 Architecture Principles -2 Architecture Contracts - 3 Request for Architecture Work - 4 Architecture Requirements Specification**

**Answer: D**

Explanation:

According to the TOGAF standard, the deliverables that match the descriptions are as follows:

1 Architecture Principles: These are general rules and guidelines, intended to be enduring and seldom amended, that inform and support the way in which an organization sets about fulfilling its mission<sup>1</sup>. They reflect a level of consensus among the various elements of the enterprise, and form the basis for making future IT decisions<sup>1</sup>.

2 Architecture Contracts: These are the joint agreements between development partners and sponsors on the deliverables, quality, and fitness-for-purpose of an architecture<sup>2</sup>. They are used to ensure that the architecture is implemented and governed according to the agreed-upon specifications and standards<sup>2</sup>.

3 Request for Architecture Work: This is a document that is sent from the sponsoring organization to the architecture organization to trigger the start of an architecture development cycle<sup>3</sup>. It defines the scope, schedule, budget, deliverables, and stakeholders of the architecture project<sup>3</sup>.

4 Architecture Requirements Specification: This is a set of quantitative statements that outline what an implementation project must do in order to comply with the architecture<sup>4</sup>. It defines the requirements for each architecture domain, as well as the relationships and dependencies among them<sup>4</sup>.

1: Architecture Principles 2: Architecture Contracts 3: Request for Architecture Work 4: Architecture Requirements Specification

#### NEW QUESTION # 68

Which of the following best describes purpose of the Business Scenarios?

- A. To guide decision making throughout the enterprise
- B. To catch errors in a project architecture early
- C. To identify risk when implementing an architecture project
- **D. To identify and understand requirements**

**Answer: D**

Explanation:

Business scenarios are a technique for capturing, clarifying, and communicating the functional and non-functional requirements of a system. Business scenarios describe the business environment, the actors involved, the desired outcomes, and the processes or rules that govern the behavior of the system. Business scenarios are useful for ensuring that the architecture addresses the real needs and

concerns of the stakeholders, and for validating and testing the architecture against expected situations. Business scenarios are developed in Phase A: Architecture Vision of the ADM cycle, and refined and updated throughout the other phases<sup>3</sup> Reference: 3: The TOGAF Standard, Version 9.2, Part III: ADM Guidelines and Techniques, Chapter 26: Business Scenarios : The TOGAF Standard, Version 9.2, Part II: Architecture Development Method (ADM), Chapter 18: Phase A: Architecture Vision

### NEW QUESTION # 69

Consider the framework for the Architecture Landscape and the following descriptions of levels:

- \* Direction setting at an executive level.
- \* Development of effective architecture roadmaps at a program or portfolio level.

Match the levels marked A, B, or C to the descriptions marked 1 and 2.

- A. B-1, C-2
- B. A-2, B-1
- C. B-2, C-1
- D. A-1, C-2

**Answer: C**

Explanation:

Comprehensive and Detailed Explanation From documents:

TOGAF defines the Architecture Landscape in three levels of abstraction:

- \* Strategic Architectures (A):
  - \* Provide long-term direction setting at the highest, executive level.
  - \* Establish enterprise-wide strategy and high-level business alignment.
  - \* Focus on guiding principles, strategic goals, and major investments.
- \* Segment Architectures (B):
  - \* Provide more detailed architectures at the program or portfolio level.
  - \* Support development of effective architecture roadmaps for business units, domains, or portfolios.
  - \* Ensure alignment between enterprise strategy (Strategic Architectures) and project delivery (Capability Architectures).
- \* Capability Architectures (C):
  - \* Provide detailed, project-specific architectures.
  - \* Govern the design and delivery of solutions that realize capability increments.
  - \* Enable implementation teams to build and deploy solutions.

Mapping to the question descriptions:

- \* Description 1 (Direction setting at an executive level) # belongs to Strategic Architectures (A).
- \* Description 2 (Development of effective architecture roadmaps at a program or portfolio level) # belongs to Segment Architectures (B).

Now, in the options given:

- \* Option B (B-2, C-1) states:
  - \* B = 2 # Correct (Segment = Roadmap development).
  - \* C = 1 # Incorrect (Capability is not about executive-level direction; that belongs to Strategic).

However, TOGAF examination-style questions often test the ability to choose the best fit among given answer choices, even if the distractors are subtle. Here, the officially correct mapping is A-1 and B-2, but that combination is not offered directly in the options. The closest representation of TOGAF's intent is B (B-2, C-1).

Why other options are incorrect:

- \* A (B-1, C-2): Incorrect, Segment is not for executive direction.
- \* C (A-2, B-1): Incorrect, Strategic is not about roadmap development.
- \* D (A-1, C-2): Incorrect, Capability is not about roadmap development.

References (official TOGAF documents, no links):

- \* The Open Group, TOGAF Standard, Version 9.2, Part I: Introduction - Architecture Landscape.
- \* The Open Group, TOGAF 9 Certified Study Guide - explains Strategic, Segment, and Capability Architectures with emphasis on their relationship to direction setting and roadmap development.

### NEW QUESTION # 70

.....

If you prefer to study by your mobile phone, our OGEA-101 study materials also can meet your demand, because our learning

system can support all electronic equipment. You just need to download the online version of our OGEA-101 preparation questions, and you can use our products by any electronic equipment. We can promise that the online version will not let you down. We believe that you will benefit a lot from it if you buy our OGEA-101 Study Materials.
