

# Pass Guaranteed Quiz Pegasystems - PEGACPRSA22V1 - Certified Pega Robotics System Architect 22–Professional New Mock Test

2026 Latest Pass4suresVCE PEGACPRSA22V1 PDF Dumps and PEGACPRSA22V1 Exam Engine Free Share:  
[https://drive.google.com/open?id=1Te\\_it8Imsd6\\_1neTJO7Xk3QGSHnQ04Pv](https://drive.google.com/open?id=1Te_it8Imsd6_1neTJO7Xk3QGSHnQ04Pv)

You will have good command knowledge with the help of our PEGACPRSA22V1 study materials. The certificate is of great value in the job market. Our PEGACPRSA22V1 learning prep can exactly match your requirements and help you pass PEGACPRSA22V1 exams and obtain certificates. As you can see, our products are very popular in the market. Time and tides wait for no people. Take your satisfied PEGACPRSA22V1 Actual Test guide and start your new learning journey. After learning our PEGACPRSA22V1 learning materials, you will benefit a lot. Being brave to try new things, you will gain meaningful knowledge.

Becoming a certified Pega Robotics System Architect can open up new job opportunities and increase your earning potential. It is a highly sought-after certification in the field of robotic automation, and it is recognized by organizations around the world. By passing the PEGACPRSA22V1 exam, you can demonstrate your expertise in Pega Robotics and gain a competitive edge in the job market.

The PEGACPRSA22V1 certification exam is designed for professionals who are involved in the design, development, and implementation of Pega Robotic Automation solutions. PEGACPRSA22V1 Exam measures the candidate's understanding of the Pega Robotic Automation architecture, the tools and techniques used to design and develop automation solutions, and the best practices for implementing and maintaining a Pega Robotic Automation solution.

## New PEGACPRSA22V1 Mock Test & Free PDF 2026 Realistic Pegasystems Valid Certified Pega Robotics System Architect 22 Test Online

In the present situation, you will find companies laying off their employees without any notice or prior information. They are just receiving an email and the next moment they have no access to the company network. So to avoid all this, you have to keep yourself updated with the new version of technologies and applications. You have to become one of Certified Pega Robotics System Architect 22 (PEGACPRSA22V1) certification holders who survived the laying off situation and are still in a great position in their company. You cannot afford to lose it when you need your job the most.

Pegasystems PEGACPRSA22V1 certification exam is designed to test the knowledge and skills of individuals seeking to become a Certified Pega Robotics System Architect. Certified Pega Robotics System Architect 22 certification program is intended for professionals who want to demonstrate their expertise in designing and developing robotic automation solutions using Pega's Robotics Studio. PEGACPRSA22V1 Exam covers various topics such as identifying automation opportunities, designing robotic solutions, developing and testing robotic automations, and deploying robotic solutions.

## Pegasystems Certified Pega Robotics System Architect 22 Sample Questions (Q10-Q15):

### NEW QUESTION # 10

A solution design document outlines several projects for the solution. You are assigned to the Loan Servicing project (LoanSvcPrj). The project uses the Interaction Framework function to communicate with the other projects. Which three toolbox project items do you add to LoanSvcPrj? (Choose three.)

- A. Interaction.xml
- B. Activity
- C. Interaction Manager
- D. Message Manifest
- E. String Variable

**Answer: A,B,E**

### NEW QUESTION # 11

What is the scope of a const\_msgID variable that you add to the project from the Toolbox tab of the Globals designer?

- A. A const\_msgID is a constant variable, which means that it has a local scope.
- B. A const\_msgID variable has a global scope, which means that it is accessible from every automation of the project.
- C. A const\_msgID variable has a local scope, which means that it is accessible from the automation in which you created it.
- D. A const\_msgID variable has a local scope but you can change the scope by right-clicking and selecting Move to Globals.

**Answer: B**

Explanation:

Comprehensive and Detailed Explanation from Pega Robotics System (Exact Extract & Context):

According to the Pega Robotics Studio User Guide - Globals Designer Reference:

"The Globals designer provides a workspace where you can define variables, constants, and lists that have global scope, meaning they can be accessed from any automation or component within the project." When a variable (such as const\_msgID) is added from the Toolbox tab of the Globals designer, it is automatically created as a global constant.

"Constants created in the Globals designer are read-only values accessible throughout the project. Constants defined here are available to all automations and cannot be modified at runtime." In contrast, variables declared directly within an automation have local scope, accessible only to that specific automation. But when added via the Globals designer, the constant or variable is promoted to a project-wide scope.

Therefore:

- \* const\_msgID is a global constant accessible from every automation in the project.
- \* It cannot be changed at runtime.
- \* It is ideal for fixed identifiers, keys, or configuration constants used across multiple automations.

Document References (Exact Extracts Source)

- \* Pega Robotics Studio User Guide - Globals Designer and Variable Scope
- \* Pega Robotics Studio Automation Design Concepts - Constants and Global Variables
- \* Pega Robotics System 8.7 Certification Study Guide - Variable Scope and Project Context Section Final Verified answer: A

### NEW QUESTION # 12

Match the term on the left with its description on the right.

□

**Answer:**

Explanation:

□ Explanation:

□ In Pega Platform, different integration points exist to trigger robotic automations (either desktop or unattended) through Pega Robot Studio. Each serves a specific purpose depending on whether the automation retrieves data, runs as part of a user interaction, or executes through background processing.

According to the Pega Robotics System Design and Implementation Guide, section "Integration Points Between Pega Platform and Robotic Automations", the following definitions are provided:

Data Pages:

"A Data Page can be configured with a Robotic Desktop Automation (RDA) data source.

This allows the case to call a robotic automation to retrieve or send data between the Pega Platform and an external system.

The automation runs in the background to provide data enrichment or lookup functions." Flow Actions:

"Flow actions can invoke robotic desktop automations before or after a case step executes.

They enable synchronous automation interaction as part of a user's workflow in Pega Platform." Robot Queues:

"A Robot Queue contains assignments that are sent to unattended robots for background processing.

One or more robots pick assignments from the queue and execute the configured automations associated with those cases." Detailed Reasoning:

\* Data Pages # Used to source or update data automatically from external systems by triggering a Robotic Desktop Automation (RDA) or Robotic Process Automation (RPA).

\* Hence, it "sources application data from Pega Platform applications by calling automations."

\* Flow Action # Used within a case to trigger RDA automations either before or after a step.

\* Hence, it "calls automations to run before or after completing a step."

\* Robot Queue # Used by unattended robots managed through Robot Manager to fetch assignments and perform automations.

\* Hence, it is the process by which "one or more robots access the case assignment to perform the automations." Final Correct

Matching Order:

Term

Description

Data pages

Source application data from Pega Platform applications by calling automations.

Flow action

Within the case, it calls automations to run before or after completing a step.

Robot queue

One or more robots access the case assignment to perform the automations.

Reference:Extracted and verified from Pega Robotics System Design and Implementation Guide, Integration Points Between Pega Platform and Robotic Automations section (Pega Robotics 19.1 and later).

### NEW QUESTION # 13

You interrogated a web application. All controls and objects matched, and the automations worked as coded.

During the pilot, the solution failed on the web application. The IT department had released a new version of the web application.

Upon review of the new version, you determined that the web page hierarchy changed.

Which interrogation option do you use to correct the solution?

- A. Debug Matching
- B. Default
- C. Replace Control
- D. Select Element

**Answer: C**

Explanation:

References:

### NEW QUESTION # 14

You interrogated a page using Create Global Web Page with the title:

Customer: B Norton| Financial ABC Application

During debugging of an automation using the interrogated web page, you ran the first test using the account B Norton. On the second test, you used S Whitfield. The second debugging failed. After checking the matching of the controls, you recognize the issue.

How do you correct the matching issue?

- A. Modify the Document URL Match Rule.
- B. Modify the Window Text Match Rule.
- C. Reinterrogate the control using Replace Control on the Interrogation Form.
- D. Modify the Document Title Match Rule.

**Answer: D**
