High Hit Rate C_ACDET_2506 Practice Test Provide Prefect Assistance in C_ACDET_2506 Preparation

As most of the people tend to use express delivery to save time, our C_ACDET_2506 preparation exam will be sent out within 5-10 minutes after purchasing. As long as you pay at our platform, we will deliver the relevant exam materials to your mailbox within the given time. Our company attaches great importance to overall services, if there is any problem about the delivery of

C_ACDET_2506 Exam Materials: SAP Certified Associate - Configuring SAP Ariba Strategic Sourcing Suite, please let us know, a message or an email will be available.

SAP Certified Associate - Configuring SAP Ariba Strategic Sourcing Suite Sample Questions (Q58-Q63):

NEW QUESTION # 58
What system is provided by SAP Free of charge and provides an outline of how to deploy SAP Ariba solutions with a task list and project management format?

- A. SAP for Me
- B. SAP Cloud Project Studio
- C. SAP Cloud Application Lifecycle Management
- D. SAP Ariba Enablement Worrkbook

Answer: D

NEW QUESTION # 59
Which of the following languages is used to define defaults on fields within SAP Ariba?

- A. JavaScript
- B. Python
- C. ABAP
- D. Ariba expression language

Answer: D

Explanation:
SAP Ariba uses its proprietary Ariba expression language, based on OGNL (Object-Graph Navigation Language), to define default value expressions on fields. This language supports logical conditions, comparisons, and public Java method calls to create dynamic defaulting logic. ABAP, Python, and JavaScript are not supported languages for field default expressions in SAP Ariba. This expression language provides a concise and powerful way to tailor defaults based on context.

NEW QUESTION # 60
What is the key role of the SAP Deployment Lead assigned to the project?

- A. To perform configuration changes required to the SAP Ariba Strategic Sourcing suite solutions
- B. To advise the customer and partner in solution configurations
- C. To Test and Validate the solution prior to go-live
- D. To act as the liaison between the customer and SAP Support in resolving technical issues and manage customer escalations

Answer: D

NEW QUESTION # 61
A migration is performed for a Greenfield deployment to production, and the status of the Template configuration type indicates it failed. What actions do you take to make the failed template(s) available in production?

- A. The template must always be rebuilt in production
- B. Request SAP intervention
- C. Import the template in production
- D. Import the missing data in production and then import the template in production

Answer: D

Explanation:
When template migration fails in Greenfield deployment, it often means required master data like Flex Master Data or enumerations

are missing in Production. The recommended resolution is to manually load the missing master data into Production first, then manually import the failed templates via the Production import tools. Requesting SAP intervention is unnecessary as this is a customer-side activity.

Importing templates without missing data causes repeated failures, and rebuilding templates is not always required if proper data exists.

NEW QUESTION # 62

Which data elements are shared in a Suite-Integrated Environment? Note: There are 3 correct answers to this question.

- A. Suppliers
- B. Users
- C. Supplier Catalogs
- D. Exception Types
- E. User Group mapping

Answer: A,B,D

NEW QUESTION # 63

......
