

적중율 좋은 F5CAB4 높은 통과율 덤프 공부 덤프 자료

그 외, KoreaDumps F5CAB4 시험 문제집 일부가 지금은 무료입니다: https://drive.google.com/open?id=1i7e1IGdJ_hoTLC5Mcr3bmHxOzi4Cj9k

KoreaDumps를 선택함으로써 여러분은 F5 인증F5CAB4시험에 대한 부담은 사라질 것입니다.우리 KoreaDumps는 끊임 없는 업데이트로 항상 최신버전의 F5 인증F5CAB4시험덤프임을 보장해드립니다.만약 덤프품질을 확인하고 싶다면KoreaDumps 에서 무료로 제공되는F5 인증F5CAB4덤프의 일부본 문제를 체험하시면 됩니다.KoreaDumps 는 100%의 보장도를 자랑하며F5 인증F5CAB4시험을 한번에 패스하도록 도와드립니다.

자신을 부단히 업그레이드하려면 많은 노력이 필요합니다. IT업종 종사자라면 국제승인 IT인증자격증을 취득하는 것이 자신을 업그레이드하는 것과 같습니다. F5인증 F5CAB4시험을 패스하여 원하는 자격증을 취득하려면 KoreaDumps의F5인증 F5CAB4덤프를 추천해드립니다. 하루빨리 덤프를 공부하여 자격증 부자가 되세요.

F5 F5CAB4덤프내용 - F5CAB4유효한 인증공부자료

만약 아직도F5 F5CAB4시험패스를 위하여 고군분투하고 있다면 바로 우리 KoreaDumps를 선택함으로써 여러분의 고민을 날려버릴 수 있습니다, 우리 KoreaDumps에서는 최고의 최신의 덤프자료를 제공 함으로써 여러분을 도와F5 F5CAB4인증자격증을 쉽게 취득할 수 있게 해드립니다. 만약F5 F5CAB4인증시험으로 한층 업그레이드된 자신을 만나고 싶다면 우리KoreaDumps선택을 후회하지 않을 것입니다, 우리KoreaDumps과의 만남으로 여러분은 한번에 아주 간편하게F5 F5CAB4시험을 패스하실 수 있으며,F5 F5CAB4자격증으로 완벽한 스펙을 쌓으실 수 있습니다,

최신 F5-CA F5CAB4 무료샘플문제 (Q63-Q68):

질문 # 63

Refer to the exhibit.

The BIG-IP Administrator is investigating disk utilization on the BIG-IP device. What should the BIG-IP Administrator check next? (Choose one answer)

- A. Results from the platform diagnostics test
- B. Large files on /usr file system
- C. Results from the EUD test
- D. Large files on the / file system

정답: D

설명:

When troubleshooting a BIG-IP system where a partition is reported as full (100% utilization), identifying and removing large or unnecessary files is the immediate next step for restoration of system stability.

* Symptoms of Full Partitions: If a file system (such as the root / or /var) becomes full, it can result in unpredictable system behavior, failure to save configurations, and the inability to log in to the Web UI.

* The Root (/) Partition: This partition is intentionally kept small on F5 systems. It is highly sensitive to the storage of third-party software or diagnostic files that should ideally be stored in the /shared or /var directories.

* Procedural Resolution: To resolve 100% disk usage, administrators should check for large files on the affected partition using CLI commands like `du -ah` or `find / -xdev -type f -exec du {} \; | sort -rn | head -20`.

* Common Culprits: Large files typically causing these issues include old core files, tech support bundles, large diagnostic logs (packet diags), or temporary files created during administrative tasks.

* Diagnostics vs. Remediation: While tests like the EUD (End User Diagnostics) or platform diagnostics are useful for hardware verification, they do not resolve file system exhaustion issues that have already reached a critical 100% state.

질문 # 64

A user needs to generate a QKView to upload to iHealth to determine any issues with upgrading TMOS.

Where can the user generate the QKView in the Configuration Utility?

- A. System > Archives
- B. System > Configuration
- C. System > Software Management
- D. System > Support

정답: D

설명:

Generating a QKView is a standard procedure for identifying device health and upgrade readiness⁴². Within the Configuration Utility, this Control Plane diagnostic tool is located under System > Support⁴³. This utility collects configuration and state data into a single file used by the iHealth 'Upgrade Advisor' to report on known bugs or compatibility issues prior to a version change.

질문 # 65

An organization is performing a major release upgrade to its BIG-IP system. The system is under medium load and has enough disk space to perform the upgrade.

Which pre-upgrade task is disruptive to regular system performance and should be performed during a maintenance window?

(Choose one answer)

- A. Create a QKView
- B. `tmsh save sys config`
- C. Generate a UCS
- D. Reactivate the license

정답: D

설명:

Reactivating a BIG-IP license is a traffic-disruptive operation. During the license reactivation process, the BIG-IP system performs a configuration reload, which results in a temporary interruption of all traffic processing. Because traffic handling is affected, F5 explicitly recommends scheduling license updates during a maintenance window.

This behavior is documented in F5 Knowledge Base articles, which state that license reactivation impacts traffic and must be planned accordingly during upgrades or system changes.

The other options are not considered disruptive:

- * Creating a QKView is primarily a diagnostic task and does not interrupt traffic.
- * Running tmsh save sys config only saves the running configuration to disk.
- * Generating a UCS is resource-intensive but does not reload configuration or interrupt traffic processing.

질문 # 66

Refer to the exhibit.

The BIG-IP Administrator runs the command shown and observes a device trust issue between BIG-IP devices in a device group. The issue prevents config sync on device bigip3.local. What is preventing the config sync?

- A. Next Active Load factor is 0 on bigip1.local
- B. Next Active Load factor is 1 on bigip1.local
- C. Time Delta to local system is
- D. Both devices are standby

정답: C

설명:

Maintaining an accurate and synchronized clock across all members of a device group is a fundamental requirement for the BIG-IP Control Plane to establish and maintain device trust.

* Time Delta Impact: As shown in the exhibit, the "Time Delta to Local Device (sec)" is 12.

* Trust Mechanism: Device trust relies on secure certificate-based communication (SSL/TLS). If the time difference between devices is too large (typically more than a few seconds), the Control Plane cannot validate the certificates, leading to a failure in the trust relationship.

* ConfigSync Failure: When device trust is broken due to time drift, the systems cannot verify the identity of the peer, which directly prevents the ConfigSync process from executing on the affected device, such as bigip3.local in this scenario.

* Resolution: Administrators must ensure that all devices in a high availability pair are configured to use the same reliable NTP servers to keep their system clocks aligned.

The correct command for restoring an encrypted UCS archive via the command line is `D. load /sys ucs < filepath> passphrase <password>`.

질문 # 67

A BIG-IP Administrator needs to update the list of configured NTP servers. In which area of the Configuration Utility should the BIG-IP Administrator perform this update?

- A. System > Preferences
- B. System > Configuration
- C. System > Platform
- D. System > Services

정답: B

설명:

NTP (Network Time Protocol) is vital for management connectivity and HA state synchronization. Correct time is required for log timestamping and device trust group communication. To manage these settings, the administrator navigates to System > Configuration, where general system-level services like NTP and DNS are defined to ensure the Control Plane remains synchronized with the network environment.

질문 # 68
