Free PDF Quiz 2026 The Best SAP C-TS4FI-2023: Trustworthy SAP Certified Associate - SAP S/4HANA Cloud Private Edition, Financial Accounting Exam Torrent

Using computer-aided software to pass the SAP C-TS4FI-2023 exam has become a new trend. Because the new technology enjoys a distinct advantage, that is convenient and comprehensive. In order to follow this trend, our company product such a SAP Certified Associate - SAP S/4HANA Cloud Private Edition, Financial Accounting C-TS4FI-2023 Exam Questions that can bring you the combination of traditional and novel ways of studying.

SAP Certified Associate - SAP S/4HANA Cloud Private Edition, Financial Accounting Sample Questions (Q48-Q53):

NEW QUESTION # 48
You have cleared a customer open item but want to undo this action.
What are the available options? Note: There are 2 correct answers to this question.

- A. Repost the clearing document
- B. Reverse the clearing document
- C. Reset the clearing document
- D. Reset and reverse the clearing document

Answer: C,D

Explanation:
In SAP S/4HANA, when you clear a customer open item (e.g., by matching an invoice with a payment), the system creates a clearing document to mark the transaction as cleared. If you later realize that the clearing was incorrect or needs to be undone, SAP provides specific options to handle this situation. Let's analyze each option to determine the correct answers.
Explanation of Each Option:
C. Reset and reverse the clearing document
* Correct : This option allows you to reset the clearing (i.e., reopen the cleared items) and then reverse the clearing document itself. Reversing the clearing document ensures that the original clearing entry is removed from the system, and the cleared items are restored to their original open status. This is useful if the clearing document contains errors or if the clearing was performed in the wrong period.
* Reference : According to SAP documentation, resetting and reversing the clearing document is a standard procedure to completely undo the clearing process.
D. Reset the clearing document
* Correct : This option allows you to reset the clearing , which reopens the previously cleared items without reversing the clearing document. The clearing document remains in the system as a historical record, but the items are restored to their open status. This is useful if you only need to reopen the items for further processing (e.g., applying a different payment or correcting the clearing).
* Reference : SAP documentation confirms that resetting the clearing document restores the open items while retaining the clearing document for audit purposes.
A. Repost the clearing document
* Incorrect : Reposting the clearing document is not a valid option for undoing a clearing action. Once a clearing document has been created, it cannot be "reposted" to undo the clearing. Instead, you must use the reset or reset-and-reverse functionality to reopen the items.
* Reference : Reposting applies to other types of documents (e.g., erroneous postings) but is not relevant for clearing documents.
B. Reverse the clearing document
* Incorrect : While reversing the clearing document is part of the process, it cannot be done independently. Before reversing the clearing document, you must first reset the clearing to reopen the items. Therefore, this option is incomplete and incorrect on its own.
* Reference : SAP requires the clearing to be reset before the clearing document can be reversed.
Key References to SAP Documentation:
* SAP S/4HANA Finance for Accounts Receivable and Payable : Explains the clearing process and how to undo clearing actions using reset and reversal functionalities.
* SAP Help Portal - Clearing Documents : Provides detailed guidance on resetting and reversing clearing documents in SAP S/4HANA.
* Open Item Management in SAP S/4HANA : Describes how clearing documents affect open items and how to manage them.
* Reversal of Financial Documents : Highlights the steps required to reverse clearing documents after resetting the cleared items.

NEW QUESTION # 49
As a pre-closing activity, selected suppliers are to confirm their balances.
Which confirmation procedure do you use when a response is expected only in case of discrepancies?

* A. Account statement
* B. Balance notification
* C. Balance request
* D. Balance confirmation

Answer: B

Explanation:
In SAP S/4HANA, supplier balance confirmation is a pre-closing activity used to verify the accuracy of open items or balances with suppliers. Different procedures are available depending on the type of response expected from the supplier. Let's analyze each option to determine the correct answer.
Explanation of Each Option:
B. Balance notification
* Correct : The balance notification procedure is used when a response is expected only in case of discrepancies. In this process, the system sends a notification to the supplier with their outstanding balance or open items. If the supplier agrees with the balance, no response is required. However, if there are discrepancies, the supplier is expected to respond and highlight the differences.
* Reference : According to SAP documentation, balance notifications are designed for scenarios where responses are needed only for disputed amounts, making it an efficient method for confirming balances.
A. Account statement
* Incorrect : An account statement provides a detailed overview of all transactions and open items for a supplier account over a specific period. While it can be used for reconciliation purposes, it does not specifically cater to scenarios where a response is

expected only in case of discrepancies. Account statements are typically sent for informational purposes rather than confirmation.

* Reference : Account statements are more comprehensive and do not focus on selective responses for discrepancies.

C. Balance request

* Incorrect : A balance request is a formal request sent to the supplier asking them to confirm their balance. This procedure expects a response from the supplier regardless of whether there are discrepancies or not. It does not align with the requirement of receiving a response only in case of discrepancies.

* Reference : Balance requests require explicit confirmation from the supplier, even if there are no issues with the balance.

D. Balance confirmation

* Incorrect : Balance confirmation is a general term that refers to the process of verifying supplier balances. However, it does not specify the procedure where a response is expected only in case of discrepancies. This option is too broad and does not directly address the requirement.

* Reference : Balance confirmation encompasses various methods, but it does not inherently imply selective responses for discrepancies.

Key References to SAP S/4HANA Documentation:

* SAP S/4HANA Finance for Accounts Payable : Explains the different procedures for supplier balance confirmation, including balance notifications and balance requests.

* SAP Help Portal - Supplier Balance Confirmation : Provides detailed guidance on configuring and executing balance notifications, emphasizing their use for selective responses.

* Pre-Closing Activities in Financial Accounting : Highlights the importance of supplier balance confirmation as part of the financial closing process.

* Reconciliation and Confirmation Procedures : Describes the differences between account statements, balance notifications, and balance requests.

NEW QUESTION # 50

What are the consequences of the activation of segment reporting in Asset Accounting? Note: There are 2 correct answe-rs to this que-stion.

- A. The segment is automatically updated in existing asset master data.
- B. The segment appears in the screen layout for asset master data.
- C. The segment activation can be reversed.
- D. The segment appears in the additional account assignment configuration.

Answer: B,D

NEW QUESTION # 51

You need to explain the concept of noted items in SAP S/4HANA.

Which characteristics are specific to noted items? Note: There are 3 correct answers to this question.

- A. They are managed as open items on customer and vendor accounts.
- B. They generate postings that do not balance.
- C. They can be accessed by the payment program and the dunning program.
- D. They update the general ledger in Entry View only.
- E. They generate statistical postings.

Answer: A,B,E

NEW QUESTION # 52

How would you define Intercompany Matching and Reconciliation (ICMR)? Note: There are 2 correct answers to this question.

- A. It is a solution that can be integrated with Group Reporting.
- B. It is a solution that requires the parallel implementation of SAP Group Reporting Data Collection.
- C. It is a solution that facilitates transaction matching between systems in Central Finance.
- D. It is a solution embedded in the SAP S/4HANA core.

Answer: A,D

Explanation:

Intercompany Matching and Reconciliation (ICMR) is a tool within SAP S/4HANA designed to help organizations identify, match, and reconcile intercompany transactions across different company codes or legal entities. It ensures that intercompany balances and transactions are consistent and accurate, which is critical for financial reporting and consolidation. Let's analyze each option to determine the correct answers.

Explanation of Each Option:

C. It is a solution that can be integrated with Group Reporting.

* Correct : ICMR can be integrated with SAP Group Reporting , which is used for consolidation and external reporting purposes. This integration allows organizations to ensure that intercompany transactions are reconciled before performing consolidation eliminations. By resolving discrepancies at the transactional level, ICMR supports accurate and compliant group reporting.

* Reference : According to SAP documentation, ICMR is designed to work seamlessly with Group Reporting to streamline the reconciliation and consolidation processes.

D. It is a solution embedded in the SAP S/4HANA core.

* Correct : ICMR is embedded in the SAP S/4HANA core , meaning it is part of the standard functionality available in SAP S/4HANA. This eliminates the need for additional systems or interfaces, making it easier to implement and use. The embedded nature of ICMR ensures real-time access to transactional data and improves efficiency in reconciliation processes.

* Reference : SAP documentation confirms that ICMR is a native feature of SAP S/4HANA, leveraging its unified architecture and real-time capabilities.

A. It is a solution that requires the parallel implementation of SAP Group Reporting Data Collection.

* Incorrect : While ICMR can integrate with Group Reporting, it does not require the parallel implementation of SAP Group Reporting Data Collection . ICMR operates independently of Group Reporting Data Collection and can be used solely for reconciling intercompany transactions without consolidating financial statements.

* Reference : ICMR focuses on transactional reconciliation, while Group Reporting Data Collection is specific to consolidation processes and is not a prerequisite for using ICMR.

B. It is a solution that facilitates transaction matching between systems in Central Finance.

* Incorrect : ICMR is primarily designed to reconcile intercompany transactions within SAP S/4HANA or between connected SAP systems. It is not specifically tailored to facilitate transaction matching between systems in a Central Finance (CFIN) landscape. Central Finance has its own tools and processes for reconciling data from non-SAP or legacy systems.

* Reference : Central Finance uses separate reconciliation mechanisms, and ICMR is not directly tied to this scenario.

Key References to SAP S/4HANA Documentation:

* SAP S/4HANA Finance for Intercompany Reconciliation : Explains the purpose and functionality of ICMR and its integration with Group Reporting.

* SAP Help Portal - Intercompany Matching and Reconciliation : Provides detailed guidance on how ICMR works and its role in ensuring accurate intercompany reconciliation.

* Group Reporting Integration : Describes how ICMR supports consolidation processes by integrating with SAP Group Reporting.

* Central Finance Reconciliation : Highlights the differences between ICMR and reconciliation processes in Central Finance.

NEW QUESTION # 53

......

High Hit-Rate SAP - C-TS4FI-2023 - Trustworthy SAP Certified Associate -

SAP S/4HANA Cloud Private Edition, Financial Accounting Exam Torrent
