## Valid Exams SPLK-3002 Torrent Offer You The Best Exam Brindumps | Splunk IT Service Intelligence Certified Admin

The DumpsFree is a leading platform that is committed to offering make the Splunk Exam Questions preparation simple, smart, and successful. To achieve this objective DumpsFree has got the services of experienced and qualified Splunk IT Service Intelligence Certified Admin (SPLK-3002) exam trainers. They work together and put all their efforts and ensure the top standard of DumpsFree Splunk IT Service Intelligence Certified Admin (SPLK-3002) exam dumps all the time.

## Splunk IT Service Intelligence Certified Admin Sample Questions (Q53-Q58):

### NEW QUESTION # 53

Which of the following is a recommended best practice for service and glass table design?

- A. Design glass tables first to discover which KPIs are important.
- B. Always use the standard icons for glass table widgets to improve portability.
- C. Start with base searches, then services, and then glass tables.
- D. Plan and implement services first, then build detailed glass tables.

**Answer: A**

#### NEW QUESTION # 54

Which of the following are characteristics of ITSI service dependencies? (select all that apply)

- A. Impactful dependent services should only be configured to one primary service to avoid false negatives in Multi KPI Alerts.
- B. If a primary service has a dependent service KPI and the KPI's importance level is changed, the dependency is broken.
- C. Setting the dependent service KPI importance level will be treated as any other KPI in the primary service's health score.
- D. It is best practice to use the dependent service's built-in 'ServiceHealthScore' KPI to reflect impact to the primary service.

**Answer: C,D**

Explanation:

In the context of Splunk IT Service Intelligence (ITSI), service dependencies allow for the modeling of relationships between services, where the health of one service (dependent) can affect the health of another (primary).

B) It is best practice to use the dependent service's built-in 'ServiceHealthScore' KPI to reflect impact to the primary service:

Utilizing the 'ServiceHealthScore' KPI of a dependent service as part of the primary service's health calculation is a recommended practice. This approach ensures that changes in the health of the dependent service directly influence the primary service's overall health score, providing a more holistic view of service health within the IT environment.

C) Setting the dependent service KPI importance level will be treated as any other KPI in the primary service's health score: When a dependent service's KPI is incorporated into a primary service, the importance level assigned to this KPI is factored into the primary service's overall health score calculation just like any other KPI. This means that the impact of the dependent service on the primary service can be weighted according to the business significance of the relationship between the services.

The other options are not accurate representations of ITSI service dependencies. Changes in KPI importance levels do not break dependencies, and there is no restriction on configuring impactful dependent services to only one primary service, as dependencies can be complex and multi-layered across various services.

#### NEW QUESTION # 55

There are two departments using ITSI. Finance and Sales. Analysts in each department should not be allowed to see each other's services. What are the role configuration steps required to accomplish this?

- A. itoa\_finance\_admin, inherited from itoa\_admin; itoa\_sales\_admin, inherited from itoa\_team\_admin; itoa\_finance\_analyst, inherited from itoa\_analyst; itoa\_sales\_analyst, inherited from itoa\_team\_analyst.
- B. itoa\_finance\_admin, inherited from itoa\_admin; itoa\_sales\_admin, inherited from itoa\_team\_admin; itoa\_finance\_analyst, inherited from itoa\_analyst; itoa\_sales\_analyst, inherited from itoa\_analyst.
- C. itoa\_finance\_admin, inherited from itoa\_team\_admin; itoa\_sales\_admin, inherited from itoa\_team\_admin; itoa\_finance\_analyst, inherited from itoa\_analyst; itoa\_sales\_analyst, inherited from itoa\_analyst.
- D. itoa\_finance\_admin, inherited from itoa\_admin; itoa\_sales\_admin, inherited from itoa\_team\_admin; itoa\_finance\_analyst, inherited from itoa\_team\_analyst; itoa\_sales\_analyst, inherited from itoa\_team\_analyst.

**Answer: A**

Explanation:

C is the correct answer because teams are a feature of ITSI that allow you to restrict access to service content in UI views based on user roles. To create separate teams for finance and sales analysts, you need to create custom roles that inherit from the itoa\_analyst role, which has read-only access to ITSI content. For example, you can create itoa\_finance\_analyst and itoa\_sales\_analyst roles that inherit from itoa\_analyst. Then, you need to create custom teams that include these roles and assign them to the relevant services.

For example, you can create a finance team that includes the itoa\_finance\_analyst role and assign it to the finance services. Similarly, you can create a sales team that includes the itoa\_sales\_analyst role and assign it to the sales services. This way, analysts in each department can only see their own services and not each other's. Reference: Create teams in ITSI, Assign teams to services in ITSI

#### NEW QUESTION # 56

What is an episode?

- A. A notable event.
- B. A workflow task.
- C. A deep dive.
- D. A notable event group.

**Answer: D**

Explanation:

It's a deduplicated group of notable events occurring as part of a larger sequence, or an incident or period considered in isolation.

Reference: <https://docs.splunk.com/Documentation/ITSI/4.10.2/EA/EpisodeOverview> An episode is a deduplicated group of notable events occurring as part of a larger sequence, or an incident or period considered in isolation. An episode helps you reduce alert noise and focus on the most important issues affecting your IT services. An episode is created by an aggregation policy, which is a set of rules that determines how to group notable events based on certain criteria, such as severity, source, title, and so on.

You can use episode review to view, manage, and resolve episodes in ITSI. The statement that defines an episode is:

C). A notable event group. This is true because an episode is composed of one or more notable events that are related by some common factor.

The other options are not definitions of an episode because:

A). A workflow task. This is not true because a workflow task is an action that you can perform on an episode, such as assigning an owner, changing the status, adding comments, and so on.

B). A deep dive. This is not true because a deep dive is a dashboard that allows you to analyze the historical trends and anomalies of your KPIs and metrics in ITSI.

D). A notable event. This is not true because a notable event is an alert generated by ITSI based on certain conditions or correlations, not a group of alerts.

References: [Overview of Episode Review in ITSI], [Overview of aggregation policies in ITSI]

### NEW QUESTION # 57

Where are KPI search results stored?

- A. KV Store.
- **B. The `itsi_summary` index.**
- C. Output to a CSV lookup.
- D. The default index.

**Answer: B**

Explanation:

Search results are processed, created, and written to the `itsi_summary` index via an alert action.

Reference: <https://docs.splunk.com/Documentation/ITSI/4.10.2/SI/BaseSearch> D is the correct answer because KPI search results are stored in the `itsi_summary` index in ITSI. This index is an events index that stores the results of scheduled KPI searches.

Summary indexing lets you run fast searches over large data sets by spreading out the cost of a computationally expensive report over time.

References: Overview of ITSI indexes

### NEW QUESTION # 58

.....

The SPLK-3002 certificate is one of the popular IT certificates. Success in the SPLK-3002 credential examination enables you to advance your career at a rapid pace. You become eligible for many high-paying jobs with the SPLK-3002 certification. To pass the SPLK-3002 test on your first sitting, you must choose reliable Splunk IT Service Intelligence Certified Admin exam study material. Don't worry about SPLK-3002 test preparation, because DumpsFree is offering SPLK-3002 actual exam questions at an affordable price. Hundreds of IT aspirants have cracked the SPLK-3002 examination by just preparing with our real test questions. If you also want to become a SPLK-3002 certified without any anxiety, download Splunk updated test questions and start preparing today. These real SPLK-3002 Dumps come in desktop practice exam software, web-based practice test, and SPLK-3002 PDF document. Below are specifications of these three formats.
