Our professional IT team of Free4Torrent continues updating and improving AP-219 exam dumps in order to guarantee you win the exam while you are preparing for the exam.

Salesforce Order Management Administrator Accredited Professional

Sample Questions (Q36-Q41):

NEW QUESTION # 36

After deploying a new Lightning Web Component to an org, what should an administrator do to add the component to a Lightning Record Page?

- A. Create a Metadata API (MDAPI) conversion file with the Command Line interface (CLI) then go to the page and adjust the positioning
- **B. Go to the page, edit it and drag the new component onto the page**
- C. Go to Deploy LWC in Setup
- D. Navigate to the Page, Click on the "Custom Component Editor," Click "Publish" on the new component in the list and adjust the positioning

Answer: B

NEW QUESTION # 37

An administrator is configuring delivery methods. What two types of records need to be created?

- **A. Delivery Method**
- B. Product
- **C. Order Delivery Method**
- D. Order Delivery Summary
- E. Product Summary

Answer: A,C

Explanation:

The Order Delivery Method and Delivery Method objects are used to configure delivery methods for orders. A delivery method is a way of delivering an order to a customer, such as standard shipping, express shipping, or in-store pickup. A Delivery Method record defines the name, description, type, and cost of a delivery method. An Order Delivery Method record associates an order with a delivery method and stores additional information such as the delivery address, tracking number, and status. Reference: Order Management Objects, [Delivery Methods]

NEW QUESTION # 38

Which practice should an admin consider when working with the Ensure Funds Async action?

- A. The Invoice ID should be logged before passing it to the Ensure Funds Async action
- **B. The invoice ID should be assigned somewhere in the flow before calling the action**
- C. The invoice object should be cloned to a custom object before calling the action
- D. The invoice object should be logged and cloned to a custom object before calling the action

Answer: B

Explanation:

The Ensure Funds Async action requires the invoice ID as an input parameter. The action checks if there are enough funds available for the invoice and updates the invoice status accordingly. The invoice ID should be assigned somewhere in the flow before calling the action, otherwise the action will fail. Reference: Salesforce Payments and Order Management

NEW QUESTION # 39

Which option is available for an admin to use as middleware to import data to, or export data from Order Management?

- A. Write Apex classes to query the database and write to a file
- B. Use the Developer console
- C. Find an application on AppExchange
- **D. Use Data Loader**
- E. Use Workbench to access the database

Answer: D

Explanation:

Use Data Loader. Data Loader is a client application that allows administrators to bulk import or export data from Salesforce using CSV files. The administrator can use Data Loader to import data into Order Management objects, such as Order Summary, Order Item Summary, Fulfillment Order, etc., or export data from these objects for backup or analysis purposes.

NEW QUESTION # 40

What are two reasons an admin should choose an Event over a Trigger when it comes to building out a solution?

- A. Event order is not guaranteed within a topic
- B. Events cannot be subscribed to in a batch for bulk operations
- C. Events are asynchronous
- D. Events do not participate in a transaction scope

Answer: C,D

Explanation:

Two reasons an admin should choose an Event over a Trigger when it comes to building out a solution are:

Events are asynchronous. This means that events are processed in the background, without blocking the main execution thread. This can improve the performance and user experience of the solution, as well as avoid governor limits and timeouts.

Events do not participate in a transaction scope. This means that events are independent of the transaction that publishes them, and they do not affect the rollback or commit behavior of the transaction. This can avoid unwanted side effects and errors in the solution, as well as decouple the logic from the data.
