

NCP-EUC Complete Exam Dumps & NCP-EUC Valid Test Materials

What's more, part of that Lead2Passed NCP-EUC dumps now are free: <https://drive.google.com/open?id=1HSV0rQxMzbn1nBvQxEGcXuJjBcbMwC-9>

After going through all ups and downs tested by the market, our NCP-EUC real dumps have become perfectly professional. And we bring the satisfactory results you want. Both theories of knowledge as well as practice of the questions in the NCP-EUC Practice Engine will help you become more skillful when dealing with the NCP-EUC exam. Our experts have distilled the crucial points of the exam into our NCP-EUC study materials by integrating all useful content into them.

If you prefer to practice NCP-EUC study guide on paper, NCP-EUC PDF version will be your best choice. And you can also take some notes on them. NCP-EUC PDF version is printable, and you can print them into hard one and take them with you, and you can study them anywhere and anyplace. In addition, NCP-EUC Exam Materials offer you free demo to have a try, so that you can have a deeper understanding of what you are going to learn. You can receive the download link and password within ten minutes for NCP-EUC exam braindumps, therefore you can start your learning immediately.

Nutanix NCP-EUC Valid Test Materials - Valid Exam NCP-EUC Vce Free

To help applicants prepare successfully according to their styles, we offer three different formats of NCP-EUC exam dumps. These formats include desktop-based NCP-EUC practice test software, web-based Nutanix NCP-EUC Practice Exam, and Nutanix Certified Professional - End User Computing (NCP-EUC) 6.10 Exam dumps pdf format. Our customers can download a free demo to check the quality of NCP-EUC practice material before buying.

Nutanix Certified Professional - End User Computing (NCP-EUC) 6.10 Exam Sample Questions (Q41-Q46):

NEW QUESTION # 41

A company wants to test the impact of a security policy before enforcing it and potentially blocking traffic. Which Flow Network Security feature is best for this?

- A. Enforce Mode
- B. Isolation Policy
- C. Quarantine Policy
- D. Monitor Mode

Answer: D

Explanation:

Comprehensive and Detailed Explanation From Exact Extract of Nutanix End User Computing documents:

According to Nutanix Flow Network Security Guide:

* Policy States: Security policies in Nutanix Flow have two primary operating modes: Monitor and Enforce.

* Monitor Mode: In Monitor Mode (Option A), the policy rules are evaluated, and traffic that would have been blocked is logged, but the traffic is allowed to pass.

* Use Case: This is explicitly designed for the scenario described: "testing the impact... before enforcing." It allows the administrator to visualize the flow logs (via the Visualizer) to ensure no legitimate traffic would be dropped, before switching the toggle to Enforce Mode (Option B) which actually blocks the traffic.

NEW QUESTION # 42

Recently, the vice president Of IT infrastructure was migrated from a physical computer to a virtual desktop. The administrator wants to ensure that this user has the best possible experience and wants to be notified if any CPU resource constraints.

The cluster's average CPU utilization is 20%.

What step would help the administrator to know when there are resource problems on the virtual desktop?

- A. Create a new alert policy to alert if the CPU on the virtual desktop is over and configure a Playbook to power off the virtual desktop.
- B. Create a new alert policy to alert if the CPU on the virtual desktop's host is over 90%.
- C. Create a new alert policy to alert if the CPU on the virtual desktop's cluster is over 90%.
- D. Create a new alert policy to alert if the CPU on the virtual desktop is over and configure a Playbook to Slack the information to the administrator,

Answer: D

Explanation:

alert policies are rules that define the conditions for generating alerts on Nutanix clusters¹. You can create custom alert policies based on your specific needs and preferences² Playbooks are automated workflows that perform actions based on triggers such as alerts³. You can create playbooks using predefined alerts or alerts matching criteria³.

To ensure that the vice president of IT infrastructure has the best possible experience and to be notified if any CPU resource constraints on the virtual desktop, one possible solution is to create a new alert policy to alert if the CPU on the virtual desktop is over a certain threshold (for example, 80%) and configure a playbook to send a notification (for example, via email or Slack) to the administrator²³. This way, the administrator can monitor the performance of the virtual desktop and take appropriate actions if needed.

NEW QUESTION # 43

Which scenario represents the best case for how an organization would deploy non-persistent desktops to their employee and customer base?

- A. Private equity traders
- B. Application Quality Assurance Testing
- C. Registration kiosks at a conference
- D. High end developers

Answer: C

Explanation:

This is because registration kiosks are used by multiple customers who do not need to personalize their desktops or applications, and who only need to perform a specific task such as registering or checking in.

Non-persistent desktops can provide a secure and consistent user experience for these customers, and also reduce management

overhead for the organization.

NEW QUESTION # 44

How should the storage containers be configured to follow Nutanix storage best practices?

- A. Use a single container.
Enable Compression and Erasure Coding for both VMS
- B. Use a single container.
Enable Compression and Deduplication for both VMS
- C. Use separate containers.
Enable Compression for non-persistent VMS.
Enable Compression and Deduplication for persistent VMS
- D. Use separate containers.
Enable Compression for persistent VMS.
Enable Compression and Deduplication for non-persistent VMS

Answer: C

Explanation:

Nutanix recommends using separate containers for persistent and non-persistent VMS. For persistent VMS, enable compression and deduplication. For non-persistent VMS, enable compression only. According to Nutanix documentation, it is recommended to use multiple containers, with each container representing an individual performance workload. This allows for better performance isolation and easier management. For example, one container could be used for VDI workloads, while another container could be used for general-purpose workloads.

As for compression and deduplication, it is recommended to enable them for all VMs. Compression reduces the amount of storage space required and increases the performance of the system, while deduplication reduces the amount of duplicate data stored on the system. Erasure coding can also be used as an alternative to replication for data protection.

NEW QUESTION # 45

What code is installed on virtual desktops and enables direct FlexCast Management Architecture (FMA) connections between the virtual desktop and user devices?

- A. Nutanix Guest Tools (NGT)
- B. Citrix Workspace app
- C. VirtIO Device Drivers
- D. Virtual Delivery Agent (VDA)

Answer: D

Explanation:

Comprehensive and Detailed Explanation From Exact Extract of Nutanix End User Computing documents:

According to Citrix Virtual Apps and Desktops architecture documentation utilized in Nutanix EUC designs:

* VDA Functionality: The Virtual Delivery Agent (VDA) is the essential software component that must be installed on every machine (virtual or physical) that delivers applications or desktops.

* FMA Role: The VDA registers with the Delivery Controller (Broker) and manages the FMA (FlexCast Management Architecture) connection between the machine and the user device. It establishes and manages the HDX connection, allowing the Citrix Workspace app (on the client side) to connect directly to the desktop session.

* Distinction:

* Citrix Workspace app is installed on the client device (endpoint), not the virtual desktop.

* VirtIO drivers are lower-level drivers for disk/network I/O virtualization on AHV, not FMA connection brokers.

* NGT provides Nutanix-specific fabric features (SSR, FLR), not Citrix session connectivity.

NEW QUESTION # 46

.....

Lead2Passed's braindumps provide you the gist of the entire syllabus in a specific set of questions and answers. These study questions are most likely to appear in the actual NCP-EUC exam. The Certification exams are actually set randomly from the
