

1z0-1054-25 Prüfungsfragen Prüfungsvorbereitungen 2026: Oracle Financials Cloud: General Ledger 2025 Implementation Professional - Zertifizierungsprüfung Oracle 1z0-1054-25 in Deutsch Englisch pdf downloaden

Möchten Sie die Oracle 1z0-1054-25 Zertifizierungsprüfung mühelos bestehen? Die Schulungsmaterialien von Fast2test über Oracle 1z0-1054-25 Zertifizierung sind eine gute Wahl. Die Testaufgaben von Oracle 1z0-1054-25 Prüfung aus Fast2test enthalten alle Inhalte und Antworten, die Sie bei der 1z0-1054-25 Prüfung wissen müssen. Daher können Sie in begrenzter Zeit die Schwerpunkte der 1z0-1054-25 Prüfung greifen und einmalig bestehen, so dass Sie Ihren beruflichen Wert erhöhen und näher zu Ihrem Erfolg kommen können.

Oracle 1z0-1054-25 Prüfungsplan:

Thema	Einzelheiten
Thema 1	Processing Intercompany: This domain assesses the skills of Finance Integration Specialists in configuring and managing intercompany transactions. Candidates must understand balancing rules, clearing configurations, and transaction processing, as well as how to maintain intercompany reconciliations in multi-entity structures.
Thema 2	Configuring Financial Reports: This portion of the exam measures the abilities of Financial Reporting Analysts and includes creating and managing a range of reports using tools like the Financial Reporting Center, Web Studio, OTBI, Smart View, and Dashboards. Candidates must know how to define account groups, set up infolets, and build custom analytics tailored to user needs.
Thema 3	Implementing Enterprise and Financial Reporting Structures: This section of the exam measures skills of Oracle ERP Implementation Consultants and covers the core components used in setting up enterprise structures and reporting configurations. It assesses knowledge in defining legal entities, jurisdictions, and geographies, as well as the design and configuration of Chart of Accounts. Candidates must also demonstrate how to set up and secure chart structures and manage reporting calendars and currencies.

Thema 4	Implementing Ledgers: This part evaluates the competencies of Financial Systems Analysts and focuses on defining and configuring ledgers within Oracle Financials. Candidates are expected to manage ledger-level security and understand how to utilize General Ledger Balances Cubes for better financial visibility and reporting accuracy.
Thema 5	- Using AI - ML - Mobile and Other Automation Features: This final section assesses Finance Transformation Architects and focuses on the business value derived from incorporating AI, machine learning, and mobile capabilities in Oracle Financials. Candidates are expected to understand automation use cases and the practical benefits these modern features offer in streamlining financial operations.
Thema 6	Implementing and Managing Journals: This section targets Oracle General Ledger Consultants and covers the full cycle of journal processing—from creation through approval to management. It includes configuration of journal-related objects and understanding how journals are sourced, tracked, and approved using predefined rules and workflows.

Die Oracle 1z0-1054-25 Prüfungssoftware von unserem Fast2test Team zu benutzen bedeutet, dass Ihre Prüfungszertifizierung der Oracle 1z0-1054-25 ist gesichert. Zaudern Sie noch? Laden Sie unsere kostenfreie Demo und probieren Sie mal!

Oracle Financials Cloud: General Ledger 2025 Implementation Professional 1z0-1054-25 Prüfungsfragen mit Lösungen (Q43-Q48):

43. Frage

You entered across-validation rules to prevent the balance sheet cost center (000) from being used with Profit and Loss Accounts (4000-ZZZZ).

The following combinations exist in the Code Combination table:

- * 01-000-4110-00
- * 01-000-5299-000
- * 01-000-5105-000
- * 01-000-7640-00

Which two statements are true regarding cross-validation rules?

- A. The rules validate and apply to new accounts only.
- B. You need to run the Cross-Validation Rules process to list and optionally disable combinations that violate rules.
- C. The rules will validate and apply to new and existing accounts.
- D. You need to run the Cross-Validation Rule Violations process to allow rules to apply to existing combinations that violate rules.
- E. There is no need to create cross-validation rules if Dynamic Combination Creation Allowed is not enabled for your chart of accounts instance.

Antwort: C,D

44. Frage

You are capturing rental costs for a building in a corporate cost center. At month end, you want to allocate those costs to the cost centers in the building based on the floor area occupied. A statistical journal has been entered to record the floor area. You use Calculation Manager to create the allocation.

Where do you reference the statistical balance within the allocation component?

- A. Target
- **B. Source**
- C. Offset
- D. Basis
- E. Allocation Range

Antwort: B

Begründung:

The source is where you specify the amount to be allocated. You can use various sources, such as account balances, fixed amounts, or statistical balances. In this case, you want to use the statistical balance of the floor area as the source of the allocation. The basis is where you specify the driver or factor that determines how the source amount is distributed among the targets. The target is where you specify the destination accounts that receive the allocated amount. The offset is where you specify the account that records the opposite side of the allocation entry. The allocation range is where you specify the scope of the allocation, such as the ledger, balancing segment, or legal entity. References:

45. Frage

Which two statements are true about balances cubes in General Ledger?

- A. They are updated automatically when the Translation process is run.
- **B. A new balances cube is created for a unique combination of ledger and currency.**
- **C. New dimensions can be added to a General Ledger balances cube.**
- D. They are updated automatically when the Revaluation process is run.
- E. They are updated automatically when the General Ledger period is opened.

Antwort: B,C

Begründung:

Balances cubes are multidimensional databases that store financial balances for interactive reporting and analysis. A balances cube is created for each unique combination of ledger and currency, and it contains dimensions such as chart of accounts segments, periods, scenarios, and other user-defined attributes. New dimensions can be added to a balances cube by using the Manage Balances Cube Dimensions task in General Ledger. Balances cubes are updated automatically when journals are posted in General Ledger, and they can also be refreshed manually by using the Refresh Balances Cube task. Balances cubes are not affected by the Translation or Revaluation processes, as these processes only update the balances tables in General Ledger. References:

* Overview of Oracle General Ledger Balances Cubes1

* Considerations for General Ledger Balances Cubes2

* Overview of Oracle Essbase Balances Cubes3

46. Frage

You are planning to create an Income Statement using Smart View.

Which Smart View tool should you use for this?

- A. Smart Slices
- **B. Ad Hoc Analysis**
- C. Query Designer
- D. Smart Queries

Antwort: B

Begründung:

To create an Income Statement using Smart View, you should use Ad Hoc Analysis. Ad Hoc Analysis is a Smart View tool that allows users to view and analyze financial data from General Ledger Cloud using Essbase cubes. Users can create reports such as Income Statements or Balance Sheets by selecting dimensions and members from Essbase cubes and retrieving data into Excel worksheets. Users can also perform actions such as drilling down, pivoting, zooming in or out, or expanding or collapsing members

47. Frage

Which two allow access to the BI Catalog for creating an Oracle Transactional Business Intelligence analysis?
(Choose two.)

- **A. Enterprise Performance Management Workspace**
- B. Business Process Management Workspace
- C. Universal Content Management Workspace
- D. Scheduled Processes
- **E. Reports and Analytics**

Antwort: A,E

Begründung:

The two options that allow access to the BI Catalog for creating an Oracle Transactional Business Intelligence analysis are Reports and Analytics and Enterprise Performance Management Workspace. Reports and Analytics is a tool that allows users to access, create, edit, and share reports and analyses using data from various sources, including Oracle Transactional Business Intelligence. Users can access Reports and Analytics from various pages in Oracle Fusion Applications or from Oracle Fusion Cloud Service Console. Enterprise Performance Management Workspace is a tool that allows users to access, create, edit, and share reports and analyses using data from various sources, including Oracle Transactional Business Intelligence. Users can access Enterprise Performance Management Workspace from Oracle Fusion Cloud Service Console or from a web browser. Universal Content Management Workspace is not an option that allows access to the BI Catalog for creating an Oracle Transactional Business Intelligence analysis, as this is a tool that allows users to manage documents and other digital content in Oracle Fusion Applications. Business Process Management Workspace is not an option that allows access to the BI Catalog for creating an Oracle Transactional Business Intelligence analysis, as this is a tool that allows users to monitor and manage business processes in Oracle Fusion Applications. Scheduled Processes is not an option that allows access to the BI Catalog for creating an Oracle Transactional Business Intelligence analysis, as this is a tool that allows users to submit, monitor, and manage scheduled processes in Oracle Fusion Applications.
