

1Z0-1055-25 Exams Torrent & 1Z0-1055-25 New Question

P.S. Free & New 1Z0-1055-25 dumps are available on Google Drive shared by GetValidTest: https://drive.google.com/open?id=1_S-JSQWF10zRtCfbN8o_VC0c15KOGoyC

Our 1Z0-1055-25 study guide provide you with three different versions including PC、 App and PDF version. Each version has the same questions and answers, and you can choose one from them or three packaged downloads of 1Z0-1055-25 training materials. In addition to a wide variety of versions, our learning materials can be downloaded and used immediately after payment. We believe you will understand the convenience and power of our 1Z0-1055-25 Study Guide through the pre-purchase trial.

Oracle 1Z0-1055-25 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none">Implementing Payments: This section of the exam measures skills of Payments Configuration Specialists and focuses on the payment lifecycle in the Oracle Fusion Payables module. It includes understanding the supplier payment process, AI role in automation, and the configuration of payment options, methods, disbursement choices, and process profiles. The section also involves managing approval workflows and payment process templates for secure and accurate disbursement management.

Topic 2	<ul style="list-style-type: none"> Implementing Accounts Payable Balances: This section of the exam measures skills of Finance Operations Managers and covers Accounts Payable (AP) reporting, analysis, and period closing activities. It explains AP balance configurations, calendar management, and reconciliation with the General Ledger. Candidates must understand the setup of aging periods, payables calendars, and best practices for ensuring accurate financial close processes.
Topic 3	<ul style="list-style-type: none"> Implementing Expenses: This section of the exam measures skills of Expense Management Administrators and focuses on managing and configuring employee expense processes. It includes expense report processing, approval rules, and audit policies. Candidates must understand system configurations for templates, corporate card programs, conversion rate policies, travel integration, and AI-driven automation in expense management.
Topic 4	<ul style="list-style-type: none"> Setting up Common Configurations in the Supplier Invoice to Payments Process This section of the exam measures skills of Accounts Payable Analysts and focuses on understanding the core setup required for supplier invoicing and payment processes. It covers the Enterprise Structure, Financial Reporting Structure, and Data Security model. Candidates must know the purpose of Business Units and Reference Sets and be able to manage Supplier and Bank Account Master Data effectively.
Topic 5	<ul style="list-style-type: none"> Implementing Supplier Invoices: This section of the exam measures skills of Financial Systems Specialists and covers the setup and processing of supplier invoices. It focuses on understanding supplier invoice processing, AI-assisted automation, and key configurations such as invoice options, distribution sets, tolerances, holds, approvals, and release procedures. Candidates also learn how to manage business rules for invoice validation and processing efficiency.

1Z0-1055-25 Exams Torrent Unparalleled Questions Pool Only at GetValidTest

Our experts have devised a set of exam like 1Z0-1055-25 practice tests for the candidates who want to ensure the highest percentage in real exam. Doing them make sure your grasp on the syllabus content that not only imparts confidence to you but also develops your time management skills for solving the test comprise given time lim. 1Z0-1055-25 Practice Tests comprise a real exam like scenario and are amply fruitful to make sure a memorable success in 1Z0-1055-25 exam.

Oracle Fusion Cloud Financials: Payables and Expenses 2025 Implementation Professional Sample Questions (Q25-Q30):

NEW QUESTION # 25

As an Oracle Payables Subject Matter Expert, you are familiarizing yourself with Intelligent Document Recognition (IDR). After detailed review, you consider Adaptive Learning one of the most beneficial features of IDR. Adaptive learning increases the accuracy of invoice scanning and improves touchless processing. When users make corrections in the interactive viewer, each invoice edit trains the algorithms and improves future recognition.

Which is NOT a key consideration for Adaptive Learning?

- A. Bill-To Recognition from Invoice Document
- B. Sharing Adaptive Learning Between Environments
- C. Adaptive Learning for Invoice Lines
- D. Legal Entity Recognition from Invoice Document
- E. Adaptive Learning for Routing Attributes

Answer: A

NEW QUESTION # 26

As an Oracle Financials Cloud Consultant, you are familiarizing yourself with the new features in Adaptive Learning using IDR. You recently learned about Adaptive Learning for Invoice Lines where the interactive invoice viewer can be used to make corrections to

certain invoice line-level attributes.

Which are the three line-level attributes where the interactive invoice viewer can be used to make corrections?

- A. Invoice Date
- B. Invoice Requestor
- C. Quantity
- D. Description
- E. Invoice Number
- F. Amount
- G. Supplier

Answer: C,D,F

NEW QUESTION # 27

You recently processed a payment for a vendor and later discovered that the payment was made in error and needs to be voided. While voiding the payment, you selected Cancel as the Invoice Action. After performing the invoice voiding, you notice that the invoice is not cancelled; instead, it has an Invoice Cancel hold applied to it.

What is the reason for this?

- A. The invoice date is not in the current open period.
- B. The invoice has been partially paid by another payment.
- C. The invoice is already on hold.

Answer: B

Explanation:

Comprehensive and Detailed In-Depth

In Oracle Payables, voiding a payment involves specific actions that affect the associated invoices. When a payment is voided, users have the option to select an Invoice Action, such as Cancel, Hold, or None. The chosen action determines the subsequent status of the invoice linked to the voided payment.

A . The invoice date is not in the current open period.

If an invoice's date falls outside the current open accounting period, certain actions may be restricted. However, this condition does not specifically result in an Invoice Cancel hold being applied when attempting to void a payment. Therefore, this is not the reason for the observed behavior.

B . The invoice is already on hold.

An invoice that is already on hold may have restrictions on further processing. However, the presence of an existing hold does not directly lead to the application of an Invoice Cancel hold during the voiding process. Thus, this is not the cause of the issue.

C . The invoice has been partially paid by another payment.

When an invoice has been partially paid by multiple payments, voiding one of the payments and selecting Cancel as the Invoice Action does not cancel the invoice. Instead, Oracle Payables applies an "Invoice Cancel" hold to the invoice. This hold indicates that the invoice cannot be fully canceled because it has been partially satisfied by another payment. To resolve this, the remaining payments must be addressed appropriately before the invoice can be canceled. This behavior is documented in Oracle's guidelines, which state that attempting to cancel an invoice partially paid by another payment results in an Invoice Cancel hold being applied. docs.oracle.com

Understanding the conditions under which Invoice Actions apply is crucial for effective invoice and payment management in Oracle Payables. Recognizing that partially paid invoices cannot be canceled outright helps prevent processing errors and ensures accurate financial records.

NEW QUESTION # 28

An installment meets all the selection criteria of a Payment Process Request, but it still does not get selected for payment processing. What are the two reasons for this?

- A. The invoice requires approval.
- B. The pay-through date is in a future period.
- C. The invoice needs re-validation.
- D. The pay-through date is in a closed Payables period.
- E. The invoice has not been accounted.

Answer: A,C

Explanation:

Comprehensive and Detailed In-Depth

In Oracle Financials Cloud, even when an installment meets the selection criteria of a Payment Process Request (PPR), certain conditions can prevent it from being selected for payment processing. Understanding these conditions is crucial for troubleshooting and ensuring a smooth payment workflow.

Analysis of Each Option:

A . The pay-through date is in a future period.

The pay-through date in a PPR determines the latest due date of invoices to be included for payment. Setting this date in the future is a common practice to include all invoices due up to that date. Therefore, having a pay-through date in a future period would not prevent installments from being selected; instead, it broadens the selection criteria. This is not a reason for an installment not being selected.

B . The pay-through date is in a closed Payables period.

The pay-through date affects which invoices are selected based on their due dates, but it does not directly relate to the status of accounting periods. While processing payments in a closed period is not allowed, the pay-through date itself being in a closed period does not prevent installment selection. Therefore, this is not a valid reason for an installment not being selected.

C . The invoice needs re-validation.

Invoices that have undergone changes affecting their payment attributes may require re-validation. If an invoice is in a status indicating it needs re-validation, it will not be selected for payment processing until the validation process is successfully completed.

This ensures that all invoice data is accurate and meets the necessary criteria for payment. According to Oracle documentation, an installment might not get selected if "The invoice must be revalidated." docs.oracle.com D . The invoice requires approval.

Invoices often need to go through an approval workflow to ensure their legitimacy and accuracy. If an invoice has not received the necessary approvals, it remains in a pending status and is excluded from payment processing. Ensuring that all invoices are approved is essential for them to be selected in a PPR. The Oracle documentation states that an installment might not get selected if "The invoice requires approval." docs.oracle.com E . The invoice has not been accounted.

While accounting is a critical aspect of financial management, the accounting status of an invoice does not typically prevent it from being selected for payment. Invoices can be selected and paid even if they have not yet been accounted, with accounting entries being created subsequently. Therefore, the lack of accounting is not a reason for an installment not being selected in a PPR.

Conclusion:

The two primary reasons an installment, despite meeting selection criteria, might not be selected for payment processing are:

C . The invoice needs re-validation.

D . The invoice requires approval.

Ensuring that all invoices are validated and approved is essential for their inclusion in payment processing.

NEW QUESTION # 29

You are an Expenses Manager at a large company and need to address complaints from your corporate card provider about delayed transaction payments incurred by former employees who are now inactive. To ensure timely and efficient processing of valid business charges posted to an inactive employee's corporate credit card, you can run the following two processes: Upload Corporate Card Transactions and Process Corporate Card Transactions for Inactive Employees.

Which two are capabilities included in these processes?

- A. Grace Period
- B. Outstanding Cash Advances
- C. Employee Termination Date
- D. Individual Pay Liability

Answer: A,C

Explanation:

Comprehensive and Detailed In-Depth

In Oracle Financials Cloud, managing corporate card transactions for inactive employees is crucial to maintain timely payments and avoid disputes with card providers. The processes Upload Corporate Card Transactions and Process Corporate Card Transactions for Inactive Employees are designed to handle such scenarios effectively.

Key Capabilities of These Processes:

Employee Termination Date (Option A):

Role in Processing: The system identifies inactive employees based on their termination or inactive status. When the Process

Corporate Card Transactions for Inactive Employees process is executed, it scans for employees whose status has changed to inactive (e.g., due to termination or unpaid leave) and identifies any outstanding corporate card transactions associated with them.
Reference:

Grace Period (Option D):

Role in Processing: A grace period can be configured to allow the system to process transactions that are posted after an employee's termination date. This ensures that any legitimate business expenses incurred shortly before termination are not overlooked. The default grace period is set to 0 days but can be adjusted as needed.

Configuration Path: To modify the grace period, navigate to the Manage Expenses System Options page:

In the Setup and Maintenance work area, select:

Offering: Financials

Functional Area: Expenses

Task: Manage Expenses System Options

Options Not Included:

Outstanding Cash Advances (Option B):

This pertains to any cash amounts advanced to employees that have not yet been reconciled. The processes in question focus on corporate card transactions and do not directly address outstanding cash advances.

Individual Pay Liability (Option C):

This refers to scenarios where employees are responsible for paying their corporate card bills directly (Individual Pay). The processes mentioned are designed to handle transactions for inactive employees, regardless of the payment liability setup (Individual Pay, Company Pay, or Both Pay).

By utilizing these processes and configuring the grace period appropriately, companies can ensure that all valid business expenses incurred by inactive employees are processed efficiently, thereby maintaining good standing with corporate card providers and ensuring accurate financial reporting.

How Corporate Card Transactions for Inactive Employees Are Processed

NEW QUESTION # 30

.....

In order to help customers study with the paper style, our 1Z0-1055-25 test torrent support the printing of page. We will provide you with three different versions, the PDF version allow you to switch our 1Z0-1055-25 study torrent on paper. You just need to download the PDF version of our 1Z0-1055-25 Exam Prep, and then you will have the right to switch study materials on paper. We believe it will be more convenient for you to make notes. And you can be assured to download the version of our 1Z0-1055-25 study torrent.
