Exam 300-635 Consultant & Accurate 300-635 Study Material

Our 300-635 study materials can help you pass test faster. You can take advantage of the certification. Many people improve their ability to perform more efficiently in their daily work with the help of our 300-635 exam questions and you can be as good as they are. The moment you choose to go with our 300-635 Study Materials, your dream will be more clearly presented to you. Next, through my introduction, I hope you can have a deeper understanding of our 300-635 learning quiz. We really hope that our 300-635 study materials will give you the help to pass the exam.

Cisco 300-635 is a certification exam for professionals who want to enhance their skills in automating Cisco data center solutions.

300-635 exam is designed to test the candidates' knowledge of programming concepts, APIs, automation tools, and Cisco platforms. Passing 300-635 Exam validates the candidate's ability to design, implement, and troubleshoot automated solutions for Cisco data center infrastructure.

Cisco Automating Cisco Data Center Solutions (DCAUTO) Sample Questions (Q19-Q24):

NEW QUESTION # 19

When should the API Inspector be used?

- A. to send an API request to the APIC
- **B. to learn or identify the sequence of API calls for a specific operation in the APIC GUI**
- C. to launch an Ansible playbook
- D. to verify the XML structure of an object based on a specific operation in the APIC GUI

Answer: B

Explanation:

Devnet training

NEW QUESTION # 20

Refer to the exhibit.

□ The script is called `deltacounters.py` and it is currently inside a Guest Shell container running inside a Cisco NX-OS switch. Which Cisco NX-OS command results in a successful execution of this script?

- A. `python /home/admin/bootflash:deltacounters.py ethernet1/1`
- **B. `guestshell run python /home/admin/deltacounter.py ethernet1/1`**
- C. `guestshell execute python /home/admin/deltacounter.py ethernet1/1`
- D. `show python bootflash:deltacounters.py ethernet1/1`

Answer: B

NEW QUESTION # 21

Refer to the exhibit:

□ Refer to the exhibit: Which Ansible module is need in line 8 to create a new VLAN 10 on the hosts defined in the "ucs" group?

- **A. `ucs_vlans`**
- B. `vlans`
- C. `nxos_vlans`
- D. `vlan`

Answer: A

NEW QUESTION # 22

Refer to the exhibit.

□ Which action fixes the code to access a child managed object?

- A. Change parent to children in line 2.
- B. Change `dnQuery` to `classQuery` in line 1.
- C. Delete line 2.
- **D. Move line 2 to the last line.**

Answer: D

Explanation:

The code snippet is intended to access a child managed object within Cisco's ACI. The current placement of line 2

To fix the code so that it accesses a child managed object, line 2 should be moved to after line 3, where `tenantMo` is defined. This change will ensure that the subtree of `tenantMo` is set to 'parent', which means that when `defaultBDmo` is called in line 4, it will correctly reference a child managed object under `tenantMo`.
