## 2026 NPPE Exam Sims | Useful 100% Free NPPE Certification Test Questions

The reality is often cruel. What do we take to compete with other people? More useful certifications like NPPE certificate? In this era of surging talent, why should we stand out among the tens of thousands of graduates and be hired by the company? Only if you pass the exam can you get a better promotion. And if you want to pass it more efficiently, we must be the best partner for you. Because we are professional NPPE question torrent provider, we are worth trusting; because we make great efforts, we do better. Here are many reasons to choose us.

### APEGS National Professional Practice Examination (NPPE) Exam Sample Questions (Q134-Q139):

#### NEW QUESTION # 134

It is prudent for self-employed, licensed geoscientists and engineers to hold professional liability insurance to help protect them against potential claims. Liabilities resulting from which of the following actions are not likely to be covered by professional liability insurance?

- A. Corruption or fraud
- B. Breach of contract
- C. Oversight or deficiency
- D. Misjudgment or misunderstanding

**Answer: A**

Explanation:

Liabilities resulting from corruption or fraud (Option B) are not likely to be covered by professional liability insurance. This type of insurance typically covers errors, omissions, oversight, deficiency, misjudgment, or misunderstanding stemming from professional services rendered. However, intentional wrongful acts like corruption or fraud are generally excluded from such policies because they are outside the bounds of professional error or accident.

#### NEW QUESTION # 135

Empowered through their respective legislative Acts, professional regulators have the ability to impose consequences on their members if they are found guilty of unprofessional conduct and/or unskilled practice.

Which of the following disciplinary penalties, imposed by a regulator against a practitioner, is not a potential consequence for such action or behavior?

- A. Probation or imprisonment
- B. Further study and/or examinations
- C. License suspension or fine
- D. Revoking of license indefinitely

**Answer: A**

Explanation:

The disciplinary penalties that professional regulators can impose on practitioners found guilty of unprofessional conduct do not include probation or imprisonment. These measures are typical of criminal justice systems and are outside the scope of professional regulatory authorities. Disciplinary actions within the scope of professional regulators generally involve fines, mandatory education, license suspension, or revocation but do not extend to criminal penalties.

### NEW QUESTION # 136

A licensed professional is sometimes called as an expert witness to provide an opinion to a court or arbitration tribunal. Which of the following phrases would best define an expert witness?

- A. A subject matter expert who is hired to assess a case and provide an opinion on a defendant's culpability.
- B. A professional who is hired to use their knowledge and expertise to defend a client.
- C. An educated individual holding a P.Eng. or P.Geol. called on to confirm or disprove testimony at a trial.
- **D. A person qualified with special knowledge and expertise called on to provide an unbiased opinion at a trial.**

**Answer: D**

Explanation:

An expert witness is permitted to give opinion evidence because they possess specialized knowledge beyond that of the trier of fact. In professional practice, the defining feature is not advocacy for a party, but independence and objectivity. NPPE-aligned guidance emphasizes that an expert's primary duty is to the court or tribunal: to assist in understanding technical matters by providing an impartial, fair, and non-misleading opinion within the expert's area of competence. Option D captures this key requirement of being qualified by special knowledge and providing an unbiased opinion. Option A is incorrect because it describes an advocate; expert witnesses must not "defend" a client in the sense of partisan argument. Option B is too narrow and inaccurate: an expert need not hold a specific Canadian licence (and the role is not simply to confirm/disprove testimony). Option C is also inaccurate because an expert typically does not opine on legal "culpability" (a legal conclusion), but rather on technical facts, standards of practice, causation, and professional judgment within their expertise.

### NEW QUESTION # 137

Which of the following statements about technical societies in Canada is false?

- A. They encourage networking and facilitate technical debate.
- **B. They provide licensing and certification for professional practice.**
- C. They are typically organized by technical discipline.
- D. They stimulate original thought, discussion, and the dissemination of knowledge.

**Answer: B**

Explanation:

Technical societies (for example, discipline-based institutes and associations) exist to advance technical knowledge and professional development through publications, conferences, seminars, standards-related activities, and forums for discussion. This aligns with their roles in stimulating original thought, supporting dissemination of knowledge, and encouraging networking and technical debate (A, C). They are commonly organized around technical disciplines or fields of practice (D), which helps members share specialized expertise and stay current with evolving technologies and practices. However, licensing and certification for independent professional practice in Canada are not functions of technical societies. Professional licensure is a statutory responsibility of provincial/territorial engineering and geoscience regulators (the professional associations/colleges created under legislation), which establish registration requirements, issue licences, and enforce professional and ethical standards in the public interest. Therefore, the statement that technical societies "provide licensing and certification for professional practice" is false because this authority resides with the regulatory bodies, not technical societies.

### NEW QUESTION # 138

According to the Code of Ethics, a professional member's duties include all of the following except

- A. developing natural resources sensibly
- **B. achieving the lowest cost outcomes as the highest priority**
- C. working with due diligence
- D. managing risk to protect the public

**Answer: B**

Explanation:

Canadian engineering/geoscience Codes of Ethics emphasize diligence, competence, integrity, and a paramount duty to the public interest (including safety, health, welfare, and environmental protection).

Working with due diligence (A) is a standard professional obligation, as is identifying, managing, and communicating risks to protect

the public (B). Many regulators' ethical expectations also include environmental stewardship and responsible, sustainable development—often expressed as conserving resources, considering environmental impacts, and supporting responsible resource development (C).

However, making "lowest cost outcomes" the highest priority (D) conflicts with core ethical principles. Cost efficiency is a legitimate project objective, but it must never override safety, quality, regulatory compliance, or professional judgment. NPPE materials consistently stress that professionals must not compromise public welfare or sound engineering/geoscience practice to meet cost, schedule, or client pressure. Accordingly, D is the statement that does not align with ethical duties.

## NEW QUESTION # 139

.....

The National Professional Practice Examination (NPPE) Exam (NPPE) certification exam is one of the top-rated career advancement certifications in the market. This National Professional Practice Examination (NPPE) Exam (NPPE) exam dumps have been inspiring beginners and experienced professionals since its beginning. There are several personal and professional benefits that you can gain after passing the APEGS NPPE Exam. The validation of expertise, more career opportunities, salary enhancement, instant promotion, and membership of APEGS certified professional community.
