Latest UiPath UiPath-ADPv1 Mock Test | UiPath-ADPv1 Dumps Discount

P.S. Free & New UiPath-ADPv1 dumps are available on Google Drive shared by BraindumpsIT: https://drive.google.com/open?id=1304HM8F4QLVAS5KVrMnP53WAx2bt1jQf

All of these prep formats pack numerous benefits necessary for optimal preparation. This UiPath (ADPv1) Automation Developer Professional (UiPath-ADPv1) practice material contains actual UiPath UiPath (ADPv1) Automation Developer Professional Questions that invoke conceptual thinking. BraindumpsIT provides you with free-of-cost demo versions of the product so that you may check the validity and actuality of the UiPath UiPath-ADPv1 Dumps PDF before even buying it. We also offer a money-back guarantee, which means we are obliged to return 100% of your sum (terms and conditions apply) in case of any unsatisfactory results.

UiPath UiPath-ADPv1 Exam Syllabus Topics:

Topic	Details
Topic 1	• Debugging and Testing: This section is about utilizing logging and debugging tools and adopting unit testing and test automation strategies.
Topic 2	• UiPath Activities: In this section, the discussion is related to various UiPath activities for UI interaction, data manipulation, control flow, and more.
Topic 3	• Design and Development: This section covers designing workflows using sequences, flowcharts, and state machines, building reusable components with libraries, exception handling and debugging techniques, etc.

Topic 4	• UiPath Studio Fundamentals: In this section, the focus is given to the understanding of Robotic Process Automation (RPA) concepts; it covers UiPath Studio and its components, Working with the UiPath user interface, project creation, management, and version control.

Actual UiPath-ADPv1 Test Training Questions are Very Helpful Exam Materials

Over the past few years, we have gathered hundreds of industry experts, defeated countless difficulties, and finally formed a complete learning product - UiPath-ADPv1 test answers, which are tailor-made for students who want to obtain UiPath-ADPv1 certificates. Our customer service is available 24 hours a day. You can contact us by email or online at any time. In addition, all customer information for purchasing UiPath-ADPv1 Test Torrent will be kept strictly confidential. We will not disclose your privacy to any third party, nor will it be used for profit. Then, we will introduce our products in detail.

UiPath (ADPv1) Automation Developer Professional Sample Questions (Q28-Q33):

NEW QUESTION # 28
A developer designed a project in the REFramework. The "Config.xlsx" has me following Setting entry:
Assuming the default REFramework configuration, how can the developer reference the Setting in the Config variable to obtain the Setting value as a String from the dictionary?

- A. Config ("OrchestratorOueueName"." Process ABCQueue")ToString
- B. Config ("ProcessABCQueue"."OrchestratorQueueName").ToString
- C. Config ("OrchestratorOueueName).ToString
- D. Config ("ProcessABCOueue")ToString

Answer: C

NEW QUESTION # 29
Which of the following options is correct regarding the below Object Repository tree structure?

- A. One ScreenTwo ApplicationsFive UI Elements
- B. One ApplicationTwo ScreensFive UI Elements
- C. One ApplicationTwo UI ElementsFive Screens
- D. One ScreenTwo ApplicationsTwo UI Elements

Answer: B

Explanation:
Based on the provided screenshot of the Object Repository tree structure in UiPath, the correct hierarchy and count of elements are as follows:
* There is one Application, which is "ACME 1.0.0".
* Within this application, there are two Screens: "Dashboard" and "Login".
* Under the "Dashboard" screen, there are three UI Elements: "User Options", "Users Data".
* Under the "Login" screen, there are two UI Elements: "LoginButton", "Password", "Username".
Therefore, the correct option regarding the tree structure displayed would be:
C: One Application Two Screens Five UI Elements
This option correctly identifies one application (ACME 1.0.0), two screens (Dashboard, Login), and five UI elements (User Options, Users Data, LoginButton, Password, Username).

NEW QUESTION # 30
How to make sure that all UI Automation activities used within project workflows reference elements from the Object Repository9

- A. By setting the Object Repository Enforced option to Yes in the System tab within the Project Settings window.
- B. By setting the Object Repository Enforced option to Yes in the Ul Automation Modern tab within the Project Settings window.
- C. By setting the Object Repository Enforced option to Yes in the Design tab within the UiPath Studio Settings window.
- D. By setting the Object Repository Enforced option to Yes in the General tab within the Project Settings window.

Answer: B

Explanation:
To ensure that all UI Automation activities within project workflows reference elements from the Object Repository, the 'Object Repository Enforced' option should be set to Yes in the 'UI Automation Modern' tab within the Project Settings window. This setting enforces the use of the Object Repository for UI activities.

NEW QUESTION # 31
Given the following variables assignments:
What will the output of the following conditional be: outputX = If(CInt(doubleX+Cdbl(intX) +CDbl(stringX)) > 38.30, 1, 0)

- A. 0
- B. Compilation error
- C. Error during runtime
- D. 1

Answer: C

Explanation:
The conditional statement attempts to convert all variables to Double and then adds them up to compare against 38.30. However, the string "9.1" cannot be directly converted to a Double with CDbl because it is not in a correct format that can be recognized as a number (it might be due to the fact that it's a string with a comma instead of a period for a decimal point, depending on the culture settings of the system). This will cause a runtime error during the execution of the conditional statement.References:

NEW QUESTION # 32
How are custom log fields used in the REFramework?

- A. Customlog fieldsareincluded in log messages and used to add more data about each transaction for reporting and troubleshooting purposes.
- B. Customlog fieldsareusedto store sensitive information like credentials and personal data of users.
- C. Customlog fieldsareusedto define the variable types for transactions, replacing the default Queueitemtype.
- D. Customlog fieldsareusedto automatically retry failed transactions with real-time updates.

Answer: A

Explanation:
Custom log fields are additional fields that can be added to the Robot Execution Logs using the Add Log Fields activity1. The REFramework is a template for creating robust and scalable automation projects that uses the State Machine workflow type2. The REFramework leverages the custom log fields feature to include more information about each transaction in the log messages, such as the transaction number, the transaction item, the business process name, etc. This helps to improve the reporting and troubleshooting capabilities of the automation project, as the custom log fields can be easily viewed and filtered in the Output panel, the Orchestrator Logs page, or any external logging tool3.
Option A is incorrect, because custom log fields are not used to automatically retry failed transactions, but rather to provide more details about them. The REFramework uses the Retry Scope activity and the Set Transaction Status activity to handle the retry mechanism for failed transactions4. Option B is incorrect, because custom log fields are not used to store sensitive information, but rather to enhance the log messages.
Storing sensitive information like credentials and personal data of users in the log fields is not recommended, as it may pose a security risk. Option C is incorrect, because custom log fields are not used to define the variable types for transactions, but rather to add more data about them. The REFramework uses the TransactionItem argument to store the transaction data, which can be of any type, such as QueueItem, DataRow, String, etc.
