### 최신 SAP Certified Associate C-THR81-2505 무료 샘플문제 (Q81-Q86):

#### 질문 # 81

Which mathematical formula must be set in the THEN condition to meet the Jobinfo\_FTE\_Comp rule requirement?

- A. (Base Salary/Previous FTE Value) X Current FTE Value
- B. (Current FTE Value-Previous FTE Value)/Base Salary
- C. (Base Salary/Current FTE Value) X Previous FTE Value
- D. (Previous FTE Value - Current FTE Value) X Base Salary

정답: A

#### 설명:

The formula (Base Salary / Previous FTE Value) X Current FTE Value ensures that the base salary is adjusted correctly when there is a change in the Full-Time Equivalent (FTE) value. This formula maintains salary proportionality by recalculating the base salary based on the ratio of the new FTE value to the previous FTE value. It is critical in cases where FTE adjustments impact an employee's compensation.

Scenario 1: HR Transaction Rules

#### 질문 # 82

Which rule can effectively catch all unspecified events in a transaction?

- A. Option D
- B. Option B
- C. Option C
- D. Option A

**정답: B**

**설명:**

The rule in Option B effectively captures all unspecified events in a transaction because:

It sets the Event Reason Value to "Data Change" whenever the Event Reason Value is null.

This ensures that all unplanned or unspecified events are assigned a default action, which is crucial for maintaining data consistency and avoiding errors during transactions.

Scenario 1: HR Transaction Rules

**질문 # 83**

In which section in the Manage Permission Roles tool do you set Biographical Information?

- **A. Employee Data**
- B. Manage User
- C. Employee Central Effective Dated Entities
- D. Employee View

**정답: A**

**설명:**

The Biographical Information permissions are managed in the Employee Data section of the Manage Permission Roles tool.

\* This section governs access to basic employee details, including biographical information such as name, date of birth, and personal identifiers.

\* Configuring permissions here ensures that the appropriate user roles can view or edit biographical details while maintaining data security and compliance.

**질문 # 84**

Based on the screenshot below, can you identify any errors on the definition of the business rule to Default Position Attributes? Note: There are 2 correct answers to this question.

□

- A. The workflow configuration should NOT be included in the business rule.
- **B. The FTE field should be derived from the business rule to Calculate FTE based on Standard Hours.**
- **C. The Parent Position field should NOT be included in the business rule.**
- D. The Company field should NOT be included in the business rule.

**정답: B,C**

**설명:**

C . The Parent Position field should NOT be included in the business rule:

The Parent Position field is typically derived automatically based on position hierarchy and does not require explicit inclusion in a business rule for defaulting position attributes.

D . The FTE field should be derived from the business rule to Calculate FTE based on Standard Hours:

The FTE (Full-Time Equivalent) value should be calculated using a dedicated rule that accounts for standard hours, rather than being directly included in a defaulting rule.

Including these fields inappropriately can lead to data inconsistencies or rule execution issues.

**질문 # 85**

Which condition must be used for the jobinfo\_FTE\_Comp rule?

□

- A. Option C
- B. Option A
- C. Option B
- **D. Option D**

**정답: D**

**설명:**

For the Jobinfo\_FTE\_Comp rule, the correct condition to use is Option D. This ensures that the system evaluates changes in FTE values and event reasons to calculate and adjust compensation data accordingly.

The precise conditions are necessary to maintain consistency in how the rule is applied across various HR scenarios.
