ISQI IREB Certified Professional for Requirements Engineering. Foundation Level Sample Questions (Q147-Q152):

NEW QUESTION # 147

One activity in managing requirements includes prioritization of the requirements. Which of the following criteria is not a sensible criterion for prioritization? (1 Point)

- A. The impact on the existing operational system (operating environment)
- B. The costs resulting from the implementation of the requirements
- C. The influence on the overall success of the business
- D. Which requirements must be implemented in which release
- E. The effort for the validation of the requirements

Answer: E

NEW QUESTION # 148

You would like to design a requirements document in such a way that it is particularly well suited to the project participants who are to continue working with it. Please select from the following statements the two most appropriate assignments of requirement properties to participants. (1 Point)

- A. For all participants the requirements must be consistent.
- B. For maintenance the requirements must be testable.
- C. For the tester the requirements must be practicable.
- D. For the project manager the requirements must be evaluated.
- E. For the developers the requirements must be easily changeable.

Answer: A,D

NEW QUESTION # 149

Which of the following is NOT recognized as a type of requirements?

- A. Functional requirements
- B. Quality requirements
- C. Constraints
- D. Non-functional requirements

Answer: D

NEW QUESTION # 150

Validation is the process of...

- A. prototyping systems.
- B. ensuring that an item fulfills the needs of its stakeholders.
- C. ensuring that an item fulfills its requirements.
- D. assessing if requirements were written following a given criteria.

Answer: B

NEW QUESTION # 151

You are employed as a requirements engineer in a company that develops control software for electric motors.

During your work it becomes increasingly evident that the developers are very well aware of the necessary requirements, even though the requirements are not documented in their entirety. Nevertheless, you decide to document requirements systematically. Which two of the following arguments justifies this step? (2 Points)

Documenting requirements systematically is important, because...

- A. ... the coverage of the requirements by means of test cases cannot be checked.
- B. ... non-documented requirements are difficult to negotiate between the stakeholders.
- C. ... documented requirements are also good requirements.
- D. ... implementation without documented requirements is not possible.

Answer: A,B

NEW QUESTION # 152
