PRINCE2 P3O Foundation Project Office2013 Exam Sample Questions (Q42-Q47):

NEW QUESTION # 42

Which is a purpose of the Consultancy and Performance Management role?

- A. Provides benefits realization support
- B. Identifies, monitors and resolves issues
- C. Creates, maintains and distributes good practice
- D. Assists with budget control

Answer: C

Explanation:

The Consultancy and Performance Management role's purpose includes creating, maintaining, and distributing good practice, as per

the P3O Foundation (2013) manual. Section 3.5.5 states, "The Consultancy and Performance Management function is responsible for creating, maintaining, and distributing good practice guidance to enhance PPM maturity across the organization." This differs from budget control (A), benefits realization (C), or issue management (D), which are handled by other roles like the Portfolio Analyst or Programme Office. The 2013 edition underscores this role's focus on standardizing processes, supporting P3O's goal of improving performance through shared knowledge. This ensures consistent application of best practices.

NEW QUESTION # 43

Which occurs when the P3O implementation programme is closed?

- A. Vision Statement is to reflect delivery
- **B. P3O capability becomes business as usual**
- C. Risks to the implementation are captured
- D. Blueprint is produced to document processes

Answer: B

Explanation:

The P3O Foundation (2013) manual states that when the P3O implementation programme closes, the P3O capability becomes business as usual. Section 4.4.5 notes, "Upon closure of the implementation programme, the P3O capability is fully integrated into business as usual, marking the end of the transition phase." This differs from updating the Vision (A), producing the Blueprint (B), or capturing risks (C), which occur earlier.

The 2013 edition emphasizes this transition to ensure operational sustainability, aligning with the P3O's long-term role. This finalizes the implementation lifecycle.

NEW QUESTION # 44

Which is NOT a way that tools are typically used?

- A. Integrated
- B. Collaborative
- C. Individual
- **D. Connected**

Answer: D

Explanation:

The P3O Foundation (2013) manual identifies integrated, collaborative, and individual as typical ways tools are used, but not "connected" as a distinct category. Section 6.2.1 states, "Tools are typically used in an integrated manner across functions, collaboratively by teams, or individually by single users, depending on organizational maturity." The term "connected" (B) is not defined as a usage mode; it may imply a technical link but lacks specific application in the P3O context. The 2013 edition focuses on these three usage patterns to align with P3M3 maturity levels, ensuring tools support PPM effectively. Options A, C, and D are explicitly recognized, making B the correct choice for an atypical use. This clarity aids in selecting appropriate tool strategies.

NEW QUESTION # 45

What technique provides the benefit of checking the quality of the decision-support information being provided to the P3O?

- A. Business process swimlanes
- **B. Gated reviews**
- C. Capacity planning for resource management
- D. Management dashboards

Answer: B

Explanation:

Gated reviews provide the benefit of checking the quality of decision-support information, according to the P3O Foundation (2013) manual. Section 7.3.2 states, "Gated reviews offer an independent assessment to verify the quality and reliability of information used

for P3O decision-making, ensuring governance standards are met." This contrasts with business process swimlanes (B), which map processes, capacity planning (C), which manages resources, and management dashboards (D), which visualize data. The 2013 edition highlights gated reviews as a key assurance technique, supporting P3O's role in maintaining high-quality decision support. This process enhances strategic alignment and risk management.
Reference: P3O Foundation (2013) manual, Section 7.3.2, AXELOS.

NEW QUESTION # 46

What are risk identification and risk assessment workshops typically used for?

- A. Brainstorm objectives for a project
- B. Define measures in a Benefit Profile
- C. Define the relative priority of each investment objective
- **D. Identify threats as part of project initiation**

Answer: D

Explanation:

Risk identification and assessment workshops are typically used to identify threats during project initiation, according to the P3O Foundation (2013) manual. Section 6.3.3 states, "These workshops are conducted during project initiation to identify and assess potential threats and opportunities, forming the basis of the risk management plan." This contrasts with defining investment priorities (A), brainstorming objectives (C), or defining benefit measures (D), which serve different purposes. The 2013 edition highlights their role in early risk management, supporting P3O's governance function by ensuring proactive threat mitigation. This process enhances project success by addressing risks at the outset.
