

NCP-MCI-7.5 Valid Exam Labs, Latest NCP-MCI-7.5 Exam Pattern

In order to meet the demands of all customers, our company has a complete set of design, production and service quality guarantee system, the NCP-MCI-7.5 study materials are perfect. We can promise that quality first, service upmost. If you buy the NCP-MCI-7.5 study materials from our company, we are glad to provide you with the high quality NCP-MCI-7.5 Study Materials and the best service. The philosophy of our company is "quality is life, customer is god." We can promise that our company will provide all customers with the perfect quality guarantee system and sound management system.

All NCP-MCI-7.5 test prep is made without levity and the passing rate has up to 98 to 100 percent now. We esteem your variant choices so all these versions of NCP-MCI-7.5 exam guides are made for your individual preference and inclination. We know that tenet from the bottom of our heart, so all parts of service are made due to your interests. You are entitled to have full money back if you fail the exam even after getting our NCP-MCI-7.5 Test Prep. Our staff will help you with genial attitude.

Quiz NCP-MCI-7.5 Valid Exam Labs & Nutanix Certified Professional - Multicloud Infrastructure (NCP-MCI) 7.5 Unparalleled Latest Exam Pattern

Nutanix NCP-MCI-7.5 exam torrent is famous for instant download. You will receive downloading link and password within ten minutes, and if you don't receive, just contact us, we will check for you. In addition, NCP-MCI-7.5 Exam Materials are high quality, it covers major knowledge points for the exam, you can have an easy study if you choose us.

Nutanix Certified Professional - Multicloud Infrastructure (NCP-MCI) 7.5 Sample Questions (Q31-Q36):

NEW QUESTION # 31

A node in a 3-node cluster is running out of physical resources. All three nodes are equally configured. An administrator wants to live migrate VMs to another node, but is unable to do so.

What is causing this issue?

- A. VMs have vNUMA enabled.
- B. VMs have vGPU.
- C. VMs have GPU passthrough.
- D. VMs have memory overcommitment.

Answer: C

Explanation:

Nutanix documentation clearly states that guest VMs with GPU passthrough cannot be migrated to other hosts in the cluster. By contrast, Nutanix does support live migration for some vGPU-enabled VMs under supported conditions, but not for passthrough GPUs. That distinction is exactly what this question is testing.

Therefore the correct answer is D. (portal.nutanix.com, portal.nutanix.com, portal.nutanix.com) This is a high-value exam distinction: vGPU and GPU passthrough are not interchangeable in migration behavior. Memory overcommitment and vNUMA may affect placement or performance, but they are not the documented hard stop presented here. If a VM uses GPU passthrough, live migration is not supported, so the administrator cannot evacuate it the way they can with ordinary VMs.

NEW QUESTION # 32

An administrator needs to protect a volume group using a protection policy that supports an RPO of 1 hour.

The environment consists of two clusters in different geographic regions. Which replication type should be used?

- A. Asynchronous
- B. Metro Availability
- C. NearSync
- D. Synchronous

Answer: A

Explanation:

Nutanix DR documentation for volume groups distinguishes replication types by RPO range. Nutanix documents Asynchronous Replication as the model for 1 hour or more RPO, while NearSync covers 1 minute to 15 minutes, and synchronous/Metro designs target near-zero or zero-RPO behavior with tighter latency expectations. Since the requirement here is 1 hour and the clusters are in different geographic regions, Asynchronous is the correct fit. That makes D the right answer.

The geography in the question is also a clue. Synchronous and Metro Availability are usually associated with low-latency links and more demanding network requirements, which are not implied by "different geographic regions." NearSync is too aggressive for a 1-hour target and is documented for much shorter RPO windows.

Nutanix's own replication taxonomy places 1 hour or more squarely in the Asynchronous category, so D is the authentic answer.

NEW QUESTION # 33

A VM is protected by a protection policy and the volume group is configured with CHAP authentication. An administrator rotates the VM's password as part of the monthly routine. What action must the administrator perform to ensure the password is retained in the event of a failover?

- A. Set the password as part of startup policy.
- B. Set the password in the VG recovery points.
- C. Update the associated recovery plan.
- D. Update the associated protection policy.

Answer: C

NEW QUESTION # 34

Due to user complaints of slow VM performance, an administrator is reviewing performance metrics on their Nutanix cluster and executes iostat on a Controller VM (CVM).

The following output is captured:

```
#TIMESTAMP 1768953673 : 01/21/2026 12:01:13 AM
avg-cpu: %user %nice %system %iowait %steal %idle
2.32 0.09 7.53 83.20 0.00 6.86
```

Based on this output, which statement most accurately describes the current state of the CVM?

- A. The CVM is suffering from excessive network throughput congestion, resulting in a high percentage of CPU cycles being dedicated to interrupt processing.
- B. The CVM is likely waiting on disk I/O operations to complete, suggesting a potential bottleneck in the storage subsystem or underlying physical drives.
- C. The CVM is under heavy computational load from Nutanix services, as evidenced by the high percentage of active processing cycles currently in use.

- D. The CVM is experiencing significant CPU contention from the hypervisor, as indicated by the discrepancy between low user percentage and high system overhead.

Answer: B

Explanation:

The decisive metric in the iostat output is %iowait = 83.20. In Linux performance interpretation, such a high iowait value means the CPU is spending most of its time waiting for disk I/O operations to complete rather than actively executing user or system work. On a Nutanix CVM, that strongly suggests the storage path is the bottleneck at that moment, whether due to backend disk saturation, contention, or broader storage subsystem latency. Since user CPU and steal are both low, the issue is not primarily compute pressure or hypervisor scheduling contention. Therefore, A is the most accurate description. (Nutanix) This is a classic Nutanix troubleshooting interpretation question. If the output had shown high %steal, then hypervisor contention would be a stronger candidate. If %system and %user were both very high, compute load from services would be more likely. But with the overwhelming majority of time in iowait, the signal points toward delayed storage completion. In operational terms, the next steps would usually involve checking CVM disk metrics, Stargate performance, storage latency, and possibly the health of the underlying drives. The evidence in the output supports a storage wait condition, which is exactly what option A says. (Nutanix)

NEW QUESTION # 35

An administrator needs to install multiple Prism Central instances on a single Prism Element management cluster. Which statement is valid?

- A. Only one Prism Central instance can be registered to the Prism Element cluster.
- B. Installing multiple Prism Central instances on a single cluster isn't supported.
- C. After deploying the first Prism Central, the other instances can be set up from the Marketplace.
- D. It is possible to register and unregister Prism Element with the same Prism Central multiple times from the GUI.

Answer: D

Explanation:

Nutanix documentation confirms that a Prism Element cluster can be registered with only one Prism Central at a time, so option B is false. Nutanix also documents support for deploying multiple Prism Central instances on the same Prism Element cluster, so option A is false as well. The presence of a dedicated Nutanix doc for deploying multiple Prism Central instances on one PE cluster directly disproves option A. (Nutanix Portal) That leaves C and D. Nutanix documentation does not position Marketplace as the standard mechanism described in this context for deploying additional Prism Central instances. By contrast, Nutanix clearly documents registration and unregistration workflows, including the fact that clusters can be unregistered when no longer needed and later registered again. Since a cluster can only be attached to one Prism Central at a time, repeating register/unregister operations is a valid administrative action in supported workflows.

Therefore D is the best valid statement among the given options. This question is mostly testing whether you know the difference between deployment support and registration exclusivity. Multiple PC instances may exist on the cluster, but registration to management is still one-at-a-time. (Nutanix Portal)

NEW QUESTION # 36

.....

Pass4guide free update our training materials, which means you will always get the latest NCP-MCI-7.5 exam training materials. If NCP-MCI-7.5 exam objectives change, The learning materials Pass4guide provided will follow the change. Pass4guide know the needs of each candidate, we will help you through your NCP-MCI-7.5 Exam Certification. We help each candidate to pass the exam with best price and highest quality.

Latest NCP-MCI-7.5 Exam Pattern: <https://www.pass4guide.com/NCP-MCI-7.5-exam-guide-torrent.html>

Nutanix NCP-MCI-7.5 Valid Exam Labs We help out thousands of candidates prepare for their certification exams so far, In order to provide the most authoritative and effective NCP-MCI-7.5 exam software, the IT elite of our Pass4guide study NCP-MCI-7.5 exam questions carefully and collect the most reasonable answer analysis, Up to now, there are many customers purchasing our NCP-MCI-7.5 exam quiz material.

Getting What You Want Requires Wanting Something. Whereas baby boomers didn't NCP-MCI-7.5 have many choices, the children of baby boomers will, We help out thousands of candidates prepare for their certification exams so far.

Free PDF Quiz 2026 NCP-MCI-7.5: Nutanix Certified Professional - Multicloud Infrastructure (NCP-MCI) 7.5 Latest Valid Exam Labs

In order to provide the most authoritative and effective NCP-MCI-7.5 Exam software, the IT elite of our Pass4guide study NCP-MCI-7.5 exam questions carefully and collect the most reasonable answer analysis.

Up to now, there are many customers purchasing our NCP-MCI-7.5 exam quiz material, NCP-MCI-7.5 study material has helped thousands of candidates successfully pass the exam and has been praised by all users since it was appearance.

If you join, you will become one of the 99%.
