Veeam Certified Engineer v12 Sample Questions (Q77-Q82):

NEW QUESTION # 77

A backup of a Windows VM running on a VMware cluster has been created. In which scenario can the Quick Rollback option be used during a Full VM Restore of the VM?

- A. Migration of VM to VMware host in a different data center
- B. Issues caused by storage data corruption
- C. Issues caused by VM guest user error
- D. Migration of VM to Hyper-V host in the same data center

Answer: C

Explanation:

The Quick Rollback feature can be used during a Full VM Restore to restore only the changed blocks of data since the last backup. This is typically used when the issues are minor and have been caused by VM guest user error, rather than full-scale data corruption or migrations to a different virtualization host. Quick Rollback can efficiently restore the VM to its previous state without the need to transfer the entire VM's data.

NEW QUESTION # 78

A customer has a local VMware environment that they back up locally and offload all retention to Wasabi's Cloud. The local backups have become unavailable, and the customer has to recover from Wasabi's Cloud.

What method would provide the fastest RTO from Wasabi so that users can interact with the recovered system?

- A. Restore Entire VM to local VMware VM
- B. Instant Recovery to Wasabi Cloud VM
- C. Instant Recovery to EC2 VM
- D. Instant Recovery to local VMware VM

Answer: D

Explanation:

In a scenario where a customer needs to recover from Wasabi's Cloud due to local backups becoming unavailable, the method that would provide the fastest Recovery Time Objective (RTO) while allowing users to interact with the recovered system as quickly as possible is D: Instant Recovery to local VMware VM.

Veeam's Instant Recovery feature allows for the restoration of a backup directly into the production environment without the need to fully copy the backup data. When recovering from cloud storage like Wasabi, the backup data will be streamed on-demand to the local VMware environment, allowing the VM to start running immediately while the remaining data is transferred in the background. This method minimizes downtime and provides the quickest path to operational recovery, ensuring users can access the recovered system with minimal delay. It's important to note that the effectiveness of this approach depends on the available bandwidth and the size of the data being recovered.

NEW QUESTION # 79

An administrator is asked to change a backup copy job from periodic mode to immediate mode. How can this be accomplished?

- A. Copy the original backup copy job to a different folder and remap the job.
- **B. Enable immediate in the backup copy job settings drop down.**
- C. Create a new backup copy job and delete the original job.
- D. Right click on the job name and choose immediate.

Answer: B

NEW QUESTION # 80

Which of the following is a unique feature that allows Veeam Cloud Service Providers to offer backup and replication services to customers?

- A. Veeam Archive Services
- B. Veeam Data Vault
- C. Veeam Cloud Scale-out Repository
- **D. Veeam Cloud Connect**

Answer: D

Explanation:

Veeam Cloud Connect is a unique feature that enables Veeam Cloud Service Providers to offer backup and replication services to their customers. It provides a secure and seamless way to extend on-premises backups and replicas to the cloud using an encrypted connection, without requiring a VPN. This feature is specifically designed to simplify off-site backup and disaster recovery solutions for customers leveraging a service provider's infrastructure.

NEW QUESTION # 81

The backup administrator configured replication for a VM from Data Center 1 to Data Center 2, which runs every day at 1 a.m. A power surge takes out Data Center 1 at 7 a.m. and the administrator fails over the replica at 8 a.m. When the power comes back on, the administrator performs the "failback" action at 2 p.m. and checks the state of the original VM. They recognize that not all data is available. What is missing?

- A. Data from 7 a.m. to 8 a.m.
- **B. Data from 1 a.m. to 2 p.m.**
- C. Data from 1 a.m. to 7 a.m.
- D. Data from 8 a.m. to 2 p.m.

Answer: B
