Our FCP\_FSM\_AN-7.2 real exam materials have a high appraisal in the market for their quality and high efficiency. Because satisfied customer is the best ads, and the word of mouth communication by the customers give others more sense of credibility than any other form of marketing communication. We know a satisfied customer will come back again for the same or different need to the company, so we always provide high-rank FCP\_FSM\_AN-7.2 real exam materials over ten years. They have experienced all trials of the market these years approved by experts. Besides, they are easy to assimilate so if you get stuck in the bottleneck of review, and under the guidance of our FCP - FortiSIEM 7.2 Analyst exam question they are widely regarded as top notch in this area. Recently our FCP\_FSM\_AN-7.2 Guide prep rise to the forefront in the field of practice materials. So if you need other FCP\_FSM\_AN-7.2 real exam materials from us, we will not let you down not even once. Hope you pass the exam once successfully by our FCP - FortiSIEM 7.2 Analyst exam question and recommend them to your friends. We are sure you will be splendid!

DumpsTorrent has already become a famous brand all over the world in this field since we have engaged in compiling the FCP\_FSM\_AN-7.2 practice materials for more than ten years and have got a fruitful outcome. You are welcome to download the FCP\_FSM\_AN-7.2 free demos to have a general idea about our FCP\_FSM\_AN-7.2 training materials. We have prepared three kinds of different versions of our FCP\_FSM\_AN-7.2 Practice Test: PDF, Online App and software. Furthermore, our customers can accumulate exam experience as well as improving their exam skills in the FCP\_FSM\_AN-7.2 mock exam. And your success is 100 guaranteed for our high pass rate as 99%.

## FCP\_FSM\_AN-7.2 Test Pattern - Training FCP\_FSM\_AN-7.2 For Exam

Our FCP\_FSM\_AN-7.2 Learning Materials are quite useful for candidates, since the accuracy and the quality are high. We also have free update for FCP\_FSM\_AN-7.2 exam dumps, and if you also need to buy the FCP\_FSM\_AN-7.2 learning materials next year, we will offer you half off discount, it's a preferential policy for our faithful customers. We also send the updated version into your mailbox automatically. This will confirm you get the latest version.

## Fortinet FCP\_FSM\_AN-7.2 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none"><li>Machine learning, UEBA, and ZTNA: This section of the exam measures the skills of Advanced Security Architects and covers the integration of modern security technologies. It involves performing configuration tasks for machine learning models, incorporating UEBA (User and Entity Behavior Analytics) data into rules and dashboards for enhanced threat detection, and understanding how to integrate ZTNA (Zero Trust Network Access) principles into security operations.</li></ul>
Topic 2	<ul style="list-style-type: none"><li>Analytics: This section of the exam measures the skills of Security Analysts and covers the foundational techniques for building and refining queries. It focuses on creating searches from events, applying grouping and aggregation methods, and performing various lookup operations, including CMDB and nested queries to effectively analyze and correlate data.</li></ul>
Topic 3	<ul style="list-style-type: none"><li>Incidents, notifications, and remediation: This section of the exam measures the skills of Incident Responders and encompasses the entire incident management lifecycle. This includes the skills required to manage and prioritize security incidents, configure policies for alert notifications, and set up automated remediation actions to contain and resolve threats.</li></ul>
Topic 4	<ul style="list-style-type: none"><li>Rules and subpatterns: This section of the exam measures the skills of SOC Engineers and focuses on the construction and implementation of analytics rules. It involves identifying the different components that make up a rule, utilizing advanced features like subpatterns and aggregation, and practically configuring these rules within the FortiSIEM platform to detect security events.</li></ul>

## Fortinet FCP - FortiSIEM 7.2 Analyst Sample Questions (Q54-Q59):

### NEW QUESTION # 54

Which running mode takes the most time to perform machine learning tasks?

- A. Regression
- B. Local
- C. Local auto
- D. Forecasting

**Answer: B**

Explanation:

In Local mode, FortiSIEM performs machine learning tasks using the full dataset without optimization shortcuts, making it the most time-consuming mode compared to Local Auto, Forecasting, or Regression.

### NEW QUESTION # 55

Refer to the exhibit.

## Automation Policy

Name:

Severity:  Low  Medium  High

Rules:

Time Range:

Affected Items:

Affected Orgs:

Action:

- Send Email/SMS/Webhook to the target users.
- Run Remediation/Script.
- Invoke an Integration Policy. Run: no policy
- Create Case when an incident is created.
- Send SNMP message to the destination set in *Admin > Settings > Analytics*.
- Send XML file over HTTP(S) to the destination set in *Admin > Settings > Analytics*.
- Open Remedy ticket using the configuration set in *Admin > Settings > Analytics*.
- Invoke FortiAI and update Comments

Settings:

- Do not notify when an incident is cleared automatically.
- Do not notify when an incident is cleared manually.
- Do not notify when an incident is cleared by system.

Comments:

What happens when an analyst clears an incident generated by a rule containing the automation policy shown in the exhibit?

- A. No notification is sent.
- B. An email is sent to the SOC manager.
- C. The remediation script is run.
- D. A notification is sent to the SOC manager dashboard.

**Answer: A**

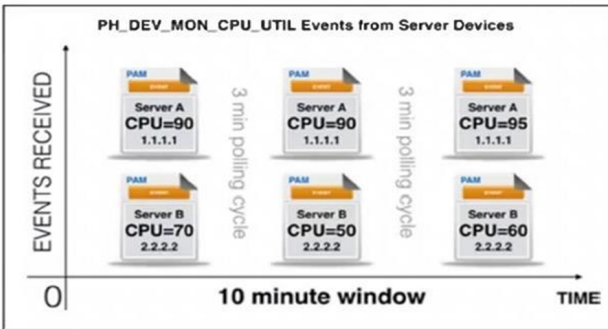

Explanation:

The automation policy has the option "Do not notify when an incident is cleared manually" enabled. Therefore, when an analyst manually clears an incident, no notification or automation action is triggered.

### NEW QUESTION # 56

Refer to the exhibits.

**Performance Events**

**Server A Properties**

**Edit Device**

Summary | Contacts | Interfaces | **Device Properties** | Parsers

Server CPU Util Critical Threshold: 90

Server CPU Util Warning Threshold:

**Server B Properties**

**Edit Device**

Summary | Contacts | Interfaces | **Device Properties** | Parsers

Server CPU Util Critical Threshold: 70

Server CPU Util Warning Threshold:

**Rule Subpattern**

Aggregate:	Paren	Attribute	Operator	Value	Paren	Next	Row
	-	+ AVG(CPU Util)	>	DeviceToCMDBAttr(Host IP,NetCF	-	+ AND OR	+ 🗑️
	-	+ COUNT(Matched Events)	>=	2	-	+ AND OR	+ 🗑️

Group By: Attribute

Host IP

Host Name

Move

↑ ↓

⊕ ⊖

↑ ↓

**Server CPU Util Critical Threshold**

Three events are collected over 10 minutes from two servers: Server A and Server B.

Based on the settings for the rule subpattern and a 10-minute condition window, how many incidents will the servers generate?

- A. Server A will not generate any incidents and Server B will not generate any incidents.
- **B. Server A will generate one incident and Server B will not generate any incidents.**
- C. Server A will not generate any incidents and server B will generate one incident.
- D. Server A will generate one incident and Server B will generate one incident.

**Answer: B**

Explanation:

The rule triggers when the average CPU utilization (AVG(CPU Util)) exceeds the device's CMDB critical threshold and there are at least two matching events within the 10-minute window.

Server A: Average CPU =  $(90 + 95) / 2 = 92.5$ , which is greater than its critical threshold of 90, and it has two events, so one incident is generated.

Server B: Average CPU =  $(70 + 60) / 2 = 65$ , which is below its critical threshold of 70, so no incident is generated.

So, Server A generates one incident, and Server B generates none.

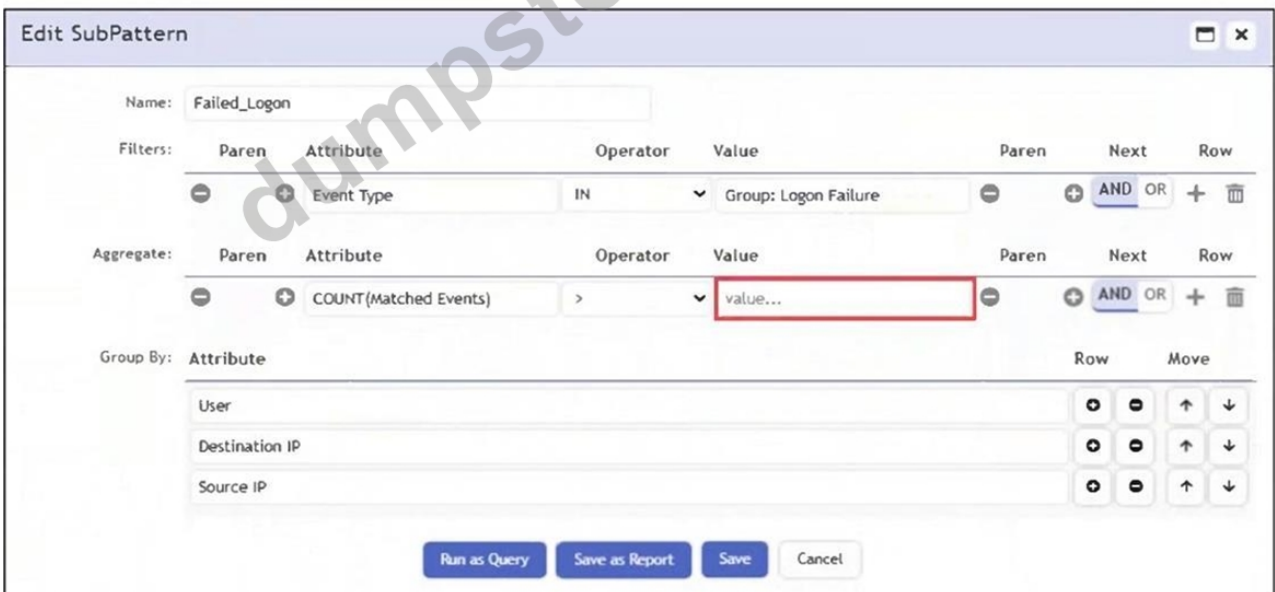

**NEW QUESTION # 57**

Refer to the exhibit.

**Rule Properties**

**SubPattern Properties**

An analyst wants the rule shown in the exhibit to trigger when three failed login attempts occur within three minutes. What should the values be for the condition time window and aggregate count?

- A. Time window 90 seconds, aggregate count 3
- B. Time window 90 seconds, aggregate count 2
- C. Time window 180 seconds, aggregate count 3
- D. Time window 180 seconds, aggregate count 2

**Answer: C**

**Explanation:**

To detect three failed login attempts within three minutes, you must set the aggregate count to 3 in the subpattern and the time window to 180 seconds in the rule condition. This ensures the rule triggers only if three or more failed logins occur in that timeframe.

**NEW QUESTION # 58**

An analyst wants to create a rule from a newly created analytics search. What is the quickest method?

- A. On the upper menu bar on any tab, click the pencil icon.
- B. Create a new rule under Resources > Rules and fill in the search details.
- **C. On the Analytics tab, click Actions > Create Rule.**
- D. On the Analytics tab, click the New button next to the Filter By box.

**Answer: C**

Explanation:

The quickest way to create a rule from an existing analytics search in FortiSIEM is to go to the Analytics tab and select Actions > Create Rule. This automatically converts the current search filters and parameters into a correlation rule template, saving time compared to manually re- entering all the search criteria.

## NEW QUESTION # 59

.....

Our FCP\_FSM\_AN-7.2 test prep attaches great importance to a skilled, trained and motivated workforce as well as the company's overall performance. Adhere to new and highly qualified FCP\_FSM\_AN-7.2 quiz guide to meet the needs of customer, we are also committed to providing the first -class after-sale service. There will be our customer service agents available 24/7 for your supports; any request for further assistance or information about FCP\_FSM\_AN-7.2 Exam Torrent will receive our immediate attention. And you can contact us online or send us email on the FCP\_FSM\_AN-7.2 training questions.
