Quiz 2026 PECB - ISO-IEC-27001-Lead-Implementer - PECB Certified ISO/IEC 27001 Lead Implementer Exam Training Kit

We all know that it is of great important to pass the ISO-IEC-27001-Lead-Implementer exam and get the certification for someone who wants to find a good job in internet area. I will recommend our study materials to you. The ISO-IEC-27001-Lead-Implementer test materials are mainly through three learning modes, Pdf, Online and software respectively. Among them, the software model is designed for computer users, can let users through the use of Windows interface to open the ISO-IEC-27001-Lead-Implementer Test Prep of learning.

PECB Certified ISO/IEC 27001 Lead Implementer Exam Sample Questions (Q182-Q187):

NEW QUESTION # 182
Which of the following is the information security committee responsible for?

- A. Treat the nonconformities
- B. Set annual objectives and the ISMS strategy
- C. Ensure smooth running of the ISMS

Answer: B

NEW QUESTION # 183

What action should an organization take to ensure the security of information when it is transferred or treated by an external party?

- A. Rely on external parties to implement their own security measures
- B. Exclude external parties from the ISMS scope to limit risk exposure
- C. Include security clauses in a contractual agreement with the external party

Answer: C

NEW QUESTION # 184

Scenario 9:

OpenTech, headquartered in San Francisco, specializes in information and communication technology (ICT) solutions. Its clientele primarily includes data communication enterprises and network operators. The company's core objective is to enable its clients to transition smoothly into multi-service providers, aligning their operations with the complex demands of the digital landscape. Recently, Tim, the internal auditor of OpenTech, conducted an internal audit that uncovered nonconformities related to their monitoring procedures and system vulnerabilities. In response to these nonconformities, OpenTech decided to employ a comprehensive problem-solving approach to address the issues systematically. This method encompasses a team-oriented approach, aiming to identify, correct, and eliminate the root causes of the issues. The approach involves several steps: First, establish a group of experts with deep knowledge of processes and controls. Next, break down the nonconformity into measurable components and implement interim containment measures. Then, identify potential root causes and select and verify permanent corrective actions. Finally, put those actions into practice, validate them, take steps to prevent recurrence, and recognize and acknowledge the team's efforts.

Following the analysis of the root causes of the nonconformities, OpenTech's ISMS project manager, Julia, developed a list of potential actions to address the identified nonconformities. Julia carefully evaluated the list to ensure that each action would effectively eliminate the root cause of the respective nonconformity. While assessing potential corrective actions, Julia identified one issue as significant and assessed a high likelihood of its recurrence. Consequently, she chose to implement temporary corrective actions. Julia then combined all the nonconformities into a single action plan and sought approval from top management. The submitted action plan was written as follows:

"A new version of the access control policy will be established and new restrictions will be created to ensure that network access is effectively managed and monitored by the Information and Communication Technology (ICT) Department." However, Julia's submitted action plan was not approved by top management. The reason cited was that a general action plan meant to address all nonconformities was deemed unacceptable. Consequently, Julia revised the action plan and submitted separate ones for approval. Unfortunately, Julia did not adhere to the organization's specified deadline for submission, resulting in a delay in the corrective action process. Additionally, the revised action plans lacked a defined schedule for execution.

Based on scenario 9, was it acceptable that the top management rejected the action plan submitted by Julia?

- A. No, top management should have approved the action plan submitted by Julia
- B. Yes, an action plan must be submitted to address each nonconformity separately
- C. No, a general action plan can be submitted to address all nonconformities at once

Answer: B

NEW QUESTION # 185

Scenario 8: SunDee is an American biopharmaceutical company, headquartered in California, the US. It specializes in developing novel human therapeutics, with a focus on cardiovascular diseases, oncology, bone health, and inflammation. The company has had an information security management system (ISMS) based on SO/IEC 27001 in place for the past two years. However, it has not monitored or measured the performance and effectiveness of its ISMS and conducted management reviews regularly Just before the recertification audit, the company decided to conduct an internal audit. It also asked most of their staff to compile the written individual reports of the past two years for their departments. This left the Production Department with less than the optimum workforce, which decreased the company's stock.

Tessa was SunDee's internal auditor. With multiple reports written by 50 different employees, the internal audit process took much longer than planned, was very inconsistent, and had no qualitative measures whatsoever Tessa concluded that SunDee must evaluate the performance of the ISMS adequately. She defined SunDee's negligence of ISMS performance evaluation as a major nonconformity, so she wrote a nonconformity report including the description of the nonconformity, the audit findings, and recommendations. Additionally, Tessa created a new plan which would enable SunDee to resolve these issues and presented it to the top management How does SunDee's negligence affect the ISMS certificate? Refer to scenario 8.

- A. SunDee will renew the ISMS certificate, because it has conducted an Internal audit to evaluate the ISMS effectiveness
- B. SunDee might not be able to renew the ISMS certificate, because the internal audit lasted longer than planned

- C. SunDee might not be able to renew the ISMS certificate, because it has not conducted management reviews at planned intervals

Answer: C

Explanation:
According to ISO/IEC 27001:2013, clause 9.3, the top management of an organization must review the ISMS at planned intervals to ensure its continuing suitability, adequacy and effectiveness. The management review must consider the status of actions from previous management reviews, changes in external and internal issues, the performance and effectiveness of the ISMS, feedback from interested parties, results of risk assessment and treatment, and opportunities for continual improvement. The management review must also result in decisions and actions related to the ISMS policy and objectives, resources, risks and opportunities, and improvement. The management review is a critical process that demonstrates the commitment and involvement of the top management in the ISMS and its alignment with the strategic direction of the organization. The management review also provides input for the internal audit and the certification audit.
SunDee has neglected to conduct management reviews regularly, which means that it has not fulfilled the requirement of clause 9.3. This is a major nonconformity that could jeopardize the renewal of the ISMS certificate. The certification body will verify whether SunDee has conducted management reviews and whether they have been effective and documented. If SunDee cannot provide evidence of management reviews, it will have to take corrective actions and undergo a follow-up audit before the certificate can be renewed. Alternatively, the certification body may decide to suspend or withdraw the certificate if SunDee fails to address the nonconformity within a specified time frame.

ISO/IEC 27001:2013, Information technology - Security techniques - Information security management systems - Requirements, clause 9.3 PECB, ISO/IEC 27001 Lead Implementer Course, Module 9: Performance evaluation, measurement, and monitoring of an ISMS based on ISO/IEC 27001 PECB, ISO/IEC 27001 Lead Implementer Exam Preparation Guide, Section 9: Performance evaluation, measurement, and monitoring of an ISMS based on ISO/IEC 27001

NEW QUESTION # 186
How does the Statement of Applicability (SoA) contribute to the certification audit process?

- A. It provides a comprehensive overview of security incidents for external auditors
- B. It provides a checklist for top management to ensure the implementation of relevant controls to the ISMS
- C. It provides a reference for external auditors, listing pertinent controls relevant to the ISMS

Answer: C

NEW QUESTION # 187
......

The software keeps track of the previous PECB Certified ISO/IEC 27001 Lead Implementer Exam (ISO-IEC-27001-Lead-Implementer) practice exam attempts and shows the changes of each attempt. You don't need to wait days or weeks to get your performance report. The software displays the result of the PECB ISO-IEC-27001-Lead-Implementer Practice Test immediately, which is an excellent way to understand which area needs more attention.
