## Benefits of buying Salesforce Data-Architect exam practice material today

With all this reputation, our company still take customers first, the reason we become successful lies on the professional expert team we possess , who engage themselves in the research and development of our Data-Architect learning guide for many years. So we

can guarantee that our Data-Architect exam materials are the best reviewing material. Concentrated all our energies on the study Data-Architect learning guide we never change the goal of helping candidates pass the exam. Our Data-Architect test questions' quality is guaranteed by our experts' hard work. So what are you waiting for? Just choose our Data-Architect exam materials, and you won't be regret.

## Salesforce Certified Data Architect Sample Questions (Q22-Q27):

### NEW QUESTION # 22

Universal Containers (UC) has lead assignment rules to assign leads to owners. Leads not routed by assignment rules are assigned to a dummy user. Sales rep are complaining of high load times and issues with accessing leads assigned to the dummy user. What should a data architect recommend to solve these performance issues?

- A. Assign dummy user last role in role hierarchy
- **B. Create multiple dummy user and assign leads to them**
- C. Assign dummy user to highest role in role hierarchy
- D. Periodically delete leads to reduce number of leads

**Answer: B**

Explanation:

According to the official Salesforce guide 1 , assigning leads to a single dummy user can cause performance issues and data skew, especially if the dummy user owns more than 10,000 records. Data skew occurs when a single user or a small number of users own a disproportionately large number of records, which can affect query performance and sharing calculations. Option B is the correct answer because it suggests creating multiple dummy users and assigning leads to them, which can distribute the load and reduce data skew.

Option A is incorrect because assigning the dummy user to the last role in the role hierarchy does not affect the performance or data skew issues. Option C is incorrect because assigning the dummy user to the highest role in the role hierarchy can worsen the performance and data skew issues, as it will grant access to more users and records. Option D is incorrect because periodically deleting leads can cause data loss and does not address the root cause of the problem.

### NEW QUESTION # 23

UC has large amount of orders coming in from its online portal. Historically all order are assigned to a generic user. Which 2 measures should data architect recommend to avoid any performance issues while working with large number of order records? Choose 2 answers:

- **A. Create a role at top of role hierarchy and assign the role to the generic user.**
- B. Salesforce handles the assignment of orders automatically and there is no performance impact.
- **C. Clear the role field in the generic user record.**
- D. Create a pool of generic users and distribute the assignment of memory to the pool of users.

**Answer: A,C**

Explanation:

Clearing the role field in the generic user record and creating a role at the top of the role hierarchy and assigning it to the generic user are two measures that can help avoid performance issues while working with large number of order records. These measures can prevent data skew and lock contention that may occur when a single user owns or shares a large number of records

### NEW QUESTION # 24

Northern Trail Outfitters needs to implement an archive solution for Salesforce data. This archive solution needs to help NTO do the following:

1. Remove outdated Information not required on a day-to-day basis.
2. Improve Salesforce performance.

Which solution should be used to meet these requirements?

- **A. Identify a location to store archived data and use scheduled batch jobs to migrate and purge the aged data on a nightly basis,**
- B. Identify a location to store archived data, and move data to the location using a time-based workflow.
- C. Create a full copy sandbox, and use it as a source for retaining archived data.
- D. Use a formula field that shows true when a record reaches a defined age and use that field to run a report and export a

report into SharePoint.

**Answer: A**

Explanation:

Identifying a location to store archived data and using scheduled batch jobs to migrate and purge the aged data on a nightly basis can be a way to meet the requirements for an archive solution. The article provides a use case of how to use Heroku Connect, Postgres, and Salesforce Connect to archive old data, free up space in the org, and still retain the option to unarchive the data if needed. The article also explains how this solution can improve Salesforce performance and meet data retention policies.

#### **NEW QUESTION # 25**

UC has to built a B2C ecommerce site on Heroku that shares customer and order data with a Heroku Postgres database. UC is currently utilizing Postgres as the single source of truth for both customers and orders. UC has asked a data architect to replicate the data into salesforce so that salesforce can now act as the system of record.

What are the 3 considerations that data architect should weigh before implementing this requirement? Choose 3 answers:

- A. Ensure there is a tight relationship between order data and an enterprise resource planning (ERP) application.
- B. Consider whether the data is required for sales reports, dashboards and KPI's.
- **C. Ensure the data is CRM center and able to populate standard of custom objects.**
- **D. Determine if the data is driver of key process implemented within salesforce.**
- E. A selection of the tool required to replicate the data.

**Answer: C,D**

Explanation:

a. - Heroku Connect is required but this is confusing

#### **NEW QUESTION # 26**

Universal Containers (UC) is facing data quality issues where Sales Reps are creating duplicate customer accounts, contacts, and leads. UC wants to fix this issue immediately by prompting users about a record that possibly exists in Salesforce. UC wants a report regarding duplicate records. What would be the recommended approach to help UC start immediately?

- A. Create an after insert and update trigger on the account, contact and lead, and send an error if a duplicate is found using a custom matching criteria.
- B. Create a before insert and update trigger on account, contact, and lead, and send an error if a duplicate is found using a custom matching criteria.
- **C. Create a duplicate rule for account, lead, and contact, use standard matching rules for these objects, and set the action to report and alert for both creates and edits.**
- D. Create a duplicate rule for account, lead, and contact, use standard matching rules for these objects, and set the action to block for both creates and edits.

**Answer: C**

Explanation:

Creating a duplicate rule for account, lead, and contact, using standard matching rules for these objects, and setting the action to report and alert for both creates and edits can help UC fix the issue immediately by prompting users about a record that possibly exists in Salesforce. This can also generate a report regarding duplicate records that can be used for further analysis and resolution

#### **NEW QUESTION # 27**

.....

As you know, many exam and tests depend on the skills as well as knowledge, our Data-Architect practice materials are perfectly and exclusively devised for the exam and can satisfy your demands both. There are free demos for your reference with brief catalogue and outlines in them. Free demos are understandable materials as well as the newest information for your practice. Under coordinated synergy of all staff, our Data-Architect practice materials achieved a higher level of perfection by keeping close attention with the trend of dynamic market.
