

Microsoft AB-900 Test Simulator Free - New Soft AB-900 Simulations

What's more, part of that BraindumpStudy AB-900 dumps now are free: https://drive.google.com/open?id=1SIoBlf73cw3gdkwtO7vO_I7nDsQQWt0K

Will you feel nervous while facing the real exam? Choose us, since we will help you relieve your nerves. AB-900 Soft test engine can stimulate the real exam environment, so that you can know the procedure of the exam, and your confidence for the exam will be strengthened. In addition, AB-900 exam dumps are edited by professional experts, who are quite familiar with the exam center, therefore the quality can be guaranteed. We offer you free demo for AB-900 to have a try before buying. And you will receive the downloading link and password within ten minutes for AB-900 exam materials, so that you can start your learning immediately.

Microsoft AB-900 Exam Syllabus Topics:

Topic	Details
Topic 1	Perform basic administrative tasks for Copilot and agents: This domain focuses on managing Copilot and agents, including licensing, feature controls, and usage monitoring. It also covers creating agents, managing prompts, configuring user access, and monitoring agent activity through admin centers.
Topic 2	Identify the core features and objects of Microsoft 365 services: This domain covers the main Microsoft 365 objects such as users, groups, licenses, mailboxes, SharePoint sites, and Teams. It also focuses on managing organization settings, roles, authentication, authorization, and core security features using Microsoft Entra and Microsoft Defender.
Topic 3	Understand data protection and governance tasks for Microsoft 365 and Copilot: This domain explains how Microsoft Purview protects and governs organizational data through classification, sensitivity labels, retention, and compliance tools. It also covers how Copilot accesses data, follows permissions, and how administrators monitor risks, alerts, and oversharing.

100% Pass 2026 Microsoft AB-900: Professional Microsoft 365 Copilot & Agent Administration Fundamentals Test Simulator Free

Microsoft offers up-to-date Microsoft AB-900 practice material consisting of three formats that will prove to be vital for you. You can easily ace the AB-900 exam on the first attempt if you prepare with this material. The Microsoft AB-900 Exam Dumps have been made under the expert advice of 90,000 highly experienced professionals from around the globe. They assure that anyone who prepares from it will get Microsoft AB-900 certified on the first attempt.

Microsoft 365 Copilot & Agent Administration Fundamentals Sample Questions (Q19-Q24):

NEW QUESTION # 19

Hotspot Question

Your organization has a Microsoft 365 subscription.

The HR department at your company asks for a copy of all the recent files that were modified by a user named User1.

What should you use in the Microsoft Purview portal? To answer, select the appropriate solutions in the answer area.

Answer Area

Solutions

	Data Security Posture Management
	DSPM for AI
	eDiscovery
	Information Barriers
	Information Protection
	Insider Risk Management

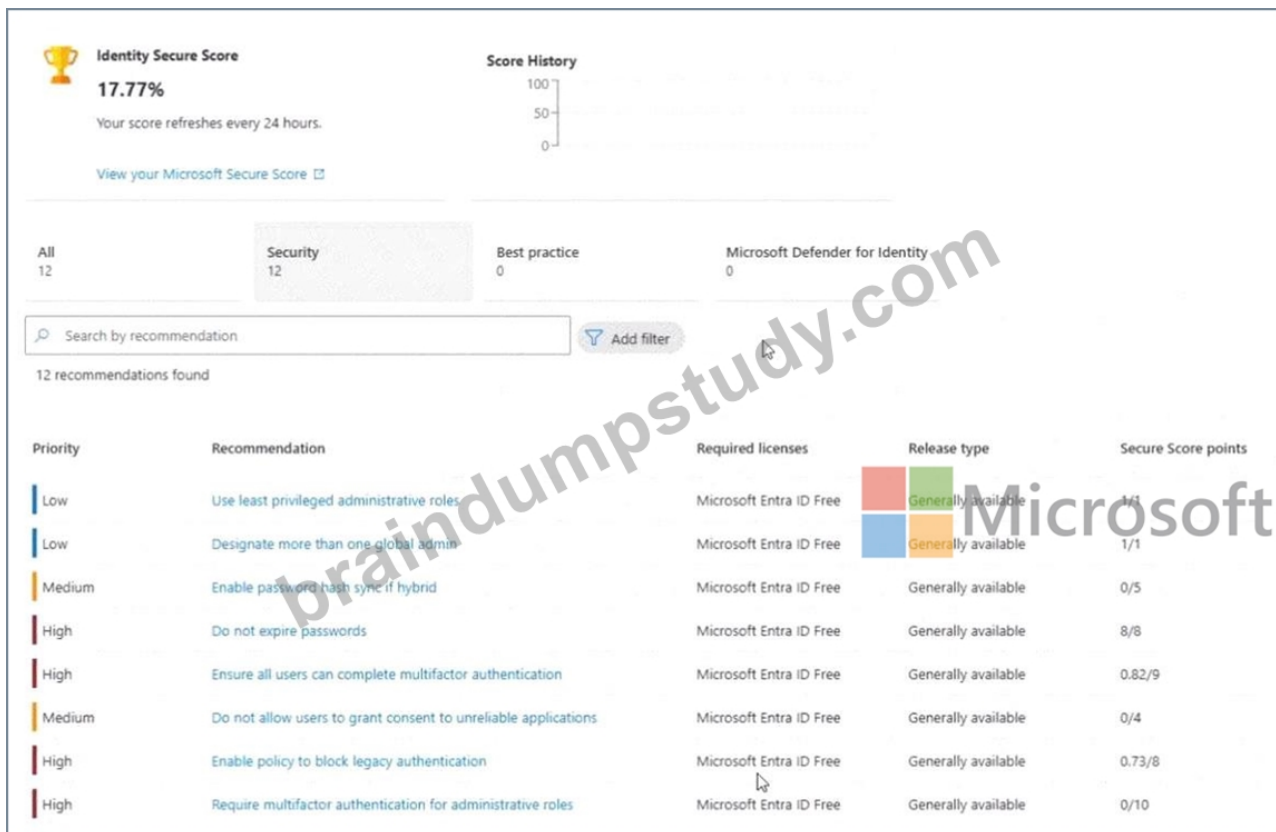

Answer:

Explanation:

□

NEW QUESTION # 20

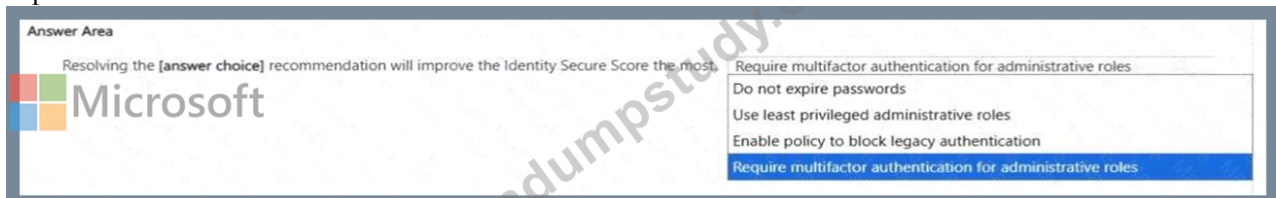

You open the Microsoft Entra admin center as shown in the following exhibit.

Use the drop-down menus to select the answer choice that completes the statement based on the information presented in the graphic.

Answer:

Explanation:

The correct answer is Require multifactor authentication for administrative roles . In the exhibit, each recommendation shows its available Secure Score points . The listed values are 1/1 for Use least privileged administrative roles , 8/8 for Do not expire passwords , 0.73/8 for Enable policy to block legacy authentication , and 0/10 for Require multifactor authentication for administrative roles . Because 10 points is the highest value among the options shown, resolving that recommendation would improve the Identity Secure Score the most.

Microsoft Learn explains that Identity Secure Score in Microsoft Entra is based on Microsoft security recommendations, and each recommendation contributes a specific number of points depending on its impact and implementation state. Recommendations related to administrator protection are especially important because privileged accounts are high-value attack targets. Microsoft also emphasizes multifactor authentication for admin roles as a core identity security best practice. Therefore, both from the screenshot and from Microsoft's identity guidance, the recommendation with the greatest score improvement is Require multifactor authentication for administrative roles .

NEW QUESTION # 21

Your organization has a Microsoft 365 subscription.

All users have Microsoft 365 Copilot licenses.

You need to identify where sensitive content is being used during Copilot interactions, analyze the content usage patterns, and provide recommendations on applying the appropriate protections.

What should you use?

- A. Microsoft Security Copilot
- B. Microsoft Viva Insights

- C. the Microsoft Purview DSPM for AI solution
- D. the Microsoft Purview Insider Risk Management solution

Answer: C

Explanation:

The correct answer is B. the Microsoft Purview DSPM for AI solution . Microsoft documents that Data Security Posture Management for AI (DSPM for AI) in Microsoft Purview provides a central place to secure data for AI apps and proactively monitor AI use , including Copilots and agents . Microsoft also states that DSPM for AI helps organizations identify where sensitive content is used in AI interactions , review Copilot prompts and responses , analyze usage patterns , assess exposure and oversharing risks, and get recommendations for protections such as sensitivity labels and DLP policy coverage.

The other options do not fit this requirement. Microsoft Viva Insights focuses on productivity and work- pattern analytics, not sensitive-data protection in Copilot interactions. Microsoft Security Copilot is a security assistant for analysts, not the Purview governance solution that analyzes sensitive content use in Copilot and recommends data protections. Insider Risk Management is for identifying risky user behavior, not for broad AI interaction posture analysis and protection recommendations. Microsoft specifically positions DSPM for AI as the "front door" for discovering, monitoring, and protecting AI-related data usage in Microsoft 365 Copilot.

NEW QUESTION # 22

Hotspot Question

Select the answer that correctly completes the sentence.

Answer Area

From the SharePoint admin center, you can create a server.

braindumpsstudy.com

server.

user.

site.

role.

Answer:

Explanation:

□

NEW QUESTION # 23

Select the answer that correctly completes the sentence.

□

Answer:

Explanation:

□

The correct answer is adding a public DNS record . Microsoft documents that when you add a custom domain to Microsoft 365, you must first prove ownership of that domain before Microsoft 365 can use it for services such as Exchange Online, SharePoint, and user sign-ins. The standard verification method described by Microsoft is to add a DNS record at your domain registrar or DNS hosting provider. Microsoft commonly uses a TXT record for verification, although in some cases an MX record can also be used depending on the setup flow. This is why "adding a public DNS record" is the right completion for the sentence.

The other choices are not the standard Microsoft 365 domain verification process. Microsoft's admin guidance does not use confirming your business address , uploading a certificate , or uploading a webpage as the normal method for proving ownership of a domain in Microsoft 365. Domain verification is specifically tied to DNS because DNS is the authoritative public system used to prove control over the domain name.

NEW QUESTION # 24

.....

The evergreen field of Microsoft is so attractive that it provides non-stop possibilities for the one who passes the Microsoft AB-900 exam. So, to be there on top of the Microsoft sector, earning the Microsoft 365 Copilot & Agent Administration Fundamentals
