C_CPI_2506 study dumps always managed to build an excellent relationship with our users through the mutual respect and attention we provide to everyone. We sincerely hope our C_CPI_2506 study dumps will help you to pass the C_CPI_2506 Exam in a shortest time, we aimed to help you save more time. Once you purchase our C_CPI_2506 study dumps, we will send to your mailbox within 5-10 minutes, if there are some problem, please contact with us.

SAP C_CPI_2506 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none">Managing APIs: This section of the exam measures the skills of Solution Architects and focuses on managing APIs within the SAP ecosystem. It covers topics such as API provisioning, lifecycle management, security policies, and monitoring, ensuring candidates can handle APIs effectively for enterprise integration needs.
Topic 2	<ul style="list-style-type: none">Implementing Cloud Integration: This section of the exam measures the skills of Integration Consultants and examines how cloud integration flows are designed and deployed. It emphasizes creating integration scenarios, handling connectivity, and applying best practices to build efficient, secure, and reliable integration processes in SAP's cloud environment.
Topic 3	<ul style="list-style-type: none">SAP Event Mesh: This section of the exam measures the skills of Solution Architects and centers on using SAP Event Mesh to support event-driven integration. It highlights the importance of asynchronous communication, event publishing, and subscription models, allowing organizations to build scalable and decoupled systems.
Topic 4	<ul style="list-style-type: none">SAP Integration Suite Overview: This section of the exam measures the skills of Integration Consultants and covers the foundational concepts of the SAP Integration Suite. It provides an understanding of the suite's capabilities, its role in connecting applications, and its relevance in modern cloud-based integration scenarios.

2026 C_CPI_2506 Exam Pass Certify | Professional Latest C_CPI_2506 Test Prep: SAP Certified Associate - Integration Developer

Nowadays everyone is interested in the field of SAP because it is growing rapidly day by day. The C_CPI_2506 credential is designed to validate the expertise of candidates. But most of the students are confused about the right preparation material for SAP C_CPI_2506 Exam Dumps and they couldn't find real SAP Certified Associate - Integration Developer (C_CPI_2506) exam questions so that they can pass C_CPI_2506 certification exam in a short time with good grades.

SAP Certified Associate - Integration Developer Sample Questions (Q17-Q22):

NEW QUESTION # 17

Which log level must you use to examine the payload at specific processing steps in an integration flow?

- A. Trace
- B. Error
- C. Info
- D. Debug

Answer: A

Explanation:

In SAP Cloud Integration, the log levels are:

Info # Default, logs basic execution details.

Debug # Logs processing steps, but not message payload.

Error # Logs only failures.

Trace # Captures message payloads at specific processing steps, used for deep troubleshooting.

Thus, to examine payload at runtime, the log level must be set to Trace.

NEW QUESTION # 18

Which data store operation can you use to save a customer ID?

- A. SELECT
- B. GET
- C. WRITE
- D. POST

Answer: C

Explanation:

In SAP Cloud Integration (part of Integration Suite), the Data Store operations allow temporary or persistent storage of messages for asynchronous processing or correlation.

WRITE # Used to save/store data (e.g., Customer ID) in the Data Store.

GET # Retrieves stored data.

SELECT # Reads stored data with filters.

POST # Not a valid Data Store operation in SAP CPI (it's an HTTP verb).

Hence, to save a customer ID, the correct operation is WRITE.

NEW QUESTION # 19

You want to set up Exchange Properties in an integration flow. Besides a Content Modifier, what can you use?

- A. Groovy SDK scripting
- B. XML scripting
- C. Python scripting
- D. Batch scripting

Answer: A

Explanation:

In SAP Cloud Integration, Exchange Properties can be created and set using:

Content Modifier # Standard way to configure properties.

Groovy Scripting # Via the SAP CPI Groovy SDK, you can dynamically add or update exchange properties at runtime.

Other options:

Batch scripting, XML scripting, Python scripting # Not supported in SAP CPI.

Thus, besides Content Modifier, you use Groovy SDK scripting.

NEW QUESTION # 20

Where must you configure an HTTPS inbound adapter with OAuth 2.0 authentication?

- A. In the integration flow
- B. In the adapter
- C. In the process runtime
- D. In the SAP Integration Suite

Answer: A

Explanation:

An HTTPS inbound adapter is an adapter that allows an integration flow to receive messages from external systems using the HTTPS protocol. OAuth 2.0 authentication is a method of authentication that allows clients to access protected resources on behalf of a resource owner by obtaining an access token from an authorization server. To configure an HTTPS inbound adapter with OAuth 2.0 authentication, you must do it in the integration flow where you define the adapter settings. You can choose OAuth 2.0 as the authentication type and specify the required parameters, such as client ID, client secret, token URL, scope, and so on. You can also configure additional security options, such as SSL certificate, CSRF protection, and CORS policy. Reference: Using Adapter Inbound Security - SAP Learning, Set Up Inbound OAuth Client Credentials Grant Authentication for Senders Calling Integration Flows with SAP-Generated Certificate | SAP Tutorials

NEW QUESTION # 21

To activate the Event Mesh (EMIS) capability in the SAP Integration Suite, which role collections must be assigned to the user performing the activation?

- A. Integration_Administrator and Security_Auditor
- B. Integration_Provisioner and Subaccount Administrator
- C. Process_orchestrator and Subaccount_Viewer
- D. API_Manager and Monitoring-Viewer

Answer: B

Explanation:

To activate Event Mesh (EMIS) capability in SAP Integration Suite, the required role collections are:

Integration_Provisioner # Allows provisioning of new capabilities (including Event Mesh) in Integration Suite.

Subaccount Administrator # Grants permission to manage and configure subaccount-level entitlements and service activations.

Other options:

Integration_Administrator, API_Manager, Monitoring_Viewer # Used for operational tasks, not provisioning.

Process_orchestrator # Refers to on-premise PI/PO, not BTP roles.

Security_Auditor # Auditing role, not activation.

Thus, the correct roles are Integration_Provisioner and Subaccount Administrator.

NEW QUESTION # 22

.....

Free demos offered by ExamsTorrent gives users a chance to try the product before buying. Users can get an idea of the SAP C_CPI_2506 exam dumps, helping them determine if it's a good fit for their needs. The demo provides access to a limited portion of the C_CPI_2506 dumps material to give users a better understanding of the content. Overall, C_CPI_2506 free demo is a valuable opportunity for users to assess the value of the ExamsTorrent study material before making a purchase. The SAP provides 1 year of free updates of real questions. This offer allows students to stay up-to-date with changes in the exam's content.
