Efficient H31-341_V2.5-ENU Exam Dumps Demo & Leading Offer in Qualification Exams & Free PDF H31-341_V2.5-ENU: HCIP-Transmission V2.5

We will provide you with professional advice before you buy our H31-341_V2.5-ENU guide materials. If you have problems in the process of using our H31-341_V2.5-ENU study questions, as long as you contact us anytime and anywhere, we will provide you with remote assistance until that all the problems on our H31-341_V2.5-ENU Exam Brandidumps are solved. When you send us a message, we will reply immediately and we will never waste your precious time on studying our H31-341_V2.5-ENU practice quiz.

Huawei HCIP-Transmission V2.5 Sample Questions (Q87-Q92):

NEW QUESTION # 87

During the maintenance of OSN equipment, it is often seen that the fan is running at full speed and the equipment reports a TEMP_OVER alarm. The common reasons and solutions are?

- A. The power module of the single board is seriously dusty, affecting heat dissipation, and needs to be removed to remove the board
- B. There is a lot of dust inside the fan, which affects the speed. It is necessary to remove the fan to clean it.
- C. The cooling function of the optical module is abnormal, and the optical module needs to be replaced
- **D. The dust filter is seriously accumulated, which affects the ventilation. It is necessary to remove the dust filter for cleaning**

Answer: D

NEW QUESTION # 88

Which of the following is correct about the processing of data frames by the ports of the data board? (Multiple choice)

- **A. Hybrid ports can realize mixed transmission of tag and untag services**
- B. It is not necessary to set the default VLAN ID of the port when the Ethernet port is set to Tag aware, and it is only necessary to set the default VLAN ID of the port when it is set to access
- **C. The port set as the tag Aware attribute can only discard the data without vlan tag**

Answer: A,C

NEW QUESTION # 89

Which of the following descriptions about MPLS and PWE3 are correct? (Multiple choice)

- A. LSP contains different nodes, divided into Ingress, Transit and Egress, each LSP must contain the above three nodes.
- B. MS-PW is carried by one PSN tunnel, while SS-PW is carried by multiple PSN tunnel segments.
- **C. A tag stack is a sorted collection of tags. Theoretically, MPLS labels can be nested infinitely.**
- **D. Multiple PW channels can be carried on one or more PSN Tunnels.**

Answer: C,D

NEW QUESTION # 90

The unprotected chain consists of four network elements: NE1.NE2.NE3 and NE4. Create an end-to-end VC4 path NE1-NE4. Add NE5 between NE2 and NE3 for capacity expansion. The original configuration remains unchanged. No service is configured on NE5.

In this case, the unprotected chain becomes NE1-NE2-NE5-NE3-NE4, how many VC4 paths can be searched out?

- A. 0
- B. 1
- C. 2
- **D. 3**

Answer: D

NEW QUESTION # 91

For the hybrid transmission system with dispersion compensation, the requirements for the optical power entering the fiber should be consistent with the requirements of the original non-coherent system.

- **A. True**
- B. False

Answer: A

NEW QUESTION # 92

The appropriate selection of H31-341_V2.5-ENU training is a guarantee of success. However, the choice is very important, ValidDumps popularity is well known, there is no reason not to choose it. Of course, Give you the the perfect H31-341_V2.5-ENU training materials, if you do not fit this information that is still not effective. So before using ValidDumps training materials, you can download some free questions and answers as a trial, so that you can do the most authentic exam preparation. This is why thousands of candidates depends ValidDumps one of the important reason. We provide the best and most affordable, most complete H31-341_V2.5-ENU Exam Training materials to help them pass the exam.
