BraindumpsIT is admired by all our customers for our experts' familiarity and dedication with the industry all these years. By their help, you can qualify yourself with high-quality SCP-NPM exam materials. Our experts pass onto the exam candidate their know-how of coping with the SCP-NPM Exam by our SCP-NPM practice questions. Exam candidates are susceptible to the influence of ads, so our experts' know-how is impressive to pass the SCP-NPM exam instead of making financial reward solely.

SolarWinds SCP-NPM (SolarWinds Network Performance Monitor) Exam is designed to provide network administrators and IT professionals with the knowledge and skills necessary to effectively monitor and manage network performance using the SolarWinds NPM platform. The SolarWinds NPM is a comprehensive network monitoring and management tool that allows IT teams to proactively identify and resolve network issues before they impact end-users. The SCP-NPM Certification validates an individual's proficiency in using this platform to monitor and manage network devices, applications, and services.

SCP-NPM Latest Version - SCP-NPM New Dumps Free

Now is not the time to be afraid to take any more difficult SCP-NPM certification exams. Our SCP-NPM learning quiz can relieve you of the issue within limited time. Our website provides excellent SCP-NPM learning guidance, practical questions and answers, and questions for your choice which are your real strength. You can take the SCP-NPM Training Materials and pass it without any

difficulty.

SolarWinds Network Performance Monitor (NPM) Exam Sample Questions (Q25-Q30):

NEW QUESTION # 25
Half of your objects in a nested map are down, but the top level map is up. What is the cause?

- A. You set availability thresholds for devices to below 50%
- B. You set map status thresholds to below 50%
- C. You set availability thresholds for devices to above 50%
- D. You set map status thresholds to above 50%

Answer: B

NEW QUESTION # 26
How can you ensure the trigger actions you set on an alert will work?

- A. Simulate a performance interruption on a network device to test the alert trigger
- B. Click Simulate on the assigned trigger action
- C. Use the Database Manager to trigger and test the alert
- D. Test the alert from within Alert View of the Web Console

Answer: B

Explanation:
When you create or edit an alert, you can test the trigger and reset actions by clicking Simulate next to the action you want to test. This will execute the action regardless of the trigger condition. You can also select an object to resolve any variables you have used in your action. For example, if your action is to send an email with the node name and status, you can select a node to see how the email will look like. This way, you can ensure the trigger actions you set on an alert will work as expected. Reference: Test alert triggers and actions in the SolarWinds Platform, How to Create Intelligent Alerts with NPM, How alerts work.

NEW QUESTION # 27
What is required to monitor tenants in your SDN environment with NPM Cisco ACI monitoring? (Choose all that apply.)

- A. Add an APIC node to NPM
- B. Enable API polling on all ACI devices
- C. View your SDN environment in Orion Maps
- D. Enable API polling on the APIC node

Answer: A,B

NEW QUESTION # 28
Which statistic should you use to determine peak network traffic?

- A. Bandwidth usage
- B. Packet loss
- C. Protocol distribution
- D. Network latency

Answer: A

Explanation:
Bandwidth usage is the amount of data transferred over a network connection in a given time period. It is an indicator of how much traffic is flowing through a network device or link. Peak network traffic is the highest level of bandwidth usage that occurs during a specific time interval, such as an hour, a day, or a week.
Monitoring peak network traffic can help you identify potential bottlenecks, plan for capacity, and optimize network performance.

NPM can monitor bandwidth usage on nodes and interfaces using SNMP, WMI, or NetFlow protocols. You can view bandwidth usage charts and reports in the web console, as well as set alerts and thresholds for bandwidth utilization. References: Monitor bandwidth usage in NPM; SCP Study Aid - NPM, page 11.

NEW QUESTION # 29

You have two groups of users - one in Sydney and one in Perth. How do you limit the users within the Orion Platform so they only have access to the devices in their location?

- A. Configure the Orion Web Console settings to show only devices in the user's geographical location
- B. Configure Network Atlas to show only devices in their geographical location
- C. Use the Orion Service Manager to limit user access to nodes only in their location
- D. Group devices into geographical Orion groups and use single group Account limitations to limit user access

Answer: D

Explanation:
According to the SolarWinds NPM Administrator Guide, you can use Orion groups to organize your network objects based on any criteria, such as location, device type, department, etc. You can then apply account limitations based on Orion groups to restrict user access to only the network objects that belong to a specific group. For example, you can create two Orion groups, one for Sydney and one for Perth, and assign the devices in each location to the corresponding group. Then, you can use the single group Account limitation to limit the users in Sydney to only view the Sydney group, and the users in Perth to only view the Perth group. Reference: SolarWinds NPM Administrator Guide, page 163-165; Limit users to specific network areas in the SolarWinds Platform

NEW QUESTION # 30

......

The BraindumpsIT is committed from the day first to ace the SolarWinds Network Performance Monitor (NPM) Exam (SCP-NPM) exam questions preparation at any cost. To achieve this objective BraindumpsIT has hired a team of experienced and qualified SCP-NPM certification exam experts. They utilize all their expertise to offer top-notch SolarWinds Network Performance Monitor (NPM) Exam (SCP-NPM) exam dumps. These SolarWinds SCP-NPM exam questions are being offered in three different but easy-to-use formats.
