

# CT-UT Certification Exam Dumps - CT-UT Valid Exam Tips

2026 Latest Free4Torrent CT-UT PDF Dumps and CT-UT Exam Engine Free Share: [https://drive.google.com/open?id=18bdXNoWD7\\_FUDk1y5wEw7ZC-NF28dETw](https://drive.google.com/open?id=18bdXNoWD7_FUDk1y5wEw7ZC-NF28dETw)

The very reason for this selection of Free4Torrent ISTQB Certified Tester Usability Tester (CT-UT) exam questions is that they are real and updated. Free4Torrent guarantees you that you will pass your ISTQB CT-UT exam of ISTQB certification on the very first try. Free4Torrent provides its valuable users a free CT-UT Pdf Dumps demo test before buying the ISTQB Certified Tester Usability Tester (CT-UT) certification preparation material so they may be fully familiar with the quality of the product.

## ISTQB CT-UT Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none"><li>• Risks in Usability, User Experience and Accessibility: This domain assesses the ability of Risk Analysts to identify and analyze common risks that can affect usability, user experience, and accessibility. It differentiates between product risks—such as users being unable to use a product effectively—and project risks, including lack of expertise or insufficient usability evaluation processes. Understanding these risks helps in planning effective usability testing and evaluation.</li></ul>
Topic 2	<ul style="list-style-type: none"><li>• Usability Reviews: This domain evaluates the skills of Usability Testers in conducting reviews of software interfaces without user involvement. It differentiates informal reviews from expert reviews and introduces heuristic evaluation as a structured method. The section describes step-by-step approaches to preparing for and conducting reviews, emphasizing the importance of consensus and clear communication of findings.</li></ul>
Topic 3	<ul style="list-style-type: none"><li>• Usability and Accessibility Standards: This part addresses the knowledge required by Compliance Officers regarding standards and guidelines that govern usability and accessibility. It introduces ISO standards like ISO 9241-110 and ISO 9241-171, manufacturer guidelines from major platforms, and web accessibility guidelines such as WCAG. It also touches on legislation relevant to accessibility requirements, such as the UK Equality Act and the Americans with Disabilities Act.</li></ul>

## CT-UT Valid Exam Tips - CT-UT Fresh Dumps

Combined with your specific situation and the characteristics of our CT-UT exam questions, our professional services will recommend the most suitable version of CT-UT study materials for you. We introduce a free trial version of the CT-UT learning guide because we want users to see our sincerity. CT-UT exam prep sincerely hopes that you can achieve your goals and realize your dreams.

### ISTQB Certified Tester Usability Tester Sample Questions (Q34-Q39):

#### NEW QUESTION # 34

Which of the following is a key activity in a usability test session?

- **A. Moderate the usability test**
- B. Talk to the participant during the completion of a task
- C. Test the set up and modify the test script if needed
- D. Extract usability findings and recommendations

**Answer: A**

Explanation:

Moderating the usability test is a core activity during the actual usability test session. The moderator guides participants through tasks, ensures the session stays on track, and avoids introducing bias. Option A (testing the setup) happens before the session, during preparation. Option C (extracting findings) occurs during analysis, after the test. Option D (talking during task execution) should be minimized unless necessary, to avoid influencing user behavior. Therefore, option B is the only correct answer aligned with best practices in usability testing.

#####

#### NEW QUESTION # 35

You are asked to evaluate the usability of a software application for a law firm. Due to time and budget constraints, it is not possible to include users in the evaluation process.

Which of the following is a valid approach for evaluating the usability in this case?

- **A. Usability Review**
- B. User surveys
- C. Accessibility Evaluation
- D. Usability testing

**Answer: A**

Explanation:

When actual users cannot be included, a usability review (often an expert or heuristic evaluation) is the most practical method. Trained evaluators examine the interface against usability principles and standards to identify potential issues. Surveys require user input, and usability testing cannot proceed without users.

Accessibility evaluation targets inclusivity for users with impairments, which is related but not a substitute for overall usability evaluation. Therefore, option A is the only valid method under these constraints.

#### NEW QUESTION # 36

Which of these basic approaches to a software development project follows all key elements of human-centered evaluation?

- **A. Interview users, iteratively develop prototypes, and evaluate the software**
- B. Define requirements, develop the software, and perform acceptance test
- C. Iteratively develop prototypes, perform expert reviews, and integrate found issues
- D. Interview users, develop the software, and perform acceptance test

**Answer: A**

Explanation:

Human-centered design, as defined by ISO 9241-210, emphasizes early user involvement, iterative design, and continuous usability evaluation. Option D aligns with this model as it begins with understanding user needs (interview users), proceeds through iterative prototyping (which allows for continuous improvement), and involves user evaluation. This ensures that the final product is shaped by real user input and feedback.

Options A and B lack iteration and continuous evaluation, while option C, although partially aligned, lacks explicit user involvement in the evaluation process, focusing only on expert reviews.

#####

#### **NEW QUESTION # 37**

A web shop owner used Google Analytics to gather information about her users. She found out that most users take about five minutes to place an order. Is the usability of the website good or bad?

- A. The usability of the website is bad - five minutes is way too long
- **B. That depends on the context of use as users may have different expectations**
- C. The usability of the website is good - five minutes is a fair amount of time
- D. That depends on the accessibility of the website

**Answer: B**

Explanation:

Usability is defined in ISO 9241-11 as the extent to which a system can be used by specified users to achieve specified goals with effectiveness, efficiency, and satisfaction in a specified context of use. Without knowing the context-such as product complexity, user familiarity, device type, or purchasing habits-it is impossible to judge whether five minutes is good or bad. For complex items, five minutes may be reasonable, while for one-click purchases, it may be excessive. Thus, usability cannot be assessed solely based on one metric like time-it must be evaluated within its full usage context.

#####

#### **NEW QUESTION # 38**

What is a usability test task?

- A. A process through which information about the usability of a system is gathered in order to improve the system (known as formative evaluation) or to assess the merit or worth of a system (known as summative evaluation)
- B. A document specifying a sequence of actions for the execution of a usability test. It is used by the moderator to keep track of briefing and pre-session interview questions, usability test tasks, and post-session interview questions
- C. A test session in usability testing in which a usability test participant is executing tests, moderated by a moderator and observed by a number of observers
- **D. A usability test execution activity specified by the moderator that needs to be accomplished by a usability test participant within a given period of time**

**Answer: D**

#### Explanation:

A usability test task is a clearly defined activity that a participant is asked to perform during a usability test session. These tasks are typically created by the test designer or moderator and are designed to reflect realistic user goals (e.g., "Find and buy a product"). The purpose is to observe the participant's interaction with the system and identify usability issues. Option A describes a usability test script, not a task. Option C defines usability evaluation in general, and D refers to a session, not a specific task. Therefore, B is correct.
