Professional NSE7_EFW-7.2 Certificate Exam Help You to Get Acquainted with Real NSE7_EFW-7.2 Exam Simulation

The price for NSE7_EFW-7.2 study materials is convenient, and no matter you are a student or an employee, you can afford the expense. Moreover, NSE7_EFW-7.2 exam materials are high-quality, and you can pass your exam just one time by using them. We offer you free demo to have a try before buying NSE7_EFW-7.2 exam materials, and you can have a try before purchasing, so that you can have a better understanding of what you are going to buy. We are pass guarantee and money back guarantee if you fail to pass the exam. We have online and offline service, if you have any questions for NSE7_EFW-7.2 Exam Dumps, you can contact us, we will give you reply as soon as possible.

Fortinet NSE 7 - Enterprise Firewall 7.2 Sample Questions (Q77-Q82):

NEW QUESTION # 77

While configuring the BGP protocol, an administrator applies the set network-import-check disable command under config network. What will FortiGate do as a result of this command?

- A. FortiGate will not advertise any imported routes received from one BGP neighbor to another.
- B. FortiGate will advertise only the corresponding prefixes in the BGP network table to its BGP neighbor, even if it is not in the routing table.
- C. FortiGate will advertise all the prefixes in the BGP network table to its BGP neighbor, even if it is not in the routing table.
- D. FortiGate will not advertise the prefixes, if it is not in the routing table.

Answer: C

Explanation:

Fortigate doesn't advertise the prefix. You can change this behavior by disabling the network- import-check setting. After you disable the setting, Fortigate advertises all prefixes in the BGP network table, regardless of the active routes present in the routing table.

NEW QUESTION # 78

Exhibit.

```
config system central-management
  set type fortimanager
  set fmg "10.0.1.242"
  config server-list
    edit 1
      set server-type rating
      set addr-type ipv4
      set server-address 10.0.1.240
    next
    edit 2
      set server-type update
      set addr-type ipv4
      set server-address 10.0.1.243
    next
    edit 3
      set server-type rating
      set addr-type ipv4
      set server-address 10.0.1.244
    next
  end
  set include-default-servers enable
end
```

Refer to exhibit, which shows a central management configuration

Which server will FortiGate choose for web filter rating requests if 10.0.1.240 is experiencing an outage?

- A. 10.0.1.243
- B. Public FortiGuard servers
- C. 10.0.1.242
- D. 10.0.1.244

Answer: D

Explanation:

In the event of an outage at 10.0.1.240, the FortiGate will choose the next server in the sequence for web filter rating requests,

which is 10.0.1.244 according to the configuration shown in the exhibit. This is because the server list is ordered by priority, and the server with the lowest priority number is chosen first. If that server is unavailable, the next server with the next lowest priority number is chosen, and so on. The public FortiGuard servers are only used if the include-default-servers option is enabled and all the custom servers are unavailable. NEW QUESTION # 79

An administrator has configured two FortiGate devices for an HA cluster. While testing HA failover, the administrator notices that some of the switches in the network continue to send traffic to the former primary device. What can the administrator do to fix this problem?

- A. Configure set link-failed signal enable under-config system ha on both Cluster members
- **B. Configure set send-garp-on-failover enables under config system ha on both cluster members**
- C. Configure remote link monitoring to detect an issue in the forwarding path
- D. Verify that the speed and duplex settings match between the FortiGate interfaces and the connected switch ports

Answer: B

NEW QUESTION # 80

Which statement about network processor (NP) offloading is true?

- A. For TCP traffic FortiGate CPU offloads the first packets of SYN/ACK and ACK of the three-way handshake to NP
- B. The NP provides IPS signature matching
- C. You can disable the NP for each firewall policy using the command np-acceleration set to loose.
- **D. The NP checks the session key or IPSec SA**

Answer: D

NEW QUESTION # 81

You created a VPN community using VPN Manager on FortiManager. You also added gateways to the VPN community. Now you are trying to create firewall policies to permit traffic over the tunnel however, the VPN interfaces do not appear as available options.

- **A. install the VPN community and gateway configuration on the FortiGate devices so that the VPN interfaces appear on the Policy Objects on FortiManager.**
- B. Create interface mappings for the IPsec VPN interfaces before you use them in a policy.
- C. Configure the phase 1 settings in the VPN community that you didn't initially configure. FortiGate automatically generates the interfaces after you configure the required settings
- D. Refresh the device status using the Device Manager so that FortiGate populates the IPsec interfaces

Answer: A

Explanation:

To use the VPN interfaces in a policy, you need to install the VPN community and gateway configuration on the FortiGate devices first. This will create the VPN interfaces on the FortiGate and sync them with FortiManager. References:
