F5CAB4題庫資料 - F5CAB4考古題介紹

你可以在Testpdf的網站上下載部分Testpdf的最新的關於F5 F5CAB4 認證考試練習題及答案作為免費嘗試了，相信不會讓你失望的。Testpdf的最新的關於F5 F5CAB4 認證考試練習題及答案和真實考試題目是很接近。或許你在其他的網站上也看到了相關的培訓資料，但是你仔細比較後就會發現他們的資料來源與Testpdf。Testpdf提供的資料比較全面，包括當前考試題目，是由Testpdf的專家團隊利用他們的豐富的經驗和知識針對F5 F5CAB4 認證考試研

究出來的。

最新的 F5-CA F5CAB4 免費考試真題 (Q17-Q22):

問題 #17

A BIG-IP Administrator uses a device group to share the workload and needs to perform service on a BIG-IP device currently active for a traffic group. The administrator needs to enable the traffic group to run on another BIG-IP device in the device group. What should the administrator do to meet the requirement? (Choose one answer)

- A. Select Traffic Group and then select Failover
- B. Create a new Traffic Group and then fail to Standby Unit
- C. Select Traffic Group and then select Force to Standby
- D. Select Traffic Group on Primary Unit and then select Demote

答案: A

解題說明:

Comprehensive and Detailed Explanation From BIG-IP Administration Control Plane Administration documents:

Traffic Groups are the mechanism BIG-IP uses to control which device owns specific application traffic in a high-availability (HA) configuration. When maintenance is required on a device that is currently active for a traffic group, the correct and recommended action is to fail over that traffic group to another device in the device group.

Failing over the traffic group moves ownership of that traffic group (and the virtual servers associated with it) to another available device without forcing the entire device into standby.

This allows targeted maintenance while minimizing impact to other traffic groups that may still be active on the device.

Why the other options are incorrect:

A is unnecessary and incorrect; traffic groups are not recreated for routine maintenance.

C forces the entire device to standby, which may move more traffic than intended.

D (Demote) affects device trust/priority behavior and is not the standard or recommended method for moving traffic group ownership.

Therefore, selecting the Traffic Group and choosing Failover is the correct solution.

問題 #18

A configuration change is made on the standby member of a device group. What is displayed as "Recommended Action" on the Device Management Overview screen?

- A. Synchronize the active member configuration to the group.
- B. Activate device with the most recent configuration
- C. Force active member of device group to standby
- D. Synchronize the standby member configuration to the group

答案: D

解題說明:

Comprehensive and Detailed Explanation From BIG-IP Administration Control Plane Administration documents: The BIG-IP Control Plane monitors the "Commit ID" of the configuration on all group members. When a change is made on the Standby unit, it becomes the member with the most recent configuration. The "Recommended Action" in the HA status dashboard will be to synchronize that specific device's configuration to the rest of the group to ensure consistency

問題 #19

A BIG-IP Administrator makes a configuration change to the BIG-IP device. Which file logs the message regarding the configuration change?

- A. /var/log/audit
- B. /var/log/messages
- C. /var/log/secure
- D. /var/log/user.log

答案: A

解題說明：

Audit logging is a specialized feature within TMOS designed to track administrative actions. According to F5 documentation, whenever a system object (like a virtual server, pool, or profile) is created, modified, or deleted, the system records the event. These logs are stored specifically in /var/log/audit. This is essential for control plane administration to track "who did what and when" regarding the device configuration.

問題 #20

What are the recommended methods for forcing a BIG-IP system to standby mode? (Choose two answers)

- A. Active BIG-IP: Configuration Utility > Device Management > Devices > Local Device (Self) > Force to Standby
- B. Active BIG-IP: CLI > tmsh run /sys failover standby
- C. Active BIG-IP: Configuration Utility > Device Management > Traffic Groups > Local Device (Self) > Force to Standby
- D. Active BIG-IP: CLI > tmsh run /sys failover device standby

答案：A,D

解題說明：

BIG-IP provides two supported and documented methods to manually force a device into standby state in a high-availability (HA) configuration:

* CLI method (A):

* tmsh run /sys failover device standby

This is the correct and supported TMSH command to force the local device to transition from active to standby.

* Configuration Utility method (B): Navigating to Device Management > Devices > Local Device (Self) and selecting Force to Standby performs the same operation through the GUI and is fully supported.

Why the other options are incorrect:

* C is incorrect: Traffic Groups do not provide a "Force to Standby" option for the local device; traffic groups are used to manage which device owns specific traffic, not to force device-level failover.

* D is incorrect: tmsh run /sys failover standby is not a valid TMSH command. The correct syntax requires device standby.

Thus, the correct answers are A and B.

問題 #21

An LTM device has a virtual server mapped to www.f5.com. Users report that when they connect to /resources /201.1.2h.1.com they are unable to receive content. What is the likely cause of the issue?

- A. The pool associated with the virtual server does not have priority group activation enabled.
- B. The virtual address does not have ARP enabled.
- C. The virtual address does not have route advertising enabled.
- D. The pool associated with the virtual server is failing its health check.

答案：B

解題說明：

The Control Plane is responsible for ARP (Address Resolution Protocol) management for Virtual Addresses.

For a Virtual Server to be reachable, the BIG-IP must respond to ARP requests for that IP. If the "ARP" setting is disabled on the Virtual Address properties, upstream routers cannot resolve the MAC address of the BIG-IP, leading to connectivity failure even if the service itself is "Available."

問題 #22

.....

Testpdf 應一些考友的需要，在第一時間內及時更新了 F5CAB4 這門題目，更新之後的 F5CAB4 擬真試題覆蓋率 100%。考生可在反復練習這份真題的基礎上，多思考，多總結，通過 F5CAB4 考試就沒有問題了。建議的是，一定要瞭解這門考試的最新動態資訊，這樣才能在考試中做到隨機應變。而我們就是一個可以滿足很多參加 F5 F5CAB4 認證考試的 IT 人士的需求的網站。

F5CAB4 題庫資料 : <https://www.testpdf.net/F5CAB4.html>

通過 F5 F5CAB4 考試不是很簡單的，我們的 F5 F5CAB4 測試題庫培訓資料確保您完全理解問題及問題背後的概

都有股子不壹樣的氣韻，因為我不是壹個人，通過F5 F5CAB4考試不是很簡單的，我們的F5 F5CAB4測試題庫培訓資料確保您完全理解問題及問題背後的概念，它可以幫助您很輕鬆的完成考試，並且一次通過F5CAB4認證考試。

Testpdf提供的考試認證題庫是根據最新的考試知識點和輔導材料整編而來，知識點覆蓋很全面，是您備考的最佳助手，我們有針對 F5CAB4 認證考試的培訓工具，可以有效的確保你通過F5CAB4 考試，獲得 F5CAB4 證書。
